Ceiling Selector

Why use an Armstrong® Ceiling vs drywall?

- Accessibility to pipes, duct work and wiring
- Easier & cleaner installation
- Reduces noise
- Broad selection of visuals
- Easy to change visuals
- Less expensive to install
- Easy to repair and replace damaged or stained panels
- Mold & mildew resistant
- Easier to move light fixtures
- Recycled content

Getting Started

Selecting the right Armstrong ceiling for your home is a breeze.

Just complete the do-it-yourself checklist designed to make sure you walk out of the store with the best product for your ceiling project.

Just check off the type of ceiling you're looking for, the features you want, and the ceiling style you like best. Match up your checkmarks with the Armstrong products that meet your needs.

Step One: Choose your ceiling style

Armstrong offers many decorative options and special features in tile, plank and panel ceilings, so it's up to you to decide which of our attractive ceiling styles is right for you.

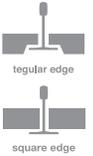

- | | |
|---|------------------------------------|
| <input type="checkbox"/> Traditional | <input type="checkbox"/> Wood Look |
| <input type="checkbox"/> Smooth | <input type="checkbox"/> Tin Look |
| <input type="checkbox"/> Basic/Commercial | <input type="checkbox"/> Modern |

Step Two: Select your ceiling type

- TILES** – Attractive 12" x 12", 16" x 16" or 24" x 48" tiles attach directly to your existing ceiling surface, minimizing loss of ceiling height.
- PLANKS** – Versatile Armstrong ceiling planks also fasten directly to your current ceiling, without the need for any type of grid systems, the planks are available in sizes 6" x 48" and 5" x 84".

- PANELS** – 2' x 2', 2' x 4' panels lay in a suspended grid system below your existing ceiling surface (minimum 3" drop). Suspended panels are an ideal way to lower or level your existing ceiling or make it easy to gain access to fixtures above the ceiling. Panels come in lay-in or regular options.

Suspended panels are also the way to go if you are installing recessed lighting. But, remember, you'll need a little more room – an additional 6" drop below your current ceiling.

Step Three: Select your special features

Armstrong Decorative Ceilings and HomeStyle® Ceilings are carefully designed to meet the do-it-yourself decorative and performance needs of the residential shopper, while our Contractor Ceilings are institutional-style ceilings intended for light commercial use.

While all Armstrong ceilings have some strong characteristics in common, including washability, standard acoustics and fire-retardance, many also have extra features that may be particularly important in your home. (Reference page 23 for specifics)

- MOLD, MILDEW and BACTERIA RESISTANT** – Ceilings are specially treated to inhibit or retard the spread of mold, mildew, odor and stain causing bacteria on the painted surface.
- EXTRA SOUND REDUCTION** – Ceilings further reduce noise within a room (NRC), or traveling from room to room (CAC), by absorbing up to 70 percent of the sounds that strike their surface.
- SAG-RESISTANT** – Ceilings are ideal for areas with high humidity, but not where subjected to standing water.
- LIGHT REFLECTANCE** – Percent of light that strike surface which is reflected; thereby diminishing the number of light fixtures required.
- FIRE PERFORMANCE** – Most all Armstrong ceilings provide a Class A flame spread rating. For applications requiring UL Fire Rated Assemblies, please use our FireGuard™ ceiling and grid items that are specially formulated to provide enhanced resistance against structural failure.

Step Four: Select a color of finish if applicable

Drywall border option
Drill drywall to grid

Cone Head Nails

Cone head nails are available in coordinating finishes to install a 2' x 4' direct nail up ceiling system. Each carton of nails installs 200 square feet of ceiling panels.

Filler Panel 5422235L (24" x 24" Lay-in) and 5424235N (24" x 48" Nail-up)

Filler panels are available in matching finishes. Filler panels are used around the edge of the room when less than full panels are needed.

Metallaire™ Grid Kits

Grid kits are available for 2' x 2' lay-in suspended installation. Colors available to coordinate with all Metallaire finishes. Grid kits cover 64 square feet per carton.

Metallaire™ Cornices

A cornice is the finishing detail that can complement and accentuate the exquisite detail of your Metallaire ceiling. Cornices are available in all 5 finishes (see page 9), 6 patterns and are 48" in length.

Metallaire™ Backsplash or Wall

Metallaire™ can also be creatively integrated into a variety of decorating schemes. It is not only beautiful in detail and form, but functional as well when used as a backsplash or on an entire wall. Backsplash available in 18-1/2" x 48-1/2" stainless steel finish only in five styles. Stainless steel is the best finish for a backsplash. However, standard 24" x 48" panels can also be used in chrome, copper, brass, lacquered steel and white. The lacquered steel panels can be painted and customized to your décor.

Suspended Ceiling Installation Systems

Makes it easy to install any Armstrong® Ceiling Systems

Prelude® Ceiling Suspension System

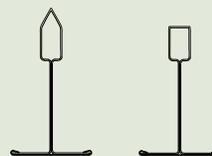

Preferred choice of the professional installer

- Heavy-duty performance (7301); intermediate-duty performance (7300)
- Meets all building codes for non-residential construction
- Easy installation—Choice of stab-in or hook-in cross tees; only 3" clearance required
- XL stab-in or ML hook-in cross tees provide secure lock connection; easy to remove, reuse and relocate
- Rotary stitched during manufacture for additional torsional strength and extra stability during installation
- SuperLock™ main beam clip is engineered for a strong, secure connection and fast, accurate alignment confirmed with audible click; easy to remove/relocate
- Hot-dipped galvanized coating inhibits red rusting better than electrogalvanized or painted systems
- Seismic Rx® Suspension systems save time and money; Armstrong offers an ICC-ES approach to installations (ESR-1308); for stringent seismic specifications use heavy-duty main beams, XL stab-in cross tees, and BERC2 clips
- 10-year limited warranty; 30-year with Armstrong high-performance ceiling panels
- PeakForm® profile increases strength and stability for improved performance during installation
- Fire Guard™ options for UL design fire-rated performance only

271 SAHARA™

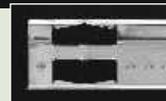

PeakForm® profile increases strength and stability for improved performance during installation

PeakForm® offers superior load-carrying capacity than typical square bulb.

Fire Guard™ options for UL design fire-rated performance only

EXPANSION RELIEF ON FIRE GUARD™ MAIN BEAM

Your ideas become reality®

Suspended Ceiling Installation Kits

Makes it easy to install any Armstrong® HomeStyle® suspended ceiling

Suspended Ceiling Installation Kit

- **All-In-One Kit**
Everything you need to install 64 sq. ft. of panels.
No estimating or guesswork.
- **Convenience**
Easy to take home. Easy to install.
- **Choice**
Kits for 2' x 2' or 2' x 4' panels.
White and Black available.

2' x 2' White Kit Includes:

- 3 – 6' Main Beams
- 9 – 4' Cross Tees
- 9 – 2' Cross Tees
- 3 – 6' Hanger Wires
- 5 – 6' Wall Moldings
- 9 – Hanger Wire Fasteners
- 25– Wall Molding Fasteners

2' x 2' Black Kit Includes:

- 3 – 6' Main Beams
- 9 – 4' Cross Tees
- 9 – 2' Cross Tees
- 3 – 6' Hanger Wires
- 5 – 6' Wall Moldings
- 9 – Hanger Wire Fasteners
- 25– Wall Molding Fasteners

2' x 4' White Kit Includes:

- 3 – 6' Main Beams
- 9 – 4' Cross Tees
- 3 – 6' Hanger Wires
- 5 – 6' Wall Moldings
- 9 – Hanger Wire Fasteners
- 25– Wall Molding Fasteners

Estimating Guide

For suspended ceiling kits

Find room dimensions on left and top rows and read across for correct number of installation kits.

	6'	8'	10'	12'	14'	16'	18'	20'
6'	1	1	1	2	2	2	2	2
8'	1	1	2	2	2	2	2	3
10'	1	2	2	2	3	3	3	4
12'	2	2	2	3	3	3	4	4
14'	2	2	3	3	4	4	4	5
16'	2	2	3	3	4	4	5	5
18'	2	3	3	4	4	5	6	6
20'	2	3	4	4	5	5	6	7

Suspended Ceiling Estimating Guide

For ceiling panels and grid

INSTRUCTIONS: Find room size on left and read across for 2' x 2' or 2' x 4' ceiling panels. As a general rule, use one, two-bulb 4' fluorescent lighting fixture every 75 square feet. Use one luminous panel for every recessed lighting fixture.

Main beams parallel to room's short dimension.

Main beams parallel to room's long dimension.

Installation as easy as 1, 2, 3

Step 1
 Install furring strips 24" on center or less, can also be installed directly to wood joists or over existing drywall using longer screws

Step 2
 Position planks

Step 3
 Install planks with appropriate clips

Answers to Frequently Asked Questions

WHAT ARE ARMSTRONG® CEILINGS MADE OF?

Armstrong® mineral board ceilings are made of inert mineral components, binders and inert filler materials, with up to 55% recycled content. Armstrong also offers high-performance engineered resin and durable laminate plank ceilings, and rigid PVC panels and metal ceilings.

WHAT ABOUT INSULATION VALUE BETWEEN FLOORS?

Most ceilings are installed between floors that are maintained at the same temperature — making insulation unnecessary. Basement recreation rooms are at least partly heated by heat flow through the ceiling from the heated space above. In that case, attempting to insulate the basement ceiling surface could actually reduce heat flow.

CAN I PUT INSULATION ON THE BACK OF ARMSTRONG CEILINGS?

Only Armstrong suspended ceiling panels (2' x 4') that are at least 5/8" thick can be backloaded with additional insulation. Rolled insulation must be used and installed perpendicular to the cross tees so that the weight of the insulation rests on the suspended grid system, and there is an air space between the insulation and the panel.

NOTE: Insulation must never be placed behind fire-rated ceilings, unless designated in a UL design assembly. Backloading fiberglass panels is not recommended.

CAN ARMSTRONG CEILINGS BE PAINTED?

All Armstrong ceiling tiles and panels (except fiberglass) can be painted with latex paints. The front and back of 2' x 2' and 2' x 4' panels should be painted.

Note: Armstrong cannot guarantee that the published surface-burning characteristics, fire-resistance ratings, acoustical performance, dimensional stability/sag, or light reflectance will remain the same after repainting. Field painting will void the warranty.

WILL PAINTING ACOUSTICAL CEILINGS AFFECT ACOUSTIC EFFICIENCY?

Armstrong acoustical ceilings can be painted with a slight loss of acoustical efficiency using nonbridging paint which does not cover the holes.

CAN CEILING TILE BE USED IN THE BATHROOM?

Yes, if the bathroom is vented to the outside with a fan. Armstrong ceilings with extra sag/mold/mildew resistance for use in areas of high humidity are recommended.

SHOULD CEILING MATERIALS ADJUST TO ROOM TEMPERATURE BEFORE INSTALLATION?

Yes. Unpack ceiling materials 24 hours before installation to adjust to normal room conditions. Do not install during excessively humid conditions. See specific product instructions for best results.

CAN THE CEILING BE INSTALLED OVER EMBEDDED RADIANT-HEAT COIL CEILINGS?

No. An appreciable loss of heating efficiency will result and the ceiling will not remain stable.

CAN A HANGING OR SWAG LAMP BE USED WITH AN ARMSTRONG CEILING?

Yes, if supported independently by an existing structural member.

CAN A NEW CEILING BE CEMENTED DIRECTLY OVER OLD CEILING TILES?

It's best to remove old tiles first. In many cases, the old ceiling may have deteriorated and an adequate hold cannot be obtained.

WHAT IS THE MINIMUM OVERHEAD DISTANCE REQUIRED FOR A NEW SUSPENDED CEILING?

Armstrong suspended ceilings require a minimum of 3" (6" if installing recessed lighting) of overhead clearance.

CAN EXISTING LIGHT FIXTURES BE USED WITH A NEW CEILING?

Yes. Armstrong ceilings are adaptable to standard lighting fixtures.

HOW MANY FLUORESCENT LIGHT FIXTURES ARE NEEDED FOR A NEW CEILING?

Standard rule for light fixtures is two 4' fluorescent tubes for every 75 square feet of ceiling area.

WHAT KIND OF FLUORESCENT LAMPS SHOULD BE USED WITH ARMSTRONG CEILINGS?

All lamps must be rapid-start. Warm white and cool white are most efficient, but deluxe and natural-colored lamps provide a more pleasant atmosphere.

WILL THE MINERAL CEILING SAG OVER TIME?

No. Armstrong ceilings are treated with a special back coating to resist moisture. When properly installed under the right conditions (no excessive humidity, etc.), they remain level and flat. We recommend using sag/mold/mildew resistant panels or fiberglass panels in areas of high or seasonal humidity; they are not recommended for spaces exposed to continuous moisture, such as shower rooms and swimming pool areas.

DO ARMSTRONG CEILINGS PROTECT AGAINST THE SPREAD OF FIRE?

All Armstrong panels, tiles and planks are fire-retardant and meet Class A flame-spread ratings, with the exception of WoodHaven® planks, which meet class C flame-spread ratings.

Armstrong® Residential Ceiling Systems – Limited Warranties

WHAT OUR WARRANTIES MEAN

Our warranties are our promise to you that the Armstrong® ceiling and Armstrong installation materials you've purchased will be free from manufacturing defects. Because our products are designed and engineered to be used together for the best performance possible, we warrant that Armstrong ceilings and Armstrong installation materials, if used together, will be free from manufacturing defects as outlined below.

Please read all of the following terms carefully as this warranty may be affected by installation methods and materials used and site conditions. Armstrong does not authorize any person to assume or extend any other warranty obligation or liability on its behalf.

What will Armstrong do?

If a manufacturing defect does occur within the terms and conditions of this warranty, you will be supplied with new material to replace the defective ceiling product, the replacement materials will be of the same or similar design and quality.

What does this warranty not cover?

- Damage that may occur due to Abnormal Conditions described above is not covered by this warranty.
- This warranty does not cover damage caused by improper maintenance, improper installation, or by use contrary to our recommendations, such as use outdoors or on surfaces other than ceilings.
- This warranty does not cover normal wear and tear or shade changes due to exposure to smoke, fumes, leaks, or abuse.
- This warranty does not cover labor charges to replace obvious visual defect in the material at time of installation.
- We exclude and will not pay any consequential or incidental damage, loss or expense other than to the ceiling system itself.
- This warranty is not transferable and applies to the original purchaser only. It does not apply to materials graded second or odd lot.
- This warranty does not cover differences between samples or product photographs and actual product purchased.

Additional Note: Armstrong cannot guarantee that the published surface burning characteristics, fire resistance ratings, acoustical performance, dimensional stability/sag or light reflectance will remain the same after repainting panels. All warranties will be voided by field painting.

How do you get service?

You must notify the retailer who sold you the material, in writing, of any product failure covered by this warranty within 30 days of first observation of failure. If you are unable to contract your retailer, or if you notified your retailer of a defect and have not received satisfaction, please contact us at:

Armstrong World Industries, Inc
Attn: Customer Focus Center
P.O. Box 3001
Lancaster, PA 17604
1-877-Armstrong

How does state law apply?

This warranty gives you specific legal rights and you may also have other rights, which vary from state to state. Some jurisdictions do not allow exclusion or limitation of incidental or consequential damages or other limitations on implied warranties, so the limitation(s) or exclusion(s) in this warranty may not apply to you.

THIS EXPRESS WARRANTY CONSTITUTES THE ENTIRE OBLIGATION OF ARMSTRONG AND THERE ARE NO OTHER WARRANTIES EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY USE OR PURPOSE WHATSOEVER. ARMSTRONG'S LIABILITY IS LIMITED TO THAT SET FORTH BELOW IN THIS WARRANTY. ARMSTRONG IS NOT LIABLE FOR ANY INSTALLATION OR REMOVAL COSTS UNDER THIS WARRANTY. NOR IS RESPONSIBLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OR COSTS UNDER THIS WARRANTY.

Ten Year – Thirty (10/30) Year Limited Warranty for High Performance Ceiling Systems

High Performance Ceiling Products

922 Fine Fissured™ 928 Fine Fissured™ 932 Fine Fissured™ 1728BL Fine Fissured™ Black, 269 Sand Pebble™ 271 Sahara™ 273 Sahara™ 241 SuperTuff™ 403 Espirit® Fiberglass, 404 Pebbled Fiberglass, 410 Sonoflex Random Fiberglass™ 416 Sonoflex Etched Fiberglass, 420 Random Fiberglass, and 954 Classic Fine Textured. This product list is subject to change. Please refer to our website at www.armstrong.com or contact our Customer Focus Center at 1-877-Armstrong for the most current information.

The Armstrong Ceiling products listed above are warranted to be free from defects in materials or factory workmanship for 30 years from the date of installation when installed using an Armstrong Suspension System and used under normal conditions. If these products are not installed using an Armstrong Suspension System the Armstrong Ceiling products listed above are warranted to be free from defects in materials or factory workmanship for 10 years from the date of installation when installed under normal conditions. (Except for obvious defects in materials or factory workmanship, which Armstrong must be notified of within 30 days of the date of installation.)

Armstrong Suspension Systems are warranted to be free from the occurrence of 50% red rust as defined by ASTM D610 test procedures for 30 years from the date of installation, when installed with the Armstrong ceiling panels listed above and in accordance with Armstrong's written installation instructions.

Warranty Conditions

All ceiling products must be installed and maintained in accordance with Armstrong's written installation and maintenance instructions for that product in effect at the time of installation.

This warranty is not transferable and applies to the original purchaser only.

Prior to installation, the ceiling product must be kept clean and dry in an environment that is between 32° F (0°C) and 120°F (49°C) and not subject to Abnormal Conditions. Abnormal Conditions include exposure to chemical fumes, corrosive agents (such as chlorine), vibrations, fire, and water, freezing temperatures, accident or any other form of abuse, or excessive dirt or dust buildup. If subject to Abnormal Conditions, where possible, the products should be removed immediately and replaced once the conditions are normal.

Installation of the products shall be carried out where the temperature is between 32°F (0°C) and 120°F (49°C). It is not necessary for the area to be enclosed and for HVAC systems to be functioning and in continuous operation. All wet work (plastering, concrete, etc.) must be complete and dry, and the products must be protected from the elements such as rain, snow, etc. These systems cannot be used in exterior applications, or where standing water is present due to high humidity, or where moisture will come in direct contact with the ceiling. These temperature and humidity conditions must be met throughout the life of the warranty.

Sag Resistance

The Armstrong Ceiling products listed above have extra sag resistance. They are warranted to be free from defect in materials or factory workmanship or sagging and warping as a result thereof for thirty (30) years from the date of installation, when installed with

Armstrong Suspension Systems; for ten (10) years from date of installation when an Armstrong Suspension System is not used.

Mold and Mildew Resistance

The Armstrong Ceiling products 922 Fine Fissured, 928 Fine Fissured, 932 Fine Fissured, 1728BL Fine Fissured Black, 269 Sand Pebble, 271 Sahara, 273 Sahara, 241 SuperTuff, and 954 Classic Fine Textured have bioblock treatment. They are warranted to be free from the growth of mold, mildew and gram positive and gram negative odor and stain causing bacteria for thirty (30) years from the date of installation, when installed with Armstrong Suspension Systems; for ten (10) years from date of installation when an Armstrong Suspension System is not used.

Armstrong fiberglass ceiling panels listed above do not have bioblock treatment, but are warranted to be free from the growth of mold, mildew, and odor and stain causing bacteria for 30 years from the date of installation, when installed with Armstrong Suspension Systems; for ten (10) years from date of installation when an Armstrong Suspension System is not used, due to the inherent characteristics of the products.

This limited warranty is subject to further conditions listed below.

The ceilings must be maintained to avoid excessive dirt or dust buildup that would provide a medium for microbial growth on ceiling panels. Microbial protection does not extend beyond the treated surface as received from the factory, and does not protect other materials that contact the treated surface such as supported insulation materials. General maintenance guidelines can be found at www.armstrong.com.

The warranty is void if the ceiling product is not installed in accordance with the installation instructions included in every carton, also available at www.armstrong.com

Custom Creations™ Products Limited Warranty – Guaranteed for as long as you own your home!

Armstrong's Custom Creations products are warranted to be free from defects in materials or factory workmanship from the date of installation for as long as you own your home when used under normal conditions. (Except for obvious defects in materials or factory workmanship, which Armstrong must be notified of within 30 days of the date of installation.)

Warranty Conditions

All Custom Creations™ products must be installed and maintained in accordance with Armstrong's written installation instructions in effect at the time of installation. This warranty is not transferable and applies to the original purchaser only.

Prior to installation, the ceiling product must be kept clean and dry in an environment that is between 32° F (0°C) and 120°F (49°C) and not subject to Abnormal Conditions. Abnormal Conditions include exposure to chemical fumes, corrosive agents (such as chlorine), vibrations, fire, and water, freezing temperatures, accident or any other form of abuse, or excessive dirt or dust buildup. If subject to Abnormal Conditions, where possible, the products should be removed immediately and replaced once the conditions are normal.

Installation of the products shall be carried out where the temperature is between 32°F (0°C) and 120°F (49°C). It is not necessary for the area to be enclosed and for HVAC systems to be functioning and in

continuous operation. All wet work (plastering, concrete, etc.) must be complete and dry, and the products must be protected from the elements such as rain, snow, etc. These systems cannot be used in exterior applications. These temperature and humidity conditions must be met throughout the life of the warranty.

Sag Resistance

Armstrong® Custom Creations Ceiling products are sag resistant. They are warranted to be free from defect in materials or factory workmanship or sagging and warping as a result thereof for as long as you own your home.

Mold and Mildew Resistance

Armstrong Custom Creations Ceiling products are warranted to be free from the growth of mold, mildew and gram positive and gram negative odor and stain causing bacteria due to the inherent characteristics of the products for as long as you own your home.

This limited warranty is subject to further conditions listed below.

The warranty is void if the ceiling product is not installed in accordance with the installation instructions included in every carton, and also available at www.armstrong.com

Residential Ceiling Panel Ten (10) Year Limited Warranty

Ceiling Products Covered by this Limited Warranty: 1201 Raised Panel™ 1202 Scalloped, 1203 Fluted, 1205 Single Raised Panel, 1206 Tango, 46 Wellington, 1240 TinTile™ 1244 Circles, 231 Plain White, 250 Pinehurst™ 258 Grenoble™ 480 Country Classic™ Plank, 1132 Baltic™ 1134 Impression® 1693 Sahara™

The Armstrong Ceiling products listed above are warranted to be free from defects in materials or factory workmanship for 10 years from the date of installation when used under normal conditions. (Except for obvious defects in materials or factory workmanship, which Armstrong must be notified of within 30 days of the date of installation.)

Homestyle Ceiling panels are warranted to be free from the growth of mold, mildew, and gram positive and gram negative odor and stain causing bacteria for ten (10) years from the date of installation. Homestyle Ceiling panels contain a mold inhibiting agent that provides broad-spectrum control for the growth of mold and mildew over the warranty period. These ceiling panels also resist the growth of gram positive and gram negative odor and stain causing bacteria. This limited warranty is subject to further conditions listed below.

Warranty Conditions

All ceiling products must be installed and maintained in accordance with Armstrong's written installation instructions for that product in effect at the time of installation. This warranty is not transferable and applies to the original purchaser only.

Prior to installation, the ceiling product must be kept clean and dry in an environment that is between 32° F (0°C) and 86°F (30°C) and not subject to Abnormal Conditions. Abnormal Conditions include exposure to chemical fumes, corrosive agents (such as chlorine), vibrations, fire, and water, freezing temperatures, accident or any other form of abuse, or excessive dirt or dust buildup. If subject to Abnormal Conditions, where possible, the products should be removed immediately and replaced once the conditions are normal.

Installation of the products shall be carried out where the temperature is between 32°F (0°C) and 86°F (30°C). It is necessary for the area to be enclosed and for HVAC systems to be functioning and in continuous operation. All wet work (plastering, concrete, etc.) must be complete and dry, and the products must be protected from the elements such as rain, snow, etc. These temperature and humidity conditions must be met throughout the life of the warranty.

This limited warranty is subject to further conditions listed below.

The warranty is void if the ceiling product is not installed in accordance with the installation instructions included in every carton, also available at www.armstrong.com

WoodHaven® Ceiling Panel Ten (10) Year Limited Warranty

Armstrong's WoodHaven Ceiling products are warranted to be free from defects in materials or factory workmanship for 10 years from the date of installation when used under normal conditions. (Except for obvious defects in materials or factory workmanship, which Armstrong must be notified of within 30 days of the date of installation.)

Warranty Conditions

All WoodHaven products must be installed and maintained in accordance with Armstrong's written installation instructions in effect at the time of installation.

This warranty is not transferable and applies to the original purchaser only.

Prior to installation, the ceiling product must be kept clean and dry in an environment that is between 50° F (10°C) and 86°F (30°C) and not subject to Abnormal Conditions. Abnormal Conditions include exposure to chemical fumes, corrosive agents (such as chlorine), vibrations, fire, and water, freezing temperatures, accident or any other form of abuse, or excessive dirt or dust buildup. If subject to Abnormal Conditions, where possible, the products should be removed immediately and replaced once the conditions are normal.

Installation of the products shall be carried out where the temperature is between 50°F (10°C) and 86°F (30°C) and relative humidity levels maintained between 25%RH and 55% RH. It is necessary for the area to be enclosed and for HVAC systems to be functioning and in continuous operation. All wet work (plastering, concrete, etc.) must be complete and dry, and the products must be protected from the elements such as rain, snow, etc. These temperature and humidity conditions must be met throughout the life of the warranty.

This limited warranty is subject to further conditions listed below.

The warranty is void if the ceiling product is not installed in accordance with the installation instructions included in every carton, also available at www.armstrong.com

Residential Mineral Fiber Ceiling Panel One (1) Year Limited Warranty

Please read all of the following terms carefully as this warranty may be affected by installation methods and materials used and site conditions. Armstrong does not authorize any person to assume or extend any other warranty obligation or liability on its behalf.
