1.1 Key to symbols

Warnings

The following keywords are defined and used in this document:

- **NOTICE** indicates a situation that could result in damage to property or equipment.
- **CAUTION** indicates a situation that could result in minor to medium injury.
- **WARNING** indicates a situation that could result in severe injury or death.
- **DANGER** indicates a situation that will result in severe injury or death.

Important information

This symbol indicates important information where there is no risk to people or property.

1.2 Safety Information

If you smell gas

A gas leak could potentially cause an explosion. If you smell gas, observe the following rules.

- Avoid producing flames or sparks:
  - Do not smoke, do not use a lighter or strike matches.
  - Do not operate any electrical switches or unplug any equipment.
  - Do not use the telephone or ring doorbells.
  - Turn off the gas supply at the main shut-off valve or at the gas meter.
  - Open windows and doors.
  - Warn your neighbours and leave the building.
  - Prevent anyone from entering the building.
  - Stay well away from the building: call the emergency services and the gas supplier.

If you notice dark combustion gases or sooting:

- Isolate the gas supply to the heater.
- Notify an authorised technician.

Installation, assembly, and modifications

Installation, assembly, and modifications to the heater must only be performed by an authorised technician.

Maintenance

- The water heater is required to have a service and safety inspection every two years.
- The installer is responsible for the safety and environmental compatibility of the installation.
- The owner/user is responsible for keeping the area around the water heater free from debris.
- Safe access to inspect and service the water heater is the responsibility of the property owner.
- Use only genuine Bosch spare parts.

Explosive and flammable material

- Do not store or use flammable material (paper, spray cans, solvents, paints, etc) near the heater.

Combustion air and surrounding air

- The combustion air and surrounding air must be free from corrosive substances.
- Do not spray aerosols or use chemicals around the heater unless heater is disconnected from the power supply.

Risk of damage due to user error

User errors can result in injury and damage to property.

- Ensure that children never play with or operate this appliance.
- Ensure that only personnel who can operate this appliance correctly have access to it.
- Refer to the operating and user instructions before adjusting the water heater.

To be installed and serviced only by an authorised person

The authorised installer is responsible for:

- Correct installation and commissioning of this appliance.
- Ensuring the appliance performs to the specifications stated on the rating label.
2 Product details

2.1 EC Declaration of Conformity
The appliance has been tested and certified to Australian Standards.

Table 3

[GWH] Gas continuous flow water heater
[12] Capacity (l/min)
[1] Generation
[CT] Thermostatic
[D] Digital user interface
[E] Electric ignition
[23] Appliance set for natural gas
[31] Appliance set for Universal LP gas
[F5] Tight chamber
[L] Locked water temperature adjustment
2.3 Included Items
- Gas continuous flow water heater
- Fixing bracket
- Appliance documentation

2.4 Rating plate
The rating plate is located on the outside of the appliance, on the bottom.
The rating plate specifies the performance of the appliance, approval and serial numbers.

2.5 Description of appliance
- Room sealed wall-mounted appliance for internal installation.
- Multifunctional display panel
- Suitable for Natural Gas or Universal LPG
- Electronic ignition
- Water flow sensor
- Water valve
- Temperature sensors for monitoring the temperature of the incoming and outgoing water of the appliance.
  - Safety devices:
    - Flame sensor rod
    - Thermal fuse
    - Hot water temperature sensor
    - Electronic control unit
    - Air temperature sensor
- Electrical connection: 230 V, 50 Hz
- Frost protection device.

2.6 Accessory
- Flue accessories
- Remote control (optional).

[5] Temperature decrease button

3.2 Before first use of the appliance

CAUTION:
- The initial start-up of the water heater must be done by an authorised installer who will hand the customer the operating instructions.

- Check that the type of gas indicated on the rating plate is the same as the gas to which the appliance is connected.
- Plug in the appliance to the electrical socket and switch on.
- Open the gas isolation valve of the installation.
- Open the water isolation valve of the installation.

3.3 Switching the appliance on/off

Switching on the appliance

By default, the heating temperature of the water is:
- 55°C preset appliances: 55°C
- 50°C compliant appliances: 50°C

▸ Press the button 🔄. The screen cover shows the selected water temperature.

Switching the appliance off

▸ Press the button 🔄.

3.4 Temperature control

The temperature indicated on the LCD display matches the pre-selected temperature.

▸ Press the buttons ⊕ or ⊖ until you reach the desired temperature.
By selecting the temperature and only turning on the hot tap, energy and water consumption can be reduced.

### 3.5 Programming button

#### Setting the water temperature

![Fig. 5](image)

▶ Press the buttons + or - to select the desired temperature.

▶ Press the P button for 3 seconds to set the temperature.

When the display stops flashing, the temperature is set in the memory.

#### Selecting the preset temperature

To select the preset temperature.

▶ Press the P button for 1 second.

The display will show the preset temperature and will supply water at that temperature.

### 3.6 Draining the appliance

**CAUTION:**
The temperature indication on the display is approximate, always confirm with your hand before bathing children or old people.

If draining the appliance is required, the following process should be followed:

▶ Shut off the cold water isolation valve on the cold water inlet off the appliance.

▶ Open a hot water tap.

▶ Remove the connection to the cold water pipe.

▶ Empty all the water contained inside the appliance.

### 3.7 Error codes

See table 4 on page 9.

#### Resetting the appliance

Some error codes may be solved by resetting the appliance:

▶ Press the button P for 3 seconds.

### 3.8 Cleaning the front of the appliance

▶ Only clean the front of the appliance with a cloth and detergent with water.

**NOTICE:**
Do not use corrosive and/or abrasive detergents.

### 4 Maintenance (only by authorised service technicians)

To guarantee that the consumption of gas and the emission of exhaust gas are maintained at the best values, we recommend that the appliance be inspected every two years and if necessary, maintenance works be carried out.

**NOTICE:**
Maintenance must only be performed by an authorised service technician.

▶ Your appliance should only be attended to by a Bosch service agent. Call for service contract details: AU 1300 30 70 37, NZ 0800 54 33 52.
5 Troubleshooting

Fitting, maintenance and repair must only be carried out by authorised technicians. The following table describes the possible solutions.

<table>
<thead>
<tr>
<th>Display</th>
<th>Description</th>
<th>Possible solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>A0</td>
<td>Cold and hot water temperature sensor damaged.</td>
<td>▶ Check temperature sensor and associated connections. ▶ If the problem persists, call an authorised service technician.</td>
</tr>
<tr>
<td>A1</td>
<td>Temperature inside the water heater housing is high (heat exchanger calcified or sooted).</td>
<td>▶ The appliance automatically regulates its performance to avoid overheating. ▶ If the problem persists, call an authorised service technician.</td>

|         | With indication, but without existence of solar thermal system. The temperature selected is lower than the minimum power that the appliance supplies. | ▶ Increase the hot water flow.  
▶ Or  
▶ Select a higher temperature.  
▶ If the problem persists:  
▶ Call an authorised service technician. |
|         | With indication and water temperature low. High incoming water temperatures, or low flow rate can create this occurrence. | |
|         | Appliance is making a resonance noise (vibration). | ▶ Call an authorised service technician. |

*Table 4*
Note: breakdowns diagnosed by the water heater through an indication in the LCD panel result in the blocking of the appliance for safety reasons. Once the problem is solved, you have to press the on/off button for > 3 seconds to restart the appliance.
To locate your nearest service agent, call: AU 1300 30 70 37, NZ 0800 54 33 52.

6 Environmental considerations

Environmental protection is a fundamental corporate strategy of the Bosch Group.
The quality of our products, their efficiency and environmental safety are all of equal importance to us and all environmental protection legislation and regulations are strictly observed.
We use the best possible technology and materials for protecting the environment taking into account of economic considerations.

Packaging
We participate in the recycling programmes of the countries in which our products are sold to ensure optimum recycling.
All of our packaging materials are environmentally friendly and can be recycled.

Used appliances
Used appliances contain valuable materials that should be recycled.
The various assemblies can be easily dismantled and synthetic materials are marked accordingly. Assemblies can therefore be sorted by composition and passed on for recycling or disposal.
7 Water quality

All Bosch water heating appliances are constructed from high quality materials and components and all are certified for compliance with relevant parts of Australian and New Zealand gas, electrical and water standards.

Whilst Bosch water heaters are warranted against defects, the warranty is conditional upon correct installation and use, in accordance with detailed instructions provided with the heater. In the case of the water supplied to the heater, it is important that the water quality be of an acceptable standard.

The water quality limits/parameters listed in water quality table are considered acceptable and generally, Australian and New Zealand suburban water supplies fall within these limits/parameters.

In areas of Australia and New Zealand where water may be supplied, either fully or partly, from bores, artesian wells or similar, one or more of the important limits may well be exceeded and the heater could, therefore, be at risk of failure.

Where uncertainty exists concerning water quality, intending appliance users should seek a water analysis from the water supplying authority and in cases where it is established that the water supply does not meet the quality requirements of the water quality table, the Bosch warranty would not apply.

8 Warranty details

Robert Bosch (Australia) Pty Ltd
(Bosch) Manufacturer's Warranty
(Applicable for purchases from 1 January 2012)
All Bosch hot water units are carefully checked, tested and subject to stringent quality controls.

1. Warranty
Bosch offers, at its option, to repair or exchange this Bosch hot water unit or the relevant part listed in clause 2 below at no charge, if it becomes faulty or defective in manufacture or materials during the warranty period also stated in clause 2. This warranty is offered in addition to any other rights or remedies held by a consumer at law.

2. Warranty periods & coverage
(a) Domestic applications: 3 years (parts and labour)
(b) Heat exchangers used in domestic applications: 12 years (parts only)
(c) Commercial applications: 12 months (parts and labour)
(d) Heat exchangers used in commercial applications: 12 months (part and labour)

All warranty periods commence on the date of purchase of the hot water unit by the end-user. However, where the date of purchase by the end-user is more than 24 months after the date of manufacture, all warranty periods will automatically commence 24 months after the date of manufacture.

3. Warranty exclusions
This warranty is VOID if any damage to or failure of the hot water unit is caused wholly or partly by:
(a) faulty installation
(b) neglect, misuse, accidental or non-accidental damage, failure to follow instructions
(c) use of the unit for purposes other than which it was designed or approved
(d) unauthorised repairs or alterations to the unit without Bosch's consent
(e) use of unauthorised parts and accessories without Bosch's consent
(f) use of non-potable water or bore water in the hot water unit (see product instructions for further details)
(g) continued use after a fault becomes known or apparent.

This warranty DOES NOT include:
(a) costs of consumables or accessories
(b) wear and tear, normal or scheduled maintenance
(c) to the extent permitted by law, any damage to property, personal injury, direct or indirect loss, consequential losses or other expenses
(d) changes in the condition or operational qualities of the hot water unit due to incorrect storage or mounting or due to climatic, environmental or other influences.

NOTE: Any service call costs incurred by the owner or user of the hot water unit for any matter not covered by the terms of this warranty will not be reimbursed by Bosch, even if those costs are incurred during the warranty period. If the hot water unit is located outside the usual operating area of a Bosch service agent, the agent's travel, freight or similar costs are not covered by this warranty and must be paid by the owner or user of the hot water unit.

4. Warranty conditions
(a) Proof of purchase may be required.
(b) The hot water unit must be installed by an authorised and licensed installer.
(c) Proof may be required of the date of installation and correct commissioning of the hot water unit has been carried out to Bosch's satisfaction (such as a certificate of compliance).
(d) Repair or replacement of the hot water unit or any parts under this warranty does not lengthen or renew the warranty period.
(e) This warranty is not transferable and is only offered to the original purchaser of the hot water unit.
(f) No employee or agent of Bosch is authorised to amend the terms of this warranty.
(g) This warranty only applies to Bosch hot water units purchased from an authorised reseller and installed in Australia or New Zealand.
(g) To the extent that any condition or warranty implied by law is excludable, such condition or warranty is excluded.

5. How to lodge a warranty claim and warranty procedure
(a) Warranty claims must be made with the Bosch Customer Contact Centre (Australia: ph 1300 307 037; New Zealand: ph 0800 543 352). Please be ready to provide the model and serial numbers, date of installation, purchase details and a full description of the problem. Warranty claims must be made before the end of the warranty period.
(b) All warranty service calls must conducted by an authorised Bosch service agent.
(c) Invoices for attendance and repair of a hot water unit by third parties not authorised by Bosch will not be accepted for payment by Bosch.

6. Privacy Act 1988 (Cth)
A customer's personal information collected during warranty claims may be used for the provision of customer support, for the provision of information about products and services and for other marketing activities undertaken by Bosch and its Bosch Service Agents who are authorised to carry out warranty repairs on behalf of Bosch (Purpose). Bosch is committed to protecting the privacy of its customers' personal information. It will act in compliance with the National Privacy Principles and
Privacy Act 1988 (Cth). Bosch will not forward customers' personal information to third parties other than for the Purpose. A customer can object at any time to the use of their personal information for the Purpose. Bosch will cease to use a customer's personal information accordingly if an objection is made.

7. Bosch contact details
If you have any questions about this warranty or to lodge a warranty claim, please contact:

Robert Bosch (Australia) Pty Ltd
1555 Centre Road, Clayton, Victoria 3168
Tel: Australia: 1300 307 037
Tel: New Zealand: 0800 543 352

IMPORTANT NOTE FOR AUSTRALIAN CONSUMERS
Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
Notes
