Average Retail Price of Electricity to Ultimate Customers by End-Use Sector, by State

Electric Power Monthly with data for August 2010
Report Released: November 15, 2010
Next Release Date: Mid-December 2010

Table 5.6.A. [xls](#) format [Electric Power Monthly](#)

Table 5.6.A. Average Retail Price of Electricity to Ultimate Customers by End-Use Sector, by State, August 2010 and 2009
(Cents per kilowatthour)

Census Division and State	Residential		Commercial ¹		Industrial ¹		Transportation[1]		All Sectors	
	Aug-10	Aug-09	Aug-10	Aug-09	Aug-10	Aug-09	Aug-10	Aug-09	Aug-10	Aug-09

[1] See Technical notes for additional information on the Commercial, Industrial, and Transportation sectors.

Notes: See Glossary for definitions. Values for 2009 and 2010 are preliminary estimates based on a cutoff model sample. See Technical Notes for a discussion of the sample design for the Form EIA-826. Utilities and energy service providers may classify commercial and industrial customers based on either NAICS codes or demands or usage falling within specified limits by rate schedule. Changes from year to year in consumer counts, sales and revenues, particularly involving the commercial and industrial consumer sectors, may result from respondent implementation of changes in the definitions of consumers, and reclassifications. Retail sales and net generation may not correspond exactly for a particular month for a variety of reasons (i.e., sales data may include imported electricity). Net generation is for the calendar month while retail sales and associated revenue accumulate from bills collected for periods of time (28 to 35 days) that vary dependent upon customer class and consumption occurring in and outside the calendar month. Totals may not equal sum of components because of independent rounding.
