

Soundproofing Reduces Air Conditioning Noise

newenglandsoundproofing.com/air_conditioner_soundproofing

Bourne
MA

A new homeowner noticed that the home Air Conditioning unit was located too close to the deck. The noise when it turned on and ran was disturbing the peaceful relaxation of the back yard. New England Soundproofing had to install Sound Barrier MD and Sound Absorption insulation to reduce the noise coming from the A/C unit. To keep with the current décor, the homeowner requested the same white PVC fencing used throughout the home. New England Soundproofing built a two-sided fence around the unit, including the absorption material and the Sound Barrier MD. The final results where perfect, and now the homeowner can relax outside without being disturbed by the loud A/C unit.
