Scully Tank Fill Signals
The Original Tank Fill Whistle Alarms

Scully tank fill signals are the original whistle-stops. They whistle when the tank is filling. When the whistle stops, the tank is full. The calibrated whistle stems allow for product expansion and may be cut for flat style tanks. A patented screen keeps the whistle chamber free from pipe scale and bugs. Scully fill alarms stop costly spills and prevent ruptured tanks while improving your delivery efficiency. They are completely reliable and accurate. A one time installation usually outlasts the life of the tank. Models are available for most every type of tank installation.

Twis-Lok® Gauge

Ventalarm® Signal

Ventalarm® Signals
The First and the Finest

• Since 1936! The original Ventalarm tank fill signal is built to last.
• Used for above and below ground tanks.
• Version for a 90° pipe elbow available.

Delivery Efficiency Equipment

Compression Ventalarm® Signals
The Whistle-Stop for Existing Installations
• Installs without removing the existing vent pipe.
• Special leak-proof fitting joins and seals Ventalarm to pipe.
• No threading or additional fittings required.

Tank Opening	Vent Pipe	Model #	Part #
1"	1"	VS 224	00205

Gasket Kit	2"	VS 275	10328

Note: Compression Ventalarm Signals are not for use in underground tanks.

Remote Ventalarm® Signals
Whistle-Stop for Vents Distant from Fill Pipe
• Whistle-Stop installs near fill pipe.
• Uses a special intrusion stem and weighted vent cap.
• Large tank versions available for heavy oils.
• Weighted vent cap needed to maintain proper air flow through whistle.

Remote Ventalarm Signals

Tank Opening	Vent Cap	Model #	Part #
1 1/4"	1 1/4"	VS 921	00219
1 1/4"	2"	VS 924	00221
*Special	1 1/4"	VS 926	00223

*Fits into hole drilled into tank when no opening is available.
Remote signals require 3/8" copper tubing to connect to whistle - not supplied by Scully.

Golden Gallon Gauges® *(formally known as UNI-GUAGE)*

Double Float Tank Gauge for Indoor, Outdoor and Buried Tanks

- Kevlar string for smoother operation.
- Unique polypropylene double float design.
- Measurement readings available in gallons or inches.
- Large numbered, easy-to-read window has an anti-fogging vapor barrier.
- Most accurate gauge of its kind.
- Installs easily in 11/2" and 2" openings.
- Accommodates tank depths to 108".
- Used in a variety of liquid products.
- Perfect for will call accounts.
- The standard in lube oil and waste oil tanks.

Note: NOT FOR USE IN GASOLINE!

*Extensions are for cement, double wall, vaulted tanks.

Note: Consult Scully for additional gallon & inch reading models. Some Golden Gallon Gauges are available in liters and/or centimeters, please consult Scully. Extension length is the height from bottom of gauge to top of tank. Inch reading gauges available in 2" increments from 12" to 108". Consult Scully for part numbers. Not intended for use as an overfill prevention device. Gauge is calibrated at the factory and should not be recalibrated in the field. Do not install prior to tank shipment. Remove gauge prior to shipment with tote tanks.

Scully Tank Equipment

Ventalarm® Gauges
The Original Combination Whistle Alarm and Level Indicator
• Combination fill alarm and level indicator saves installation costs.
• Protects against spills.
• Durable construction known to outlast the competition and life of the tank.

Scully Tank Equipment

Snorkel® Gauges
**The Level Indicators with
a Floating Burner Feed Line**

- Takes clean, dry fuel from 1" below the surface.
- Ends ice and sludge clogged fuel lines.
- Provides a return line opening.
- Ideal for low burner firing rates.
- Two piece assembly makes installation easier.
- One unit fits both 11/2" and 2" tank openings.

Portable Water Detector & Level Sensor
For Fast and Accurate Water Presence and Level Detection

The Scully Water Detector is the perfect unit to keep on hand when checking water levels in fuel tanks.
It is lightweight and portable with a sensor head small enough to fit into most tank openings.
Aside from above and below ground tanks, the water detector is used in boat tanks and bilges,
underground wiring tunnels and more.

- Can be used in gasolines, jet fuels, fuel oils #1- 4, lube oils, diesel and ethanol gasoline blends.
- Approved by CSA as intrinsically safe for use in hazardous locations.
- Sounds an audible alarm when it touches water.
- Eliminates the need for a paste stick.
- Lightweight and battery operated.
- As easy to use as a drop line.
- 7/8" probe diameter.
- Zinc alloy housing.
- PVC cable jacket.
- Brass sensor.
- 3 lbs.

ALL-WEATHER CAP This cap fits the top of all Scully straight and 45° adaptors and features a new heavy weight design. No gasket is necessary.	UF-21	Fits All Scully Straight and 45° Adaptors	04316
FLUSH INSERT CAP This cap is designed for use with the flush insert adaptor and acts as an effective watershed. It is ideal for use in areas where flush characteristics are important. Because of its use in sunken fill boxes, this cap is supplied with a special, non-swelling gasket.	UF-22	2" NY	04317

Scully Unifil® Equipment

Description	Model #	Size	Part #
INSERT WRENCH This may be used at installations where the sunken fill box does not permit use of the flush insert connector for tightening or loosening the flush insert cap.	UF-327	-	04360
HEX DRIVER One side of the hex driver is used to install all standard adaptors by inserting the adaptor and turning against the internal lugs. The other side is used for installation of flush insert adaptors and installing nozzle connector.	UF-309	-	04355
FLUSH BOX COVER This vertical decorative cover mounts on the house siding to hide the fill pipe. Louvres are built to provide venting and shelter from rain.	UF-339	1 1/2"	04362
FLUSH INSERT ADAPTOR It is used with sidewalk or other flush fills and designed to insert into the existing fill box. It can be adapted to worn pipe threads by using one of three sizes: standard (S, coded blue), large (L, coded green) and extra-large (XL, coded red).	UF-10S UF-10L UF-XL	2" S-NY 2" L-NY 2" XL-NY	04303 04301 04304
FLUSH INSERT CONNECTOR AND WRENCH Used only when making a tight connection to the Unifil flush insert adaptor. It turns quickly into the flush insert adaptor, then the nozzle connector is rapidly attached to the nozzle. The projections on the side act as a wrench to tighten or loosen the flush insert cap.	UF-306	-	04358
