# Product Emission and Combustion Health Hazards

#### Kathleen Hess-Kosa

OMEGA Southwest Environmental Consulting, Canyon Lake, Texas, USA

As the list of regulated chemicals deemed environmental and/or occupational toxins grows, so go components of building materials. This book consolidates extensive research into plastics and functional building materials used in construction and renovation projects. It penetrates the mire of information and provides an easy reference for environmental professionals, architects, and construction managers. It provides a pre- and post- construction guide to potential materials emission and combustion health hazards that one might anticipate prior to, during, and after construction.

### **KEY FEATURES**

- Offers a time-saving, easy reference to read and understand
- Provides a single source for most building material health hazards with uniform chapter format for comparing technologies
- Sheds light on obscure research revelations with helpful and useful design, figures, and tables
- Serves as a pre- and post-construction guide for material selection
- Includes up-to-date information from an expert in indoor air quality

## **SELECTED CONTENTS**

POLYMERS. Polymers in Construction. Molded and Extruded Plastics. Foam. Rubber. Plasticizers. Plastic Stabilizers, Pigments, and Fire Retardants. BUILDING MATERIALS BY FUNCTION. Functional Building Materials. Rough-in and Dry-in Construction Components. Interior Construction Components. Finish-out Construction Components. Surface Applications, Glues, and Mortar. Natural Materials. Engineered Composite Materials. Recycled Materials. PRODUCT EMISSIONS AND GREEN BUILDINGS. Product Emission Testing. Green Building Requirements. Glossary. Appendices.
