Power Flow

Heating Oil Energizer

A fuel oil additive which improves combustion efficiency, conserves energy, and reduces fuel oil waste in heating systems.

Each 16-ounce container treats up to 275-gallons of fuel oil.

Cleans strainers, nozzles, pumps and burners, minimizing breakdowns from clogged lines, strainers or nozzles and water-blocked filters. Power Flow in fuel oil is a sludge and water dispersant, which prevents waxing and jelling of oil, and inhibits formation of rust in the tank. Product prevents ice formation and freeze-up of fuel oil line assuring a steady flow of fuel in any kind of weather. Reduces soot formation by increasing burner efficiency.

Power Flow also protects fuel oil during summer storage.

Power Flow™ Heating Oil Energizer

APPROVALS AND LISTINGS
N.Y.F.D. Permit No. 210330.

SPECIFIC USES
Use to improve combustion efficiency, conserve energy, reduce fuel waste and clean strainers, filters, nozzles, pumps, and burners. Emulsifies water from condensation.

SPECIFIC APPLICATIONS*
Use Power Flow in fuel oil systems.

PHYSICAL PROPERTIES
Specific gravity: 0.8
Solubility in water: Negligible
Boiling point: 317° - 388°F
Appearance/color/odor: Light brown color. Hydrocarbon odor.

WARNINGS OR CAUTIONS
• Read all cautions and directions carefully before using this product.
• Keep out of reach of children.
• Harmful or fatal if swallowed. Contains mineral spirits.
• Avoid breathing mist or fumes. Use with adequate ventilation.
• Prolonged exposure to vapors may cause headaches, or dizziness.
• Wash thoroughly after handling.

DIRECTIONS FOR USE
Pour 16-oz. container of Power Flow into oil tank before each oil delivery. For tanks larger than 275 gallons use proportionally more Power Flow.
