NU-WOOD INTERIORS
for every WALL
and CEILING
A new mode in wall and ceiling finish has taken its place in building and remodeling—giving more for the money—and offering advantages that ordinary materials with their higher costs could never provide. A full line of distinctive, colorful interior finish units stand ready to serve every requirement of permanent decoration, every style of design and furnishing.

Made of clean wood fiber, this new wall and ceiling treatment consists of specially designed and accurately fitting tile, plank and wainscot units, in large, easy-to-handle sheets. A high degree of insulation value is built into these Nu-Wood products. They make rooms easier to heat and more comfortable to live in. They absorb and deaden noises, assuring restful quiet. Nu-Wood Interior Finish is its own decoration—lending charm and character with a color and texture that outshadows even the most expensive paints and papers.

Permanent, easy to clean, and in colors which blend harmoniously with other tones and shades, Nu-Wood’s colors and texture grow more delightful year after year—giving increasing satisfaction and comfort without the cost and nuisance of frequent maintenance.

Nu-Wood’s several shapes make a wide selection of patterns available. All manner of styles can be “matched”—true Colonial, English, and modern interiors are easy to develop.

This book illustrates some actual Nu-Wood interiors. Here are real rooms in homes, churches, schools, theatres, stores, restaurants, and other places. Nu-Wood Interior Finish takes the place of lath, plaster and decoration in new construction—in remodeling it is applied quickly over old plaster. In either case, its cost is sure to be modest. Your architect, contractor and builder know Nu-Wood. Your neighborhood dealer will supply it. See this remarkable product when you build or remodel.
**Tile**
Reproduction of Nu-Wood Bevel-Lap Tile is diamond pattern.

**Plank**
Note texture and variegation of color.
Reproduction of Nu-Wood Bevel-Lap Plank (beaded) in random width.

**Wainscot**

These are the colors of Nu-Wood Interior Finish reproduced as closely as fine printing will allow. Color may be variegated or standardized in shades from Old Ivory to deep Wood-Brown.
Tile

Nu-Wood Tile is usually confined to ceiling use. Recently, however, a growing tendency uses its Diagonal-Square or Herringbone patterns on side walls - particularly when styling of the Empire Period is to be carried out.
5. Nu-Wood units — Tile, Plank and Wainscot — make any room more livable. They take the place of lath and plaster in new rooms — go over old walls quickly in rooms that need freshening.
6. Besides providing unique color and texture — Nu-Wood makes homes more comfortable. It insulates, deadens noise, saves the cost of frequent re-decoration. Nu-Wood units are fire-resistant— permanent.
7.

For Colonial, Empire, English or other periods Nu-Wood has a pattern that will fit harmoniously, characteristically. Nu-Wood Interior Finish Treatment is an economical answer to wall and ceiling finish.
8.

Compare Nu-Wood Interior Finish with other types of wall coverings. Nu-Wood costs less to buy and apply—gives extra advantages. When you build or remodel, Nu-Wood should have a place in your plans.
CLUB ROOMS
are more RESTFUL with Nu-Wood's Attractive Finish

9. For insulation, noise-correcting and for downright good looks, Nu-Wood has advantages that club owners and operators have been quick to see. Nu-Wood is economical finish.
OFFICES need
NU-WOOD'S EFFICIENCY
—Its Quiet, Decorative Beauty

10. The distracting jumble of telephones, typewriters, office machines, conversation and traffic, breaks down office efficiency—reduces the powers of concentration. Noise-quieting is of the greatest importance in offices. Nu-Wood provides a high degree of sound absorption.
Walls and ceilings of private and general offices and reception rooms are easily renewed—made efficient and restful at low cost, with Nu-Wood. Here is complete decoration and efficient noise-quieting for every business.
12. Wherever the troubles of clients and patients are discussed, restful surroundings are prime necessities. Nu-Wood Interior Finish Units are the choice of professional men—for every office need.
13.

Acoustics in many church auditoriums strain the voice and ear—place unnecessary effort on nerves. Nu-Wood Interior Finish Units have solved the problem of acoustics for many churches—both new and existing. Its combination of beauty and efficiency has no economical equal.
14. In Sunday-School rooms, in recreation and dining rooms, in offices and study rooms, noise has no place. Nu-Wood Interior Finish combines the ability to quiet sound and to provide individual distinctive wall and ceiling decoration.
Pastors Say—

"DELIGHTFUL FOR SPEAKER
--UNUSUALLY ATTRACTIVE"

NU-WOOD TILE

15. Ministers, priests and speakers prefer to speak where walls and ceilings are lined with Nu-Wood Interior Finish Units. They say—
"It's easier to talk—because it's easier to hear."
Listeners agree—Nu-Wood makes listening easier.
Educators aim to teach concentration. Quiet class and study rooms play an important part. In Nu-Wood Interior Finish Units, school architects have found a low cost, sound-absorbing material which combines a high degree of noise-quieting efficiency with finished decoration.
When the noises from gymnasium or music room disturb other classes in the same building, educational efficiency is lacking. Nu-Wood Interior Finish Units deaden noise—prevent confusion of thought in study classes.
A QUIET PLACE TO EAT!

18. Eating places of every kind need a restful atmosphere. Nu-Wood Interior Finish radiates the charm of hospitality; assures "a quiet place to eat"; stops the disturbance of clattering dishes, conversation, traffic.
NOISE CHASES PATRONS

19.

Nu-Wood Interior Finish treatment for walls and ceilings of dining rooms, cafes, restaurants, cafeterias, offers a wide variety of attractive textures and patterns—plus a high degree of noise-quieting. Patrons don't like to eat in noisy places—quiet satisfies them.
Quiet is an advantage to every tavern. Here's a way to get really different wall and ceiling treatment. Quiet too. Nu-Wood Interior Finish is as suitable for new taverns as for ones which are to be remodeled. The cost is always low.
21. Individuality in decoration is the aim of every tavern or tap room operator. He recognizes
the need for noise-quelling materials — knows how
not wall and ceiling treatment, and at smaller cost
than many older, more familiar materials. No-
Wood is different, practical and permanent.
Profits are larger in well-kept, attractive stores. Nu-Wood Interior Finish, distinctive wall and ceiling treatment, offers store owners economical decoration, modern display and the privilege of more quiet surroundings. Nu-Wood treatment is one of the first steps to air conditioning—because it adds insulating efficiency to its decorative advantages.
23. Nu-Wood needs no further decoration. Its permanence is its outstanding virtue—its noise-quieting and insulating features, added values. Nu-Wood Interior Finish—for walls, ceilings and display—is a first step to satisfied customers and larger profits.
Theatre owners—building or remodeling—need not take chances with materials which cannot provide sound absorption. Nu-Wood is versatile—in pattern, color and texture. Design is its advantage—it insures "easy to hear" conditions.
25.

In the theatre—
hearing, not seeing, is
believing. Patrons
don't buy your tickets
unless they can see—
and those who come
expect to hear. Nu-
Wood Interior Finish
treatment is a com-
plete wall and ceiling
covering—costs no
more than panels,
looks much better.
PRACTICAL wall and ceiling finish for EVERY kind of STUDIO

26.
Artists acclaim Nu-Wood's color and texture. They call it ideal "background." Because Nu-Wood absorbs sound so well, radio has adopted it for studios everywhere. Here's a real appreciation of Nu-Wood's color, texture, and ability to deaden noise.
27.

Inexpensive, easy to cut, carve, decorate and paint—Nu-Wood is popular for windows and store displays, for temporary as well as permanent decorative partitions—for cut-out figures and letters.
Moldings and Friezes
Made of Nu-Wood to finish off a job—add that extra touch of attractiveness.

Ornaments, Corners and Light Outlets
Carefully selected for design—a variety of shapes offer possibilities of finish heretofore available only in expensive ornamental plaster.

Carving Tool—Examples
Artists frequently prefer to do their own decorating of borders, corners and centers. Often too, their skill will let them obtain interesting results with a carving tool. This is the work of the "Devil-Devil."

Metal Moldings
For true modern interiors, no more practical treatment presents itself than the use of metal moldings with Nu-Wood.
