

Our current supplier of Oil Furnace Direct Venting Kits, **Flex-L** has discontinued manufacturing the kits we purchase from them. We have secured a new supplier; NovaFlex will supply the Flexmaster **Z-Flex** brand **Oil Furnace Double Wall Insulated Direct Vent Kits**. We appreciate your patience during this transition period.

**Are the two kits interchangeable?**

The two kits are **NOT** interchangeable. ECR supplies the Direct Vent Appliance Adaptor (Fig. 1 or 2) with every Direct Vent Oil Furnace manufactured. If the Direct Vent Oil Furnace has a **Flex-L** appliance adaptor inside (Fig. 1) a **Flex-L** vent kit must be used. If the furnace has a **Z-Flex** appliance adaptor inside (Fig 2.) a **Z-Flex** vent kit must be used.

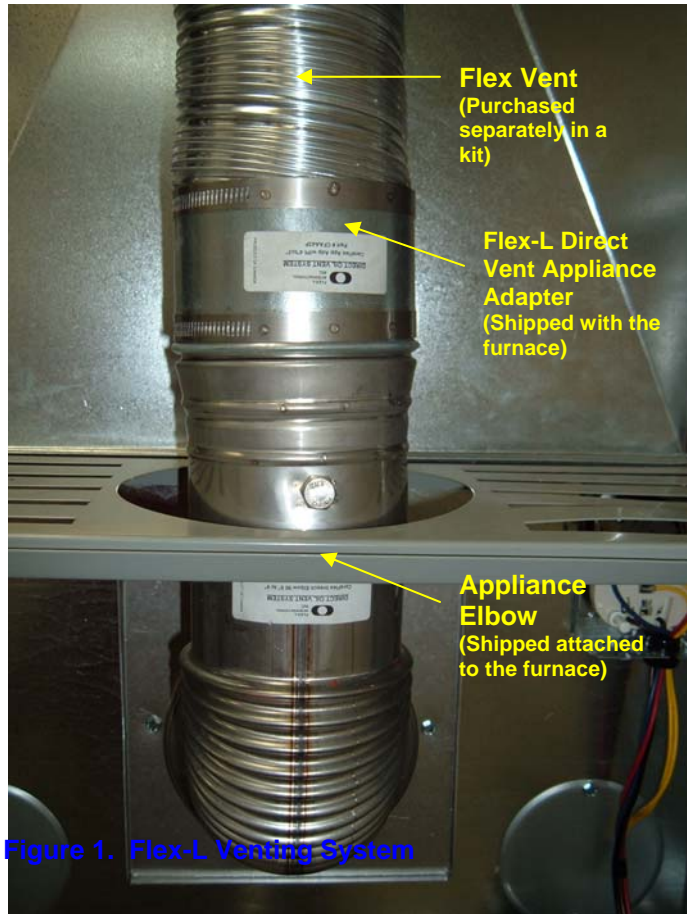

Figure 1. Flex-L Venting System

Figure 2. Z-Flex Appliance Adaptor (shipped with furnace)

**What is the difference between the Flex-L and Z-Flex direct vent kits?**

The **Flex-L** flex vent (Fig 1.) attaches to the appliance adaptor and termination adaptor in a clockwise motion. The **Z-Flex** direct vent appliance adaptor (Fig. 2) and termination adaptor attach in a counter clockwise motion.

**Will the current direct vent termination and vent riser work with both the Flex-L and Z-Flex direct vent kits?**

Yes, the direct vent termination (part# 28972) and Vent Riser Terminal (part#29231) will work with both the **Flex-L** and **Z-Flex** Direct Vent kits.

**How will a customer know which kit should be used with the Direct Vent Oil Furnace in their inventory - Flex-L or Z-Flex?**

The required venting kit part number is listed on the shipping label placed on the packaging of the unit, as well as inside all Direct Vent Oil Furnaces next to the burner. **Direct Vent Oil Furnaces with a Z-Flex appliance adaptor inside will state "FOR USE WITH Z-FLEX DOUBLE WALL INSULATED VENTING" on all labels.** Always refer to these labels before selling or installing a Direct Vent Oil Furnace to ensure the correct venting kit is used.

**Model Numbers**

<b>DIRECT SIDEWALL VENT KITS / TERMINALS</b>			
Part Number Flex-L	Part Number Z-Flex	Description Z-Flex	Contents
28967	240006906	Kit #40LKT310 BML/HML/WML	10' x 3" Flex Vent, Terminal Adaptor & Sealant
