HUBBELL ELECTRICAL CATALOGUE

Western Electric Company
Eleventh & York Sts., Philadelphia, Pa.

Electrical Specialties

Catalogue and Price List No. 9. August, 1906

Prices subject to change without notice. All previous prices on goods mentioned in this Catalogue are hereby canceled.

Manufactured by

Harvey Hubbell, Incorporated

Main Office and Factory, Bridgeport, Conn.

New York

Chicago

San Francisco

INTRODUCTORY

IN PRESENTING to the trade this, our 1906 catalogue we call particular attention to the many new specialties shown herein, all of which are the result of careful thought and experiment. They are original in design, practical and unequaled in their class.

With increased facilities and close attention to the minutest detail, the high reputation of the superior quality that has characterized the Hubbell Line in the past, will be maintained in the future.

HARVEY HUBBELL, Inc.

Bridgeport, Conn., August 1906

TELEGRAPHIC CODE

An illustration of two telegraph poles connected by several horizontal wires. The poles are positioned on the left and right sides of the page, with the wires stretching across the top and middle sections. The poles have cross-arms with insulators. The entire scene is framed by a rounded rectangular border.

To avoid liability of error, customers are requested to use code words, as far as possible, in telegraphing for goods, also for information relative to quotations or shipments.

QUESTIONS

GENERAL

Gesto	Write us full particulars regarding.
Gloria	Advise by mail.
Gratus	Advise by telegraph.
Gravis	Do the best you possibly can.
Grex	This is important.

ORDERS

Obeo	Ship by freight.
Obruo	Ship by freight prepaid.
Obvius	Ship by freight with sight draft attached to bill of lading.
Odium	Ship by express.
Olim	Ship by express prepaid.
Onero	Ship by express C. O. D.
Opes	Add to our order No. . . .
Opus	Cancel our order No. . . .
Oram	Duplicate our order No. . . .
Orbis	Change our order No. . . . to read,
Oris	Hold our order No. . . . awaiting further instructions.

Otium	Shipping instructions to follow.
Ovum	Do not proceed with our order No. . . until further advised.

SHIPMENTS

Saltus	Have you shipped our order No. . . .
Sancio	When will you ship our order No. . . .
Sano	Trace shipment of our order No. . . .
Schola	Ship what you can immediately, and let balance follow.
Scindo	Advise by telegraph if you cannot ship, in one week, our order No. . . .
Statin	When can you make first shipment, and when balance of our order No. . .

PRICES

Palam	At what price can you furnish.
Parco	Quote us by mail.
Parens	Quote us by telegraph.
Pilum	Have you in stock.
Posco	How soon could you furnish us with.

Telegraphic Code—Continued

ANSWERS

GENERAL

Gades	Your financial standing being unknown to us, we shall send goods C. O. D. unless advised to the contrary.
Galba	Your financial standing being unknown to us, we shall send goods sight draft attached to bill of lading, unless advised to the contrary.
Gallia	Your financial standing is unknown to us. Will you kindly send us references?
Gelu	In reference to your telegram of
Gener	In reference to our telegram of
Genu	In reference to your letter of
Gero	In reference to our letter of

ORDERS

Oclor	Too late to cancel order.
Onus	Your order not plain. Send duplicate with full particulars.
Ordo	Send shipping instructions for your order No. . . .

SHIPMENTS

Saepe	Your order shipped by express.
Salus	Your order shipped by freight.
Satis	Will ship your order by express.
Scriba	Will ship your order by freight.
Sedes	Partial shipment of your order made.
Silva	Completing shipment of your order made.
Solus	Will ship balance of your order.
Spero	Will advise later regarding balance.
Stella	First shipment of your order will be made.
Super	Shall we ship portion of your order at once, or hold for completing shipment?

PRICE

Palus	Cannot give better price.
Pecus	Cannot accept at price mentioned.
Pomum	Have none in stock.
Porta	Can ship at once if advised immediately.
Probe	Can make partial shipment at once, balance in

8

Special Finishes

To meet the demand for special finished electrical goods, we carry a stock of the most popular finishes, such as old brass, oxidized copper, polished gilt, etc.

We are prepared to furnish, upon short notice, such other finishes as those mentioned on opposite page.

It is well to submit a sample when placing order for finishes that are not standard.

We believe the fixture house and contractor will value the securing of special finished goods without delay, thereby saving the great expense of refinishing the article after it has been assembled.

List of Special Finishes

Code Word	Finish No.	Finish	Code Word	Finish No.	Finish
Flowerer	1	Polished Brass.	Floygene	16	Polished Steel.
Flowerage	2	Old Brass.	Fluate	17	Nickel-Plate.
Floweret	3	Old English Bronze.	Fluavil	18	Oxidized Silver.
Flowerful	4	Antique or Flemish Brass.	Flucan	19	Butler's Silver.
Flowering	5	Oxidized Brass.	Fluce	20	Wrought Iron.
Flowerless	6	Gilt.	Flecto	21	Bauer Barff.
Flowery	7	English Bronze.	Fleo	22	Acid or Statuary Bronze.
Flowing	8	Satin Gold.	Fletus	23	Lemon Brass.
Flowingly	9	Etruscan Gilt.	Flo	24	Ormulu or French Gilt.
Flowk	10	Gold Bronze.	Florens	25	Burnished Gilt.
Flowkwort	11	Mottled Copper.	Fluctus	26	Polished Silver.
Flown	12	Oxidized Copper.	Flumen	27	Pompeiiian Bronze.
Flowretry	13	Antique Copper or Japanese Bronze.	Fluo	28	Roman or Dull Gold.
Flowte	14	Polished or Hardware Bronze.	Flagito	29	Gun Metal.
Flox	15	Polished Copper.	Fluvius	30	Sand Blast, Ant. Brass.
			Floreo	31	Sand Blast, Old Brass.

Hubbell Pull Sockets

Patented August 11, 1896; May 8, 1900; July 30, 1901;
February 17, 1903; April 10, 1906

National Electrical Code Standard

The Pull Socket is not only acknowledged to be the most convenient and economical, but also superior.

When the Socket is not within easy reach, it is indispensable.

The chain may be of any length.

See opposite page for prices

Hubbell Candelabra Pull Socket

Patented August 11, 1896; May 8, 1900; July 30, 1901;
February 17, 1903; April 10, 1906

National Electrical Code Standard

The same mechanism employed in our regular Socket is embodied in the Hubbell Candelabra Pull Socket.

It is the first device in the Candelabra line in which there is a Socket and Switch combined.

This Candelabra Socket has met with instant favor, and has been the means of bringing out new ideas in ornamental fixture work among the fixture manufacturers, for whom it was specially designed.

See opposite page for prices

For special finish collar, see page 117

Hubbell Candelabra Extension

National Electrical Code Standard

The Candelabra Extension—an adjunct to our Candelabra Socket—may be used on any device fitted with a candelabra base.

Its terminals are connected by a brass tube, heavily insulated, making the rigidity so essential in candelabra work.

This extension is designed to take a four-inch candle, and is sold complete with Socket, or separately, as listed.

The accompanying cut illustrates the Extension, complete with Candelabra Socket.

See opposite page for prices

Side Wall Bracket showing use of Candelabra Extension

For special finishes see page 117

Hubbell Incandescent Light Attachment for Oil Lamps

"The Dazzlite"

Manufactured under the Hufschmidt patent, December 16, 1902

The Dazzlite is a practical and inexpensive attachment for converting an oil lamp into an electric.

The base of the Socket (as per illustration) is easily and quickly fitted to any lamp with a common burner, be it either flat wick or central draft.

It does not injure the lamp in any way, and requires no tools to attach or detach.

When sold, complete, same is fitted with 7 feet of silk parallel lamp cord and our regular plug.

See opposite page for prices

 For separate caps " " 72-74

Hubbell Attachment Plug

All Porcelain Fuseless; 300 Volts, 3 Ampere

Patented August 16, 1892; November 8, 1904

National Electrical Code Standard

This Plug is of the separable type and is made up of a cap and base, the former being interchangeable but one base is required for a variety of purposes.

The separate cap obviates all twisting of the cord which was the main objection in the old style plug.

The contact is made on the knife switch principle, and the terminals are enclosed in separate cells.

Finished in porcelain, hard rubber or brass covered caps.

See opposite page for prices

No. 5406

For separate caps " " 72-74

Hubbell Chandelier Plug

without Casing

Patented August 16, 1892; November 8, 1904

National Electrical Code Standard

The Chandelier Plug is a modification of our regular Attachment Plug, and is intended to be used in a ball or sphere at the bottom of the chandelier or cluster.

It is particularly desirable on a chandelier for a reading lamp or fan, where the current can be tapped without displacing the lamp.

The base is interchangeable with the regular caps.

Polished brass, old brass, polished nickel, oxidized copper, are standard finishes. All goods shipped polished unless otherwise specified. For other finishes, see page 117. For separate caps, see pages 72-74

Hubbell Flush Attachment Plug

without Cover

Patented November 8, 1904; June 27, 1905

National Electrical Code Standard

This Flush Plug does away with the lid when not in use, and still presents a flush surface having at the same time no electrical contacts exposed.

When connected, the cap only projects one-half inch above the surface of the plug, doing away with the unsightly lid and far projecting plug as found in other styles.

The cap to our regular plug, now so universally adopted, can be used on this flush plug, permitting an interchangeable connection from a baseboard outlet, which arrangement cannot be had when any other flush receptacle is used.

See opposite page for prices

Hubbell Flush Attachment Plug

with Cover

Patented November 8, 1904; June 27, 1905

National Electrical Code Standard

The mechanical features of this plug are identical with those illustrated on page 47, except the plate is fitted with a double hinge and shows no holes or openings.

When in use, it swings back on the plate, and, the cap setting in a recess, is practically flush with the surface.

Hubbell Side Wall Attachment Plug

All Porcelain Fuseless

Patented August 16, 1892; November 8, 1904

National Electrical Code Standard

This Plug is to be used, chiefly, for side wall work, and is designed for both cleat and concealed wiring.

It dispenses with both Socket and Receptacle, and is especially desirable in an orchestra pit, and for other stage effects, also wherever it is convenient to use an extension cord.

Caps are interchangeable with all plugs.

See opposite page for prices

 For separate caps " " 72-74

Hubbell Theatre Plug

Patented August 16, 1902; November 8, 1904

This Theatre Plug is designed principally for stage lighting where it is desired to carry an extension cord for various scenic effects.

It is the most practicable Plug for this purpose as it provides a means of conveniently carrying the current to the desired point, and quickly connecting and disconnecting same. The separable and interchangeable cap are features that cannot be had with other styles.

This Plug is made in composition only, making it practically indestructible.

See opposite page for prices

Hubbell Shade Holder

Code Word	List No.		Schedule	Std. Pkg.	Pkg. Weight	Price Gro.
76 Spiritus	5339	2 1/4 inch Shade Holder, per gross .	D	5 gro.	38 lbs.	\$9.00
Status	5340	3 1/4 " " " " " .	D	1 " 12 "		18.00

For special finishes, see page 117

Hubbell Shade Holder

Patented July 28, 1903; February 23, 1904

This Holder is made in two parts, consisting of a split screw collar and holder.

It can be attached to any standard Socket without the use of tools, and is as firmly held in place as if it were a part of the shell itself, holding the shade or globe in a direct and true center, and its rigidity prevents (by ill use or otherwise) the shade from being sprung from a correct position.

There are no projecting screws or lugs to present an unsightly appearance.

See opposite page for prices

No. 5339

Hubbell Locking Spring Shade Holder

78

Code Word	List No.		Sched- ule	Std. Pkg.	Pkg. Weight	Price Gro.
Surgo	5528	2 1/4 inch Locking Spring Shade Holder	D	5 gro.	40 lbs.	\$12.50

For special finishes, see page 117

Hubbell Locking Spring Shade Holder

Patented July 28, 1903; February 24, 1904; June 27, 1905

The method of fastening this holder to the socket shell is the same as that employed in our No. 5339, but the holding of the shade by a locking spring, doing away with the globe holder screws is an entirely new principle.

It permits of a more rapid adjustment than is obtained in the ordinary holder, at the same time holding the shade firmly and in a correct position.

It is specially adapted for railway or marine use, as the shade cannot jar loose, and is more ornamental for all purposes.

See opposite page for prices

Hubbell Flat Tin and Aluminum Shades

Patented July 28, 1903

A combined Shade and Shade Holder is the principle of our shades.

They cannot be put on in any other than a true position, therefore, hold the lamp in an exact center, where it is securely held no matter how much abuse it receives. This secures an equal and full distribution of light, which is a strong feature from an economical viewpoint.

No screws or shade holders are required in attaching to the socket, therefore, a considerable saving in the cost of installation is obtained.

Made in both tin and aluminum.

See opposite page for prices

No. 5432

Hubbell Deep Cone Tin and Aluminum Shades

Hubbell Standard Pull Clusters

Patented May 27, 1902; July 28, 1903

The principal feature of our Cluster is the separate control of each light by a pendant chain connecting our Pull Sockets to a common center. By a straight pull all of the lights may be turned on or off. By pulling the chain to one side anyone or more of the lights may be operated.

Another distinctive feature is the fastening of the Socket cap to the cluster center by riveting, thereby lessening the danger of the socket becoming loose or unfastened. Not the least of the advantages of this Cluster is the small expense of equipping a building with a convenient means of controlling the lights without the use of extra wiring and wall switches.

Complete with shade holder, chain and acorn, not wired. Standard length of chain measured from bottom of cluster, 3 feet. Cluster furnished for $\frac{3}{8}$ inch stem unless otherwise specified.

Hubbell Separable Pull Clusters

Patented May 27, 1902 ; July 28, 1903

This Cluster is of a similar design to our regular Pull Cluster, except it has a separable bottom for wiring the fixture from the underside, and it is made of heavy gauge (No. 22) metal for high grade work.

Complete with Shade Holder, special heavy Chain and Acorn, not wired. Standard length of chain measured from bottom of Cluster, 3 ft. Cluster furnished for $\frac{3}{4}$ inch stem unless otherwise specified.

02

Hubbell Fixture Pull Clusters

Patented May 27, 1902; July 28, 1903

This Cluster, although of the same general make-up as our regular Cluster, is designed for more ornamental work.

It is equipped with 2¼ Hubbell Shade Holders without shades. Not wired.

Standard Length of Chain from bottom of Cluster, three feet, not wired.

See opposite page for prices

No. 5385

Hubbell Side Wall Pull Clusters

		If furnished wired, add to list				1.00

For special finishes see page 118

Hubbell Side Wall Pull Clusters

Patented May 27, 1902; July 28, 1903

This fixture, while both ornamental and substantial, is conveniently reached for turning on and off the lights by the chain, and, like our Pull Cluster, dispenses with extra wiring and wall switches. It is well adapted to halls and public rooms, where it is desirable to place the fixture at a greater height than would be convenient with the key socket. It is fitted with $\frac{2}{4}$ inch Hubbell Shade Holders, without shades. Not wired

Standard length of chain measuring from button to acorn, one foot.

See opposite page for prices

If furnished with sockets wired, add to list,
per light

If desired with stem, canopy and crowfoot, see pages 108, 110, 112. If keyless sockets are desired, add "less" to code word. For special finishes, see page 118.

Hubbell Key and Keyless Clusters

This Cluster is made on the same general plan as our Pull Cluster, except the regular Key or Keyless Socket is used instead of our Pull Socket and Chain. When used with our regular Pull Clusters it furnishes a uniform design throughout the building, at the same time being much more substantial than any other key cluster, as the caps of the socket are a part of the cluster center, and are not attached to the center by a threaded nipple.

Cluster complete with sockets attached and Shade Holder. Not wired.

Furnished for $\frac{3}{8}$ inch stem unless otherwise specified.

See opposite page for prices
