**A FLOOR FOR PEOPLE WHO HATE TO WAX** Armstrong developed Solarian especially for people who like a bright, shiny floor but are tired of the constant cycle of waxing, stripping and rewaxing needed to keep many other floors looking their best. Years of research went into the development of Solarian's Mirabond™ wear layer, a more durable wear surface that maintains its high gloss, without waxing, far longer than vinyl floors and makes Solarian the easiest-to-care-for floor Armstrong has ever made.

Eventually, heavy-traffic areas of the floor may begin to show a slight lowering of gloss. If you find this objectionable, a special Solarian™ Floor Finish is available which can be applied periodically to maintain the desired shine.

**REMARKABLY EASY TO CLEAN** Not only does Mirabond give Solarian a longer wearing shine, it also provides unprecedented ease of cleaning. Because it's less porous, sweeping or damp-mopping with a mild detergent will handle most clean-up jobs. Even black heel marks come up more easily.

**CONTEMPORARY STYLING** About the only problem you'll have with Solarian is choosing which of the smart patterns to put in your kitchen. Solarian comes in many smart designs and in a choice of bright, sunny colors.

Take a holiday from floor waxing with Solarian . . . the sunny floor that shines without waxing.

Please use actual samples for final color selections. Printing limitations make it impossible to guarantee exact color matching in this folder.
