*Prime pigments include titanium dioxide (TiO₂), plus all other pigments directly adding to the hiding power of this paint.*

**RECOMMENDED FILM THICKNESS PER COAT**

Wet: 3.8 mils  
Dry: 1.5 mils

**PRACTICAL COVERAGE PER COAT AT RECOMMENDED DRY FILM THICKNESS**

300-400 sq. ft. per gallon, depending on surface conditions.

**AVERAGE DRY TIME AT 77°F/25°C (ASTM D 1640)**

To touch: 1-2 hours  
Recoat: 4-6 hours

**APPLICATION EQUIPMENT**

Brush, roller, airless spray

**SURFACE PREPARATION**

All surfaces must be cured, clean, dry, and free from dirt, dust, rust, stains, grease, oil, mildew, efflorescence and other contaminants. Remove all loose, peeling, or chalky paint by sanding, scraping, high-pressure washing or other appropriate methods. Repair all cracks, holes, and other surface imperfections with a suitable patching material. Repaired surfaces should match the surrounding surface texture. If efflorescence exists, remove all noticeable deposits and prime the entire surface with Super-Loc® (W 718), Eff-Stop® (W 709) or Acri-Loc® (W 6232).

**SPECIAL INSTRUCTIONS**

- CAUTION: Scraping or sanding surfaces of older buildings (especially pre-1978) may release dust containing lead or asbestos. EXPOSURE TO LEAD OR ASBESTOS CAN BE VERY HAZARDOUS TO YOUR HEALTH. Always wear appropriate personal protective equipment during surface preparation, and finish cleanup of any residues by water-washing all surfaces. For more information, see Dunn-Edwards brochure on “Surface Preparation Safety” or call EPA’s National Lead Information Hotline at 1-800-424-LEAD, or log on to www.epa.gov/lead or /asbestos, or contact your state or local Health Department.

- This product can neither cause nor prevent or cure the growth of mold, mildew, or other forms of fungus. Excessive moisture and inadequate ventilation are the main conditions that promote their growth. Correct any such conditions before painting.

- Certain woods, such as redwood, cedar and spruce contain water-soluble extracts (tannins) that may discolor lighter colors. In these situations, it is recommended to prime the wood with E-Z Prime® (W 708) or Exterior Acrylic Wood Primer before applying ACRI-HUES® (W 720).

- For best results, use airless spray application.

- Do not apply when the air or surface temperature is below 50°F.

**THINNING RECOMMENDATIONS**

Designed to be applied at package consistency. However, if thinning is necessary to maintain good flow and workability, add up to ½ pint (8 fl. oz.) of clean water per gallon.

**STORAGE**

Store in a dry area. Protect from freezing. Extreme temperatures may cause a solid skin to form. Paint to gel, and high heat may cause a solid skin to form.

**CLEANUP**

Warm, soapy water

**DISPOSAL**

For information on local options to dispose of unwanted, leftover paint, call 1-800-CLEANUP, or log onto www.cleanup.org.

**PRIMERS**

- **Masonry:**
  - Stucco: Super-Loc® (W 718), Eff-Stop® (W 709), Acri-Loc® (W 6232) or Flex-Prime® (W 6315)
  - Plaster: Enduraseal® (W 360)
  - Brick: Super-Loc® (W 718) or Enduraseal® (W 360)
  - Smooth trowel: Super-Loc® (W 718), Eff-Stop® (W 709) or Acri-Loc® (W 6232)

- **Wood:**
  - Smooth: E-Z Prime® (W 708)
  - T-11 siding: E-Z Prime® (W 708)
  - Rough-sawn: Self-priming (see Special Instructions)

- **Synthetic Wood:**
  - Masonite: Ultra-Grip® (W 715)
  - Hardboard: Ultra-Grip® (W 715)
  - MDO siding: Ultra-Grip® (W 715)

- **Metal:**
  - Ferrous: Corrobar® (43-5), Galv-Alum (43-7)
  - Non-Ferrous: Ultra-Grip® (W 715) or Galv-Alum (43-7)
