RE: Electrical panel clarification.

To Whom It May Concern:

I was recently asked to look at the electrical systems at Northgate Condominiums; the current panels are F.P.E (Federal Pacific Electric).

These panel and breakers are no longer manufactured and have had issues in the past for breakers not tripping.

As The City of Waltham's Inspector of Wires, I RECOMEND these panels be replaced.

It is my understanding Northgate Garden's Board of trustees has made the decision to mandate the panels be replaced. Not The City of Waltham.

Any qualified Electrician, Licensed by The Commonwealth of Mass with Liability insurance can perform this task.

Sincerely

Timothy P Kelly  
Inspector of Wires  
City of Waltham
