

Whirlpool refrigerator error codes

 searspartsdirect.com/diy/error-codes/refrigerator-repair/1234589/whirlpool-refrigerator/1198

d on the refrigerator display

Air damper is stuck

Check/Repair

Unplug the refrigerator and examine the air damper that controls air flow from the freezer compartment to the refrigerator compartment for damage. If the air damper is broken, replace it.

How-to help

[How to replace a diffuser in a side-by-side refrigerator](#)
