BUILDING MATERIALS

MONTGOMERY WARD

NEW WAYS TO BRING COMFORT AND CHARM TO YOUR HOME

see how little all of them cost

GO THROUGH this interesting book right now! See the wonderful improvements it suggests for your home . . . a new entrance door . . . an inviting stairway . . . French windows . . . every room sparkling with the gayety and charm of color . . . even the heating plant wearing a festive red jacket. Get out your pencils—start planning now—see what big things you can do for a little money.

As you turn the pages be sure to see our free planning service and the liberal terms of easy payments that make it so easy to do the things you want to do . . . *right now!*

. . . Colonial Stairway

This stairway is typical of the lovely ones you see in old New England homes. Notice its slender newel posts, well turned balusters and graceful hand rail. Everything to duplicate this stairway in your own home is shown on Pages 80-81.

. . . Distinction

The rounded top, hammered-pattern hardware and many-paned light give friendliness to this entrance door. See it on Page 56.

. . . Colonial

Corner cupboards have a charm all their own. This one provides a place for your finest china and has storage space besides. See Page 84.

. . . Breakfast

. . . in this sunny alcove will start your day off exactly right. Easy to build! See Page 83.

. . . See Yourself

. . . full length in this long plate glass mirror! It's a simple matter to put one in any door. Read about it on Page 62.

. . . Modern Heating

Behind its smart red enamel jacket this boiler gives you the latest improvements in hot water or steam boiler design. See it on Pages 48 and 50.

. . . Plenty of Hot Water

. . . at any hour of the day or night, with this modern automatic gas water heater. See how inexpensively you can install this convenience in your home—Pages 32, 33 and 34.

The Charm of French Doors

Use them between adjoining rooms or to open onto porch or terrace. An inexpensive way to add interest and beauty to any room. See them on Page 64.

. . . The Modern Kitchen

. . . includes plenty of built-in cupboards and a shiny porcelain sink. See Pages 82, 83, 18 and 19. The radiator goes under the sink to save space. Page 53.

. . . Copper Radiation

Here's the very newest thing in radiators. They may be set into the wall or cleverly concealed under a window. Read about them on Page 52.

TRANSPORTATION COSTS ARE LOW

Wherever you live—whatever you buy—Wards serve you easily, quickly and economically. We carry large stocks in warehouses in all parts of the country and always ship from the point nearest you. You select from our

convenient catalog what you need in equipment and materials, make out an order and mail it. Wards do the rest and you receive your supplies promptly and at the lowest costs.

HOW TO ORDER FROM THIS CATALOG

Use our regular order blank or any plain piece of paper. Be sure to give the numbers as listed in the catalog, also sizes and amounts required. In giving dimensions always give widths before lengths.

How to Send Money. Send remittance in the form of postoffice or express money order, bank draft, or personal check. If you send money, be sure to send it by registered mail, securely folded in heavy paper. If you live on a rural route, you can pay the money to your mail carrier. He will buy the money order and enclose it with your letter. Regular terms are cash with order, unless you take advantage of our Budget Plan. . . See Page 3.

Sizes and Grades given in this book have been adopted by the Manufacturers' Associations as the official standards.

C.O.D. Shipments: On orders of \$50.00 or more we will accept a remittance of one-fourth cash, balance C.O.D. We do not recommend this, as it means a little delay

and a little extra expense to you. Be sure to arrange to take care of balance when shipment arrives, and tell us the name of bank through which you desire collection to be made.

Bank Guarantee: We will also ship orders of \$50.00 or more on receipt of a letter from your bank stating that the money will be paid within five days of receipt of shipment.

Building and Loan Associations usually require a certain amount of construction work to be done before paying over any money to the builder. Write us for information and tell us just what your problem is.

Freight charges amount to little. Each item is packed so as to take the lowest classification. The weight of each item is given in the description, and at left you will find a schedule of freight rates showing the Estimated Freight Charges per 100 lbs.

Write us for shipping instructions before returning merchandise.

HOW TO FIGURE FREIGHT CHARGES

It is most economical to ship by freight, especially if your order amounts to 50 lbs. or more. Most railroads make a minimum charge for shipments up to 100 lbs. Over 100 lbs. the charge is based on actual weight only. In most cases the lowest freight charge will be 50c.

EXAMPLE: Suppose you live about 200 miles from the shipping point and order a Pumping Plant weighing 250 lbs. By referring to the table below you will find the charge per 100 lbs. on a Pumping Plant is 71c. Multiply 71c by 2½ and you get \$1.78, the approximate charge.

We pack all goods to assure the lowest possible freight charge and the safe delivery of your order. These charges are based on rates in effect at time this catalog was printed and are subject to change without notice.

HOW TO FIGURE PARCEL POST RATES

Packages weighing 8 ounces or less may be mailed anywhere in the U. S. at these rates:

2 ounces or less	3 or 4 ounces	5 or 6 ounces	7 or 8 ounces
1½c	3c	4½c	6c

Packages weighing more than 8 ounces go according to the pound rates to your Zone, as shown in table below. The Post Office counts any part of a pound as a full pound.

EXAMPLE: 3 lbs. 8 oz. counts as 4 lbs.

Shipping Weight	Local Zone	Zones 1 & 2 Not Over 150 Miles	Zone 3 151 to 300 Miles	Zone 4 301 to 600 Miles	Zone 5 601 to 1000 Miles
1 Lb.	7c	8c	9c	10c	11c
2 Lbs.	8c	10c	11c	14c	17c
3 Lbs.	8c	11c	13c	17c	22c
4 Lbs.	9c	12c	15c	21c	27c
5 Lbs.	9c	13c	17c	24c	33c
7 Lbs.	10c	15c	21c	31c	43c
10 Lbs.	12c	18c	27c	42c	59c
15 Lbs.	14c	24c	37c	59c	86c
20 Lbs.	17c	29c	47c	77c	\$1.12
25 Lbs.	19c	35c	57c	94c	1.39

Packages weighing not more than 70 lbs. and measuring not more than 100 inches (length plus girth at widest point, combined) may be mailed to all Zones.

IMPORTANT! We do not prepay postage on any merchandise in this book. If the article is mailable and you wish it sent by Parcel Post, include the necessary amount of postage with your order. If you send more postage than is necessary, the difference will be refunded to you. For postage rates over 25 lbs. see Wards General Catalog.

HOW TO FIGURE EXPRESS CHARGES

For quick delivery of an unavailable order, have it shipped by express. You can estimate charges easily from the table below.

EXAMPLE: Suppose your order weighs 20 lbs. and you live 200 miles from shipping point. Look down 300 Miles column for the 20 Pounds line. 77c is the amount.

For Distances of	50 Miles	150 Miles	300 Miles	500 Miles	750 Miles
Package Not Over					
5 pounds	39c	41c	45c	48c	52c
10 pounds	43c	48c	56c	62c	69c
15 pounds	47c	54c	66c	75c	86c
20 pounds	51c	61c	77c	89c	\$1.03
25 pounds	55c	67c	87c	\$1.02	1.20
35 pounds	63c	80c	\$1.08	1.29	1.54
45 pounds	71c	93c	1.29	1.56	1.88
55 pounds	79c	\$1.06	1.50	1.83	2.22
75 pounds	95c	1.32	1.92	2.41	2.90
95 pounds	\$1.11	1.58	2.34	2.96	3.58
100 lbs. and over, rate per 100 lbs.	1.15	1.65	2.45	3.05	3.75

Modernize Now- Pay Later

Make Your N. H. A. Loan Go Farther Wards Save You 15 to 35% on Your Building Materials

These are actual prices now being asked—Wards prices and those usually asked—for standard quality building materials.

1—A complete hot water heating plant, including boiler, radiators, all pipes and fittings. Wards price is as low as \$195. Usually sells for \$235. A clear saving of \$40.

2—All materials needed to turn an average size (6 by 10 ft.) open porch into a cozy sunroom. Wards price, \$30. These same materials usually cost from \$35.00 to \$40.00.

3—A complete new slate surface asphalt roof. At Wards, \$27.75. The price usually asked, \$37.50.

Think what savings like THAT amount to! It gives your National Housing Act Loan at least one-third more purchasing power. Or, better still, enables you to make a much smaller loan—a big saving both on principal and interest.

Wards Engineers Will Help You Plan

We will gladly send you full information about the new National Housing Act Home Modernization Plan if you have not already received Wards explanatory folder on the NHA. We will help you to determine the cost of the materials you need.

Write us before you go forward with your plans. Our engineers, all men of skill and experience, will give you sound, practical advice as to the improvements to make, and the materials to select. When your plans are complete we will give you an estimate of cost—without charge and without obligation.

Ask for our **FREE** information folder on the National Housing Act.

Wards Price Saves You \$15.00 on this Complete Bathroom Outfit

This Big Kitchen Unit Costs \$20.00 Less Than Is Usually Asked

A Clear Saving of \$40 on This Heating Plant

450.01 to 500.00	50.00	28.00	44.00

Commodity prices are on the upturn. Labor costs are starting to climb back to old levels. If you are *Ever* going to have the improvements you want for your home—the sunporch, bathroom, furnace or new roof, **NOW** is the time to make them. And Wards convenient Budget Plan for buying makes it possible on the soundest kind of basis. You buy at today's low prices. You pay out of the income of more prosperous times ahead.

Home Improvement Is Wise Investment

We extend this buying convenience on all orders of \$20 or over. You may include items from our other special books or Wards General Catalog. On a \$20 order, the down payment is as low as \$3 and monthly payment as low as \$4 as shown in the table at the left. And you have your improvements—your sunporch, central heat, running water, extra bedroom or weather-tight roof, to use and enjoy while you pay.

Prices in this book are cash prices, reflecting the consistent savings Mail Order selling makes possible. Even at the Budget Plan prices, you'll find Wards are still well under the CASH prices usually asked.

Surprisingly little, isn't it. Yet this is a complete installation for an average 5-room farm home. With city water and sewer available, your new bathroom will cost you even less. You will find Wards price lower—lots lower than usually asked for quality equipment like this. Because we do such a huge business, economically by mail, we can give you the very best quality it is possible to produce at prices so low that they should be all you need to clinch your decision to have your home modernized without another month's delay.

Wards Plumbing Ware Is Certified First Quality

We offer bathroom fittings in a wide range of smart new designs and colors—but we offer them in just ONE Quality—the BEST that can be produced commercially. All our enamel and vitreous chinaware bears this seal of "First Quality." It is the symbol used by manufacturers throughout the industry for their first quality products—and is your assurance that you have purchased strictly *first quality*.

This seal certifies that product is "First Quality" as specified by the Sanitary Enamelware Manufacturers Association in accordance with recommendations of the U. S. Bureau of Standards.

We maintain this same standard of excellence in every detail of every bathtub, lavatory, closet and sink. All fittings, faucets, supply and waste pipes are the latest, most up-to-date type, made of heavy brass, finished with a heavy plating of long service chromium.

There is no need to sacrifice quality in the interests of economy when you buy at Wards. If you wish to spend a little less for your bathroom fittings, select our simpler designs. Choose white instead of colors; a tub on legs instead of the built-in style; a lavatory on brackets instead of the pedestal type. The difference in price is wholly a matter of design—not of quality. No matter how little you expect to spend, you are assured of *first quality* when you buy from Wards.

LETTERS LIKE THESE

We are more than pleased with the bathroom outfit received from you. Material and appearance are much better than we expected. Everything reached us in record time and fine condition. I would strongly advise any home owner who wants quality in bathroom outfits to send to Wards; it will save him money, as we got this outfit for about half what it would have cost locally.

George W. Baker,
Spearfish, South Dakota.

I am very much pleased with the bathroom outfit in every way, and it was a considerable saving in cost.

We have had so many favorable comments on its appearance. The plumber who installed it for us told me he could not purchase an outfit to equal it wholesale for less than we paid.

C. F. Stratton,
Oxford, New York.

ENGINEERING SERVICE

Plumbing at Lowest Cost...

Wards Engineering Department, a staff of keen, well trained men, is at your service, ready to give you any help you require in planning or installing your plumbing. If you wish to know costs, they will give you a **FREE** estimate. If your installation offers some special problems, they will make you a complete plan when we receive your order. If you wish to do the work yourself, they will provide you with the necessary instructions. **YOUR** job is handled by a man personally interested in **YOU**, who makes it his business to give you the type of help that will insure a most satisfactory job—at the lowest possible cost. Information Blank shown at right.

Information Blank Shown at Right Brings You a Complete **FREE** Estimate

You will want to know costs before you really go forward with your plans. Simply fill in the Plumbing Information Form No. 12862. It gives us, quickly and accurately, the facts we need to quote you prices on all the materials you will require. Fill it in carefully, answering each question fully; make measurements accurately. Your care now will insure your satisfaction later.

These **FREE** Blue Prints Will Be Prepared for You by Skilled Engineers

Our customers tell us they save 20 to 40 per cent of the cost of their improvement by doing the work themselves. Whenever needed, we will send with your order a complete set of blue prints showing every step in the installation of the plumbing for your home. They are clear, accurate and tailor-made for your own job. Even though you hire the work done, these blue prints will save you money. They enable you to employ any good, reliable workman. Or, if you turn the job over to a plumber, you have saved him time—and yourself money—by providing him with these working drawings.

And These **FREE** Instructions Make Every Installation Step Easy

Simple, clear, concise, with lots of pictures, these instructions take you step by step. You will find them all the help you need for doing a clean, workmanlike job, according to latest, most approved plumbing practice.

Just as Wards low prices save you money on your plumbing fixtures, Wards Free Engineering service will save you money on every step in installation.

ARE RECEIVED EVERY DAY

We certainly are well pleased with the bathroom outfit purchased from you. It reached us in good order and we had no trouble in putting it in—we simply followed your directions. We were very agreeably surprised at the sturdy durability and fine appearance, and it cost us lots less than it would have had we bought it locally.

E. W. EBRITE
Gainesville, Mo.

We are all very much pleased with the quality and appearance of our bathroom pieces. They are just as sturdy and durable as you represented, if not more so. The same outfit here would have cost \$70. However, we only priced at one place. We knew we would get better quality for our money by sending to Wards.

MRS. C. W. McCANN
West Plains, Mo.

I received the bathroom outfit before I was ready to install it. Was more than pleased with it and so was the family. We also bought your automatic hot water heater and think it is fine—we have really hot water at any time wanted. Your directions are very simple and easy to follow. I saved a lot by buying at Wards.

C. M. SETSER
Portales, New Mexico

"LAKE FOREST"

\$88⁹⁵

Those of you who visited the Century of Progress in Chicago will recognize this Bathroom. Its modern design is identical with the newest of the fine outfits exhibited there. A really modern bathroom—at a price that is low for so much comfort, convenience and beauty. Wards Budget Plan makes it especially easy to own (see Page 3).

Complete with Shower and Shower Rod—ready to install in your own bathroom. All fittings and exposed metal parts are sparkling Tarnish-proof Chromium in the modern Artline design to match in quality the Warranted First Quality Porcelain Enamel and Vitreous China—we don't believe you can buy a better grade of Bathroom fixtures.

Tub is 30 in. wide—made of First Quality Porcelain Enamel with paneled sides with overrim tub spout and patented trip lever waste (no stopper and chain necessary). The chromium-plated Diverter Lever runs water to tub or to shower. Complete with adjustable Shower Head, chromium-plated curtain rod (curtain not included) and connections.

Vanity Top Lavatory has recessed single stream mixing faucet and two 6-sided chromium-plated legs. Chromium-plated supply pipes with stops and trap. Top is 24 by 20 inches; octagon basin is 16 by 11 in. Closet is First Quality Stainless Vitreous China with improved jet which flushes quietly in about 7 seconds. Recessed tank bolts directly onto bowl and complete outfit is only 29 inches high—takes 8 inches less wall space. The waterproof seat is enveloped in celluloid coating—in white or colors to match outfit. All fittings including bar hinge chromium-plated. For tank supply pipe to wall or floor add 50c. State which.

Article No.	Tub Faucet and Shower	4 1/2-Foot Tub	5-Foot Tub	5 1/2-Foot Tub
181 PHB 293	In Right End	\$88.95	\$90.95	\$93.95
181 PHB 294	In Left End	88.95	90.95	93.95

For corner tub add \$3.50. Wards prepay freight on this outfit.

Also in Green, Orchid or Ivory. For color add \$26 extra. State color.

All pieces in these Outfits shown separately on following pages.

Here's a pantry that lost its shelves and became a bathroom.

And this is the bathroom that started life as a pantry.

Look what's happened here! A pantry made into a bathroom! In the home of Mr. A. F. Otis, in Northern Illinois, there was need of a bathroom downstairs.

In Mr. Otis' home there was an unused pantry just large enough to accommodate tub, lavatory and closet. All materials and fixtures were secured from Wards Catalog. The photographs above show how well the plan worked out. You can do the same thing, a room only 5 feet wide will accommodate a bathtub.

Wards Prepay Freight on Bathroom Outfits

"MODERNE"

An extremely handsome outfit...quality made throughout...yet very moderately priced. Convenient modern fittings are tarnish proof chromium-plated—solid brass underneath. Tub and Lavatory are glistening, hard surfaced First Quality Porcelain Enamel—the Closet is First Quality Stainproof Vitreous China. Complete with faucets, all iron pipe connections, trap, and supply pipes—all ready to install. You can install it yourself by following the complete instructions included.

Tub—Your choice of recess or corner tub with fittings in either right or left end—our number 181 PHB 726 (recess tub) or 181 PHB 744 (corner tub) shown on Pages 14 and 15.

Lavatory—has single stream mixing fitting, pop-up waste, trap and supply pipes to wall. It is No. 181 PHB 509 on Page 12.

Closet—Washdown style with celluloid coated seat in white or color to match outfit. Number 181 PHB 823 described in detail on Page 10. For tank supply pipe to wall or floor add 50c. State which.

\$62⁸⁵

Also in Green, Orchid or Ivory. For color add \$24 extra. State color wanted.

on all BATHROOM OUTFITS...

that PERFECT now with Wards enamelware low prices...

We have assembled seven handsome sets on these pages, all priced at least 5% less than three individual pieces.

Yet your choice of Bathroom Outfits is not limited to these. You can make up your own bathroom outfit from the individual pieces on the following pages, and still save 5%.

Just select the tub, lavatory, and closet you like best from our complete selection of individual pieces on Pages 10, 12, 13, 14, 15... add up their prices, and deduct 5% ($\frac{1}{20}$ th).

Don't Delay...

Use Wards Budget Plan

If you are intending to buy your outfit "a little later"... there is no need to delay. If you want a bathroom now, you can have it now. Every day you put it off means inconvenience if not actual discomfort. Don't let the question of ready money stand in your way. Wards Budget Plan will enable you to own your bathroom outfit at once for a very small cash payment—as little as \$4.00 which is the down payment on the Glen Ellyn. On Page 3 you can see how very little the monthly payments amount to. When buying is made so easy there's no reason why you shouldn't enjoy your bathroom set right now.

These Heavy Art Line Faucets with this outfit if you wish. See below.

Wards Design a New Bathroom Outfit

Many months ago Wards designers began work on a new Bathtub and Lavatory of distinctive, modern appearance. The strikingly attractive result is shown above. This work has at last made possible an outfit that has the very latest design and is still low in price. Of course it is First Quality, for Wards would not sacrifice quality for appearance.

TUB: Leg-style tubs have always been less expensive to build and now Wards have given this tub a really modern, up-to-the minute design. This greatly improved appearance has been accomplished by giving the tub new improved style legs. Has flattened roll rim with attractive bevel. The deep soap dishes on either side of the faucet are handy and give it a distinctive appearance. The Chromium plated brass faucet mixes hot and cold water to the desired temperature. Tub is one-piece cast iron blanketed inside and over the rim with the finest First Quality Porcelain Enamel. The outside is painted white. Tub is 5 feet long, 30 inches wide and 19 inches high including 4 inch legs. Fittings include faucet, supply pipes, waste and over flow and stopper and chain. All fittings are Chromium plated.

LAVATORY: Modern in appearance, and designed especially to harmonize with the other two pieces in this outfit. Cast iron covered with First Quality Porcelain Enamel. Has soap dishes on either side of the single stream mixing faucet that tempers the water to the desired temperature. The top is 17 by 19 inches with 5 1/4 inch back; the bowl 10 by 14 inches and 5 inches deep. Fittings include faucet, supply pipes, trap, iron

pipe connections and wall hangers. All fittings are brass heavily plated with Chromium.

CLOSET: Like all of Wards Closets, this popular model is finest First Quality Vitreous China. Its hard glazed surfaces are easy-to-keep-clean, sanitary, stain-resisting. The powerful Syphon Washdown Action flushes the bowl quickly and thoroughly. Has large trapway, and water seal with a large part of the bowl under water at all times. All exposed metal trimmings are brass, Chromium plated. The shelf top tank has brass flushing mechanism and copper float. The mahogany finish hardwood seat is non-warping and moisture-resisting. Has brass bar hinge, Chromium plated; and rubber bumpers. Complete with screws, washers, and seat. For supply pipe to wall or floor add 50c. *State which.*

OUTFIT: Complete with all necessary fittings except tank supply pipe. Complete instructions for installing are included. You can install it yourself and make an added savings. And don't forget—the price includes Freight Charges, too, because Wards Prepay Freight on all enamelware. For Wards Budget Plan see Page 3 for details.

MEDICINE CABINETS

to Keep the Bathroom Tidy

Insert Cabinet With Venetian Mirror

Behind this beautiful etched Venetian plate glass mirror there is a big medicine cabinet with three ample shelves. This cabinet serves the double purpose of being a handsome decoration and a useful bathroom fixture.

The mirror is of heavy flawless plate glass, beveled on all edges, and securely fastened to the door of the cabinet. The gracefully curved top is etched with a delicate scroll design.

The new style insert cabinet is made of heavy, cold rolled sheet steel, finished in glistening baked white enamel that is easy to clean and will not crack. Three roomy plate glass shelves, razor blade drop and tooth brush holder are included. The entire cabinet sets into a wall opening 15 1/2 inches by 21 3/4 inches by 3 1/4 inches deep. Mirror is 18 inches by 26 inches. *Mailable.* Shipping weight 41 pounds. See Page 2 for shipping information.
481 HB 1850.....\$10.45

Medium Size Cabinet—Two Glass Shelves

Has same beautiful mirror and same fine construction as cabinet above. It's slightly smaller and has two glass shelves. Sets in wall opening 13 1/2 by 19 1/2 by 3 1/4 in. deep. Mirror is 16 by 24 in. Shipping weight 30 pounds.
481 HB 1855—Complete, ready to install. *Mailable....*\$7.95

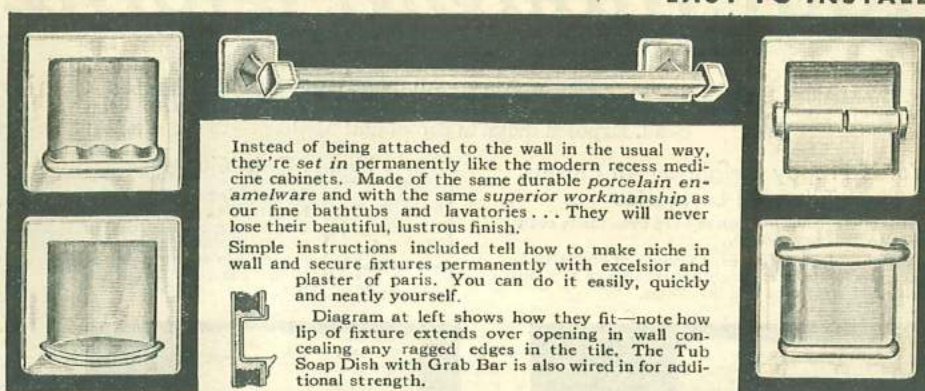

\$495 Steel Cabinet

Attractive
Lowest Priced

Made of sturdy steel with glossy, washable white enamel baked-on inside and out. This beautiful yet inexpensive cabinet has a heavy, clear glass mirror, 15 1/2 by 23 in. covering the entire door. It is etched and shaped in the modern manner. Sanitary—the two enameled metal shelves resist dirt and are easy to keep clean. Convenient drop for used razor blades and tooth brush holder. Build it into wall yourself by following the simple instructions included. For wall opening 13 1/2 by 19 1/2 by 3 1/4 in. Screws included.
481 HB 1840—Ship. wt. 18 lbs. *Mailable.....*\$4.95

BUILT-IN FIXTURES

ARE MODERN AND
EASY TO INSTALL

Instead of being attached to the wall in the usual way, they're set in permanently like the modern recess medicine cabinets. Made of the same durable porcelain enamelware and with the same superior workmanship as our fine bathtubs and lavatories... They will never lose their beautiful, lustrous finish.

Simple instructions included tell how to make niche in wall and secure fixtures permanently with excelsior and plaster of paris. You can do it easily, quickly and neatly yourself.

Diagram at left shows how they fit—note how lip of fixture extends over opening in wall concealing any ragged edges in the tile. The Tub Soap Dish with Grab Bar is also wired in for additional strength.

See How Stunning These Fixtures Look in the Bathroom on Back Cover

Recess fixtures are furnished in either white, green or black. The green fixtures match our green tubs, lavatories and closet outfits.

The towel bars are enameled iron 3/4 inch square in 18-inch and 24-inch lengths. The other fixtures are all 6 inches high and 1 1/2 inches deep.

All white and colored recess fixtures shipped from stock. See Page 2 for postage rates and shipping information.

Your Modern Home Starts Here!

Indeed! the bathroom comes first! Make it shine with the smooth hard surfaces of modern fixtures. In colors too: white, orchid, green or ivory. All Wards Closet Outfits are First Quality Vitreous China—sanitary—stainproof—easy to keep clean. Exposed metal in chromium! Modern!—to the minute!

Wards Prepay Freight on All Closets, Tubs and Lavatories

Wards spectacular low prices have been made even lower by this new policy.

In actual fact, this means savings of about 10% on china closets, and freight savings up to 15% on heavy cast iron tubs and lavatories.

How to Order Closets

In replacing an old closet, be sure the *rough-in* (distance from wall to center of drain pipe) is the same as we state in our description. See illustration at left.

REVERSE TRAP ACTION

\$13⁴⁵

Wards Prepay the Freight

Similar in design to our highest priced closets. Made of the same First Quality Vitreous China—durable and easy to care for.

Colonial Design with quiet, quick-acting Reverse Trap Flushing Action. Trap is in rear... greatly improving appearance of bowl. Note the large area of bowl which is under water. Bowl and tank are stainless First Quality Vitreous China. Tank has new convenient shelf top. High Quality hardwood seat which will not warp or crack, has bar hinge and rubber bumper. Screws and washers are brass heavily chromium-plated. *Rough-in is approximately 14 inches.* (See explanation in "How to Order" at top of page.) For supply pipe to wall or floor add 50c. *State which.* For Budget Plan see Page 3. *Wards prepay freight on closets.*

181 PHB 841—White Outfit with Mahogany seat.....\$13.45
181 PHB 843—White with Sheet Pyralin covered Seat and chromium plated hinge.....\$13.95

In Green, Orchid or Ivory. *State Color.*
181 PHB 842—Colored outfit, sheet pyralin covered seat to match; chrome hinge.....\$26.95

SYPHON JET ACTION

\$18²⁵

Wards Prepay the Freight

Flushes quickly and quietly. Easier to keep clean because more of the bowl is under water.

Colonial design; chromium-plated trimmings. Large size bowl; quiet Syphon Jet Flushing Action. Moisture-proof hardwood seats with bar hinges and rubber bumpers. Bowl and "shelf-top" tank of stainless First Quality Vitreous China. *Rough-in, 12 inches.* For supply pipe to wall or floor add 50c. *State which.* *Wards prepay freight on closets, saving you about 10%.*

Latest Closet Design Ultra-Modern..Compact SYPHON JET FLUSHING ACTION

\$21⁵⁰

Freight Prepaid

Very much smarter than anything on the market. It's all in one unit—closet tank bolts directly to bowl. The tank does not hang from the wall. The total height, only 28½ inches, is at least 8 inches less than the usual outfit. Therefore it fits in places in which it would be impossible to set other outfits. Tank is recessed allowing seat cover to stand up. Smart Colonial Design that harmonizes with the modern bathroom fixtures.

Its whirlpool centrifugal action flushes the bowl thoroughly and very quietly in about 7 seconds. Uses about ¼ less water than the ordinary toilet. Built of stainless First Quality Vitreous China with sparkling chromium-plated fittings. Sheet pyralin covered hardwood seat. Equipped with chromium-plated concealed hinges and rubber bumpers. Extra large bowl with unusually large area under water at all times. Tank has convenient shelf-top. *Rough-in 12 in. or more.* Also sold on Wards Budget Plan. See Page 3. For supply pipe to wall or floor add 50c. *State which.*

181 PHB 856—White outfit.....\$21.50
Also in Orchid, Green, Ivory. Colored Seat to Match.
181 PHB 858—*State color.*.....\$33.75

SYPHON WASH DOWN

\$11⁹⁵

Freight Prepaid

A good selection—it offers such a lot in appearance and in satisfaction for such a low price. The tank and bowl are First Quality Vitreous China. A Colonial design with convenient shelf-top tank. The efficient wash-down flushing action is shown in small illustration.

The select hardwood seat will not warp or peel. All seats with chromium plated hinge, and rubber bumpers. Chromium-plated, screws and washers included. *Rough-in is 14 inches.* (See explanation in "How to Order".) For supply pipe to wall or floor add 50c. *State which.* Wards prepay freight on this closet, saving you about 10%. See Page 3 for Wards Budget Plan.

FLUSH VALVE

\$10⁹⁵

Popular for homes, schools, office buildings and factories. It represents the latest development in the construction of flush valves—it embodies only such features as are necessary for the successful operation of commercial water closets.

Operates without a tank—1¼ to 2-inch spud reducer included. Nothing to get out of order—Length of flush can be adjusted to suit the action of various forms of closets—Adjustable from outside without turning off water supply. **Not Prepaid.** Ship. wts. 7 and 8 lbs.
81 HB 6595—For top supply...\$10.95
81 HB 6596—For back supply... 10.95

CLOSET BOWLS and TANKS

If your closet outfit needs repairs, order at Wards, repair it yourself and make a double saving. We furnish easy-to-follow instructions. Be sure to read "How to Order" at top of page where the "rough-in" measurement is explained. First quality Vitreous China bowls and tanks. *White only.*

For supply pipe to wall or floor (*State which.*) add 50c to price of tank. Wards prepay freight on all closet bowls and tanks, saving you about 10%.

Sealed-in Sheet Celluloid

Completely covered with lap-welded sheet celluloid over close-grained 1 1/4-in. hardwood. The sheet construction is the finest known—because it retains its original lustre. Glued and hickory doweled front and rear to prevent cracking and splitting. The smooth glistening surfaces are easily kept clean with a damp cloth. Has Chromium plated brass bar hinge and live rubber bumpers. Fits all regular bowls. *Choice of colors: White, Green, Orchid or Ivory.* Ship. wt. 9 lbs. *Mailable.*

481 HB 6497—State color.....\$3.39

Mother of Pearl Closet Seat

Beautiful, glistening Mother of Pearl lap-welded sheet celluloid covered. Same construction as seat above. White, Green, Orchid or Ivory. Ship. wt. 9 lbs.

481 HB 6499—State color. *Mailable.*.....\$5.49

Polished Oak or Mahogany

The attractive natural grain of the hardwood is preserved to add to the appearance of this Closet Seat. It is exceptionally low-priced for a quality seat of such sturdy, solid construction. The full 1 1/4-in. stock is air dried, thoroughly seasoned and quarter sawed to assure a smooth, lasting surface, and to keep it from slivering. It is glued and doweled front and rear with 1/2-in. cross-grained spiral hickory dowels, which make it warp-proof, split-proof and crack-proof. It is stained and varnished and rubbed by hand to a smooth finish. Equipped with live rubber bumpers and a brass bar hinge heavily plated with glistening tarnish-proof Chromium. Fit all regular closet bowls. Shipping weight 7 pounds. *Mailable.*

481 HB 6489—Varnished Oak.....\$1.89

481 HB 6490—Mahogany Finish.....1.89

Sprayed-on Celluloid

Wards now offer you a choice of beautiful colors—Green, Orchid, or glistening White—all at the same low price. Made of close-grained hardwood, 1 1/4-in. thick, completely incased with sprayed-on seamless celluloid, then rubbed to a glistening finish. It will never crack, craze, peel off or discolor—even after many years of service. It is sanitary and its smooth surfaces are easily kept clean. The celluloid completely envelops the wood, keeping out moisture. Glued and doweled front and rear with 1/2-in. spiral hickory dowels to make it warp-proof, split-proof and crack-proof. Has live rubber bumpers and solid brass bar hinge heavily plated with brilliant, tarnish-proof Chromium. An attractive seat for any bathroom. Fits all regular closet bowls. Ship. wt. 9 lbs.

481 HB 6491—State color. *Mailable.*.....\$2.29

A Seat for the Outdoor Toilet

\$1.49 This seat brings to the out-house the comfort and sanitation of an indoor closet seat. Screws down over the present hole. The edges are rounded and much more comfortable, as it is shaped like most expensive indoor seats. Made of 7/8-inch hardwood with smooth, moisture repelling gray enamel finish that is neat looking and easily cleaned. Has hinged lid for further sanitation and convenience. 4 screws included. Size 18 by 18 inches. Ship. wt. 7 lbs.

481 HB 6474—*Mailable.*.....\$1.49

481 HB 6467—Same, but no lid. Ship. wt. 5 lbs......98c

FROST-PROOF CLOSET

No Matter How Cold the Weather—It Cannot Freeze

\$20.95 Very simple and positive in operation. Water supply is installed below frost line (about 3 ft. under ground). Tank is filled by automatic valve on water supply, only when seat is occupied. When seat is released, water in tank flushes closet and tank remains empty until closet is used again. Especially recommended where heat is not constant and freezing is likely. Requires very little room for installation because of the shape of the closet. Tank measures 8 in. by 24 in. and may be mounted in either vertical or horizontal position. Closet bowl is of cast iron, enameled inside and painted outside. Equipment includes closet bowl, heavy quarter sawed oak seat, galvanized steel tank, flush pipes, lead waste connection. Trap and soil pipe not included. Furnished with hopper to catch unless ordered with flange. Ship. wt. 83 lbs. *Shipped from stock in Baltimore or Albany.* For Low Freight Rates, see Page 2 under "Water Closet Bowls."

Wards Give You a 5% DISCOUNT On Any 3 Pieces

On Pages 6, 7, and 8 we have assembled seven attractive bathroom outfits. All of these are priced at 5% less than the total of the individual pieces.

Yet because there are many other possible combinations of the tubs, closets, and lavatories shown in this book, we have a great new plan to save you money when you make up your own bathroom.

WHAT YOU DO...

Select any three pieces—the closet, tub, and lavatory you like best from Pages 10, 12, 13, 14, 15—add up their prices, and deduct 5%.

Complete bathroom outfits are usually priced only slightly less than three individual pieces. Now Wards give you a clear cut saving of 5%—and you can choose from the outfits we have assembled on Pages 6, 7, and 8 or make up your own outfit.

New Design Lavatory

Many months ago Wards designers began work on a new lavatory of distinctive modern appearance. The attractive result is shown above.

\$6⁴⁵

Less Fittings

First Quality like all of Wards line, this new lavatory is White Porcelain Enamel over a base of one-piece cast iron. The single stream mixing faucet is of the latest design, heavily chromium plated. The top is 17 by 19 inches with a 5¼ inch back. The bowl is full 10 by 14 inches and 5 inches deep.

Fittings include faucet, Chromium Plated supply pipes, trap, iron pipe connections and wall hangers. Your choice of fittings connecting to the wall or floor. **Shipped Freight Prepaid.**

How to Order Corner Tubs

Face the wall against which the long side of the tub is to be set. If the end of tub is to fit against the corner at your right hand, order a right corner tub. If it is to fit against the corner at your left hand, order a left corner tub.

New Design Leg Style Tub

\$19.95
5 ft.

Many months ago Wards designers began work to design a tub that would be attractive and distinctive in appearance and still be in the low price range. Pictured here is the design that they chose from hundreds of others because it meets all requirements.

Attractive and distinctive, to be sure. The new design, modernistic legs, the flattened roll rim with the bevel edges, and the two soap dishes on either side of the faucet take care of that. Those soap dishes are especially handy because you always have soap within easy reach.

The faucet is a new design, too, so that it harmonizes perfectly with the tub design. It is made of heavy cast brass, thickly plated with glistening tarnish and corrosion-proof Chromium that is so easily kept sparkling—just wipe it off with a damp cloth.

The tub is one-piece high grade cast iron blanketed inside and over the rim with the finest First Quality Porcelain Enamel; the outside and legs are painted white. The legs are cast iron with modern rounded corners.

The tub is 5 feet long, 30 inches wide and 19 inches high, overall. The legs are 4 inches high. Tub complete with fittings includes faucet, Chromium plated supply pipes, connected waste and overflow and stopper and chain.

Shipped Freight Prepaid—an additional saving.

WARDS SAVE YOU 5% ON ANY THREE PIECES

On Pages 6, 7, and 8 we have assembled bathroom outfits for you to choose from, all priced at about 5% less than you'd pay for three individual pieces.

Yet because you may wish to assemble your own bathroom from the pieces here, Wards have a new plan to give you savings on complete outfits.

Select the tub, lavatory, and closet you like best (from Pages 10, 12, 13, 14 and 15), add up their prices, and deduct 5% (one-twentieth). Your selection is unlimited. You plan your own bathroom, yet get the extra savings.

CORNER TUBS In White or Colors

Newest panel sides—smooth modern corners—dazzling Chromium plated solid brass fittings—First Quality Enamel over one-piece cast iron. Your choice of White, Green, Orchid, or Ivory. For color add \$10.00 and state in order. Complete with iron pipe connections, instructions, ready to install. 30 in. wide, 18 in. deep. For Wards Budget Plan of Monthly Payments see Page 3. Wards Prepay Freight on all enamelware, bringing you an added saving of about 15%.

The *Finest* Cabinet Sinks that Wards Could Build

AND WE PAY THE FREIGHT

Spectacular Low Prices have been made even lower by Wards new policy of prepaying freight on all porcelain enamel sinks, bathtubs, lavatories and china closets. This means an additional saving of about 15%.

And with these savings, Wards are giving you better merchandise than ever before. One look at the new complete line will determine that. Designed by Wards, these modern sink cabinets have the best features of every model all ready on the market—and added features exclusive to Wards.

WARDS BUDGET PLAN

Under our Budget Plan of Monthly Payments, it is possible for you to enjoy the use of the merchandise while you are paying for it. A small amount down will put one of these beautiful cabinet sinks in your home, then pay for it in small amounts each month. For more complete details see Page 3.

\$31⁹⁵
CASH PRICE

\$4 down
\$5 a MONTH

First Quality Enamel OVER ONE PIECE CAST IRON

The sink of this beautiful model is cast iron covered with First Quality White Porcelain Enamel and has the new low 8-inch back. The graceful cabinet, like those on all Wards other models, is heavy rolled steel coated with gleaming white Du Pont DuLux, that's as easy to keep clean as a china dish.

More beautiful, of course, but utility has not been sacrificed in designing these cabinet sinks. The black steel base not only adds modern styling, but prevents dirt from getting under the cabinet. The base sets back, too, so there's ample room in front for your toes, and it's adjustable, giving heights from the floor to the drainboard of from thirty-three to thirty-six inches. The drawers and compartments are finished white inside. Stylish handles add to the gleaming white beauty of the modern cabinet.

Every detail shows the finest craftsmanship.

Drawers and compartments have neat lap edges which add greatly to the appearance of the cabinet. The highly polished, Chromium plated brass single stream faucet and sink strainer, included in Wards low price, are of high quality and will last for years. Nowhere, we believe, can you get comparable quality at such low prices.

This model is furnished in two sizes—one 42 inches long, the other 52 inches long. They have similar construction, except the 52 inch size has two doors instead of one in the large compartment under the sink basin and the fronts of the doors and drawers are double thickness. Wall hangers are furnished to anchor the sink securely to the wall so that the entire weight of the cast iron sink does not rest on the cabinet. Easy to install it yourself with the complete instructions that are included. *Trap not included*—order trap for these sinks separately from Page 20 of this book.

Acid Resisting Porcelain ON SINKS OF ARMCO IRON

\$39⁹⁵
CASH PRICE

\$4 down
\$5 a MONTH

The sinks are Armco Iron (trade name for the finest rolled steel) coated with Acid Resisting White Porcelain Enamel so that you need never fear stains from fruit juices, vegetables or other acids in the kitchen. Armco Iron is lighter than cast iron, and the under sides of these sinks have been padded with sound-proofing material.

The cabinets are heavy steel, coated with acid resisting White DuLux. Modern design handles. Black steel base is recessed in the front. Has 8-inch back. Height from floor to drainboard is 36 inches.

The Artline single stream mixing faucet is extra heavy brass coated with Chromium, as is the strainer. No wall hangers needed—sink rests on rubber pads on the cabinet. Two sizes—one 42-in. long, the other 52-in. The 52-in. size has these added features: wooden work board above the drawer, double thickness drawer and door fronts; and a 4-in. basket strainer instead of the 2-in. strainer on the 42-in. size. *Trap not included*—order from Page 20. Freight Prepaid on these sinks.

Acid-Resisting Porcelain ON SINKS OF ARMCO IRON

\$59⁹⁵
PREPAID

See Budget Plan
Information Page 3

No worry about acid stains from fruit juices, vegetables or vinegar, when you buy this Sink of First Quality Acid-resisting Enamel over one-piece Armco Iron (the trade name for the finest rolled steel). The sink is padded on the under side with sound-proofing material that goes away with the ringing so common in steel sinks. It has the added advantage of being much lighter than cast iron—no wall hangers are needed. The sink rests on rubber pads on the top of the cabinet, making installation extremely easy. The sink is sixty inches long with two roomy drainboards each nineteen by twenty-two inches. The deep basin is twenty-two by twenty-two inches. The height from the drainboard to the floor is thirty-six in.

The cabinet is strong steel coated with acid-resisting DuPont DuLux, the same finish that is used on refrigerators. The handy drawers and compartments are finished white inside and have double thickness drawer and door fronts. The handles are attractive and add to the appearance of the cabinet. Dirt can't get under the floor-sealed base, which is recessed in the front to allow ample toe room.

Faucet is Wards Finest

The beautiful single stream mixing faucet is the most modern design—Wards finest. It is extra heavy, made of brass, thickly Chromium plated for long wear. The soap dish is easily removable to facilitate cleaning. As added features the sink is furnished with a basket strainer, shown below, and a wooden workboard for slicing fruits, bread, vegetables, etc. *Trap not included—order it separately from Page 20.* Instructions for installing are included—install it yourself and make an added saving. Wards Prepay the Freight on this cabinet and sink—giving you an added saving of about 15%. May be purchased on Wards Budget Plan of Monthly Payments—for complete details on this plan see Page 3.

First Quality Enamel OVER ONE PIECE CAST IRON

\$54⁹⁵
PREPAID

See Budget Plan
Information Page 3

The sink is sixty inches long with two roomy drainboards, each nineteen by twenty-two inches. You'll find it easier to work at this extra large sink because there is plenty of room for everything on the two drainboards. And the beautifully finished cabinet gives you added storage space for pots and pans, silverware and linens. The sink itself is durable cast iron covered with First Quality Porcelain Enamel.

The single stream mixing faucet is of good quality—brass heavily plated with sparkling Chromium—just wipe it off with a damp rag and its original lustre is restored. The modern design of the handles emphasizes the beauty of the cabinet. The 4-in. Basket Strainer, shown above, is another attractive feature. The basket catches all food particles, peelings, etc., and is easily removed by the small knob.

Extra Cupboard Space

The cabinet is designed to utilize and make attractive the most unsightly part of the kitchen—under the sink. It is made of strong steel, coated with Du Pont DuLux, the same finish that is used on refrigerators—as easy to keep clean as your sink. Hidden partitions between compartments and double thickness door and drawer fronts show the finest workmanship. The drawers and doors are finished white inside. You'll like the handy wooden workboard above the top drawer at the right, for cutting bread, fruits, vegetables, etc. The black floor-sealed base keeps dirt from getting under the cabinet. It is recessed in the front to allow ample toe room.

The single stream mixing faucet is of good quality—brass heavily plated with sparkling Chromium—just wipe it off with a damp rag and its original lustre is restored. The modern design of the handles emphasizes the beauty of the cabinet. The 4-in. Basket Strainer, shown above, is another attractive feature. The basket catches all food particles, peelings, etc., and is easily removed by the small knob.

Adjustable Height

The height to the drainboard from the floor is adjustable from 33 to 36 in. Wall hangers support the sink so that the entire weight of the heavy cast iron sink does not rest on the cabinet. *Trap not included—order it separately from Page 20.* Instructions included. Wards Prepay Freight on this sink and cabinet—an extra saving of about 15%. May be purchased on Wards Budget Plan, see Page 3 for details.

with NEWEST FEATURES

Basket Strainer

\$1.79

No more soiled fingers caused by removing "dregs" from sink when you use this modern convenient Strainer. The deep Basket, which measures 4 inches in diameter, catches all the scraps, food particles, peelings, etc. and lifts out by the small knob for emptying. Turn the knob slightly and you have a stopper so that you can wash dishes or vegetables right in the sink. Made of solid brass, heavily chromium plated. *Can be used only with sinks drilled or made with 4 in. waste outlet.* Can be had with the sinks shown at the top of these two pages.

31 HB 6899—Ship. wt. 2 lbs. 4 oz. *Not Prepaid.* \$1.79

In White, Green or Ivory

One piece cast iron blanketed with First Quality Porcelain Enamel. Sink with fittings included—Modern Mixing Faucet; trap; and your choice of 2-in. strainer or 4-in. basket strainer. All plated with tarnish proof chromium; 1 1/2-in. pipe connections, wall hangers and instructions for installing. Back is 8 in. high. *In White, Green or Ivory—For color, add \$4 and state color.*

Better Fittings at Greater Savings

Colonial Design Mixing Faucet

\$475 You'll get more pleasure out of this heavy, modern Sink Faucet than from almost anything you ever bought for your kitchen. It mixes the water and delivers it from a single spout at just the temperature you want. And the spout (with removable strainer) swings from side to side! Also note the improved position of the spout, it's mounted on top of the fixture so you can set a pail under it.

A beautiful design. Heavy cast brass with bright chromium plating. Renewable bronze seats. Removable self draining soap dish. Indexed metal handles. Threaded for 1/2-inch iron pipe connection. Will fit all standard sinks. *Mailable.* Ship. wt. 6 lbs.

81 HB 5505—Chromium plated.....\$4.75

Mixing Faucet Fits All Sinks

\$279 Chromium Plated

Another new sink mixing faucet—modern in design and with the latest improvements. By all means, get one. It mixes the hot and cold water in a single stream. So much more convenient! It's easily attached, you can do it yourself. All you need is a wrench. Will fit all standard sinks. Renewable bronze seats prolong life of faucet.

This one is cast brass with brass handles and self draining removable brass soap dish—all chromium plated. The spout swings to either side and is mounted on top of the fixture to give increased clearance for utensils in the sink. This is an improved feature.

Threaded for 1/2-inch iron pipe connections. Adjustable flanges from 7/8 to 8 1/4 inches. *Mailable.* Ship. wt. 6 lbs.

81 HB 5499—Chromium plated.....\$2.79

Unusual Quality At This Price

\$129

Here's a new bathtub faucet at an extremely low price. A little lighter in weight than the one at the right, but well made and efficient. Plated with non-tarnishing chromium. Quick compression operation. Easily installed, all you need is a wrench. Handles marked "H" and "C." May be installed in any leg or base style tub. 81 HB 5467—Wt. 2 lbs. 4 oz. \$1.29

Tailpieces for Bath Faucets 81HB5439—Tailpiece threaded for 1/2-in. supply pipe connection. 3/4-in. faucet connection. Ship. wt. 1 lb. per pair. 35c

New—Beautiful Modern Design

\$219

A beautiful faucet for the bathtub. Designed on the same modern lines as our new Lavatory fixtures. Removable bronze seats. Heavily chromium-plated—non-tarnishing.

New modern metal handles indexed "H" and "C" and practically unbreakable. Quick compression operation.

Easily installed in any leg or base style tub. Standard threaded for connections to water supply pipes. Shipping weight 3 pounds.

81 HB 5477.....\$2.19

Drain Pipe Solvent

Simply pour in sink, wash basin, etc. and add water. This immediately gives a hot chemical reaction inside the pipe that dissolves grease, lint, etc., removing stoppage. Ship. wt. 1 lb. 8 oz.

Bulk prices on request. 681 HB 6515—Can. 15c 3 cans.....39c

Faucet Washers

One dozen composition beveled washers of assorted sizes with 6 brass screws. *Mailable.*

Shipping weight 4 ounces. 81 HB 5508.....10c

SINGLE STREAM LAVATORY FAUCET

Convenient! Permits you to mix hot and cold water so that it runs from a single faucet at just the temperature you want. You can wash with running water, there being no necessity for using stopper and mixing the water in the bowl. The convenient pop-up waste, so much handier than the old style chain and stopper.

Attach to any lavatory having openings for separate faucets and pop-up waste. Slip joints permit adjustment to fit slight variations between openings in lavatories.

Complete with heavy brass pipe and connections shown in picture. Shipping weight 9 pounds.

81 HB 5468—*Mailable.*.....\$8.95

Modern—tarnish proof chromium-plated faucets. Cross-metal handles, indexed H and C. Removable seat can be lifted out by unscrewing head, making it possible to replace the only part which wears eventually. Fits practically all lavatories. Tail pieces for 1/4-in. pipe connections. Shank threaded 1/2-in. Ship. wt. per pair 3 lbs. 8 oz.

81 HB 5450—Per pair.....\$2.79

Lavatory Faucets

Compression action faucets. Fit all lavatories. Well made of heavy cast brass for years of service. Heavily plated with sparkling non-tarnishing chromium. Choice of metal lever or 4-Ball Metal Handle. Indexed "Hot" or "Cold." For iron, lead or nickel plated supply pipe connections. Ship. wt. 1 lb. 8 oz.

STEEL PIPE—Black or Galvanized

Meets Requirements of American Society for Testing Materials

Clean Perfect Threads . . . All Perfect Welds . . . Standard Gauge . . .
Uniform Thickness . . . Tested Up to 700 Lbs. Water Pressure

Wards low, money-saving Mail Order price makes the installation of anything but good new pipe very impractical. Every length of Wards Steel Pipe is tested to 700 pounds water pressure.

We ship pipe in random lengths from 18 to 21 feet, threaded on each end, and fitted with one coupling. If you want your pipe in exact lengths, we will cut and thread them. Charge is made for threading each end of each piece, and no couplings are furnished. *State size.*

To find correct size of Pipe and Fittings, be sure to use the scale below. *Do not Use a Foot Rule*; scale is not in inches. Place end of pipe on scale with one side against line A. Scale reading at opposite side of pipe will show size of the pipe.

If ends of pipe are threaded, they will be slightly smaller than the pipe.

We ship Pipe in lengths taken at random measuring from 18 to 21 feet, threaded on each end with one coupling. If you order pipe in exact lengths, we will cut and thread them to the length desired, for an extra charge as quoted in tables. We do not include couplings with such specially cut lengths.

Pipe over 6 1/2 feet long shipped from stock by freight or express. Pipe under 6 1/2 feet Mailable.

How to Order Pipe Fittings

Pipe Fittings are always quoted by the same size as the pipe they fit. For example, a 1/2-inch pipe takes a 1/2-inch fitting. Always order the same size pipe and fitting, if used together.

To measure a fitting, lay the edge of a card across center of opening of fitting; and indicate inside diameter by pencil marks. Lay this card on the scale below with one pencil mark at line A. The other pencil mark will indicate the correct size of the fitting.

Do Not Use a Foot Rule. Use the Scale Below.

For Quality Tools See Wards General Catalog

PLUMBER'S SUPPLIES

Malleable 90° Elbows
Ship. wts. 2 oz. to 2 lbs. 8 oz. *State size.*

BRASS PIPE

- It Cannot Rust—Everlasting
- Tested to 2500 Lbs. Pressure
- Full Iron Pipe Sizes
- Standard Weight and Gauge

When you build a home—build for permanence! When you make a repair—repair for the last time. Use Brass Pipe—it cannot rust!

The U. S. Government specifies Brass Pipe and Fittings for all its buildings. These buildings are built to last scores of years. One repair job can easily cost more than the difference in cost between Brass Pipe and other kinds. In addition, you are assured of a permanent supply of clean, pure water. Freedom from rust is freedom from care and worry! Brass Pipe is more than *four times* as strong as steel pipe—it is seamless and practically burst-proof, even under extreme conditions.

181 HB 5510— $\frac{1}{2}$ -inch. Per foot..... 18 $\frac{1}{2}$ c
181 HB 5510— $\frac{3}{4}$ -inch. Per foot..... 23c

Wards Brass Pipe is drawn to uniform thickness, each and every piece is standard gauge and weight. It's Full Iron Pipe Size—will connect right into your present iron fittings for repair work. However, it is best to use brass fittings with Brass Pipe. This will insure a permanent installation.

All Prices subject to market changes. *State size.* Low Freight Rates listed under Brass Pipe on Page 2. Furnished in 12-ft. lengths—unthreaded. Each threaded end 5c extra. Ship. wts., 15 oz. and 1 lb. 4 oz. per ft. *Prices Subject to Market Change.*

COPPER TUBING and ACCESSORIES

8 $\frac{3}{4}$ c
Per Foot

- Rust and Corrosion-Proof
- Freeze-Proof—Heat-Proof
- Tested to 2000 Lbs. Pressure
- Best and Quickest for Repairs and Replacements

Made of 99.9% Pure Copper—so permanently resistant to the elements that the only way you can put it out of service is to remove it! Rust—corrosion—freezing—intense heat—all have no effect on it. *Annealed*—it expands 3 to 5 times with freezing water and can be bent easily.

You can run it around corners, between walls and under floors in one continuous piece. This means speed in new buildings—and a big saving on the cost of cutting through walls and floors in repair jobs. No thread cutting is necessary—uses compression fittings like the gasoline line in an auto. Furnished in lengths up to 60 ft. Order Standard Weight for interior use—Extra Heavy for underground use. *Prices subject to market changes. State size.*

Bending Tool

For making sharp bends of 90° or even 180°. With ordinary care will not kink or flatten tube. Uses minimum space in cramped quarters. Full instructions included. For use with $\frac{1}{2}$, $\frac{3}{4}$, and 1-in. tubing. Ship. wt. 7 lbs.

81 HB 5559.....\$4.45

Upstairs . . . downstairs . . . ALL THE WATER YOU

"I saved \$35 on my pump alone," says F. A. Berther of Port Arthur, Texas. Thirty-five dollars—because the best price quoted to Mr. Berther on a pump to compare with Wards Little Giant was \$95.

But such cash saving is only a part of the economy of buying at Wards. On thousands of farms, suburban homes, stores, filling stations beyond the range of city water mains, Wards water systems are saving money on operation, just as they did on first cost, because of the extra dependable service they give.

Why? Because Wards never, if possible, lets a man buy the wrong kind of pump for his job. This is an extra service Wards customers may have from Wards Engineering Service Department *without extra charge*.

FREE Estimates—FREE Instructions

Here is how Wards Engineers help you when you are ready to buy your water system!

First, You may call upon them for advice as to what kind of pump will be best for your job.

Second, You may ask them for any other advice or assistance you may think will help you to secure a good installation.

Third, You may have, without cost or obligation, a complete estimate of the cost of all materials—delivered.

Fourth, You may have complete instructions for installing the system yourself; blue prints where needed, diagrams, instructions—everything you require to do the job right.

How to Secure These Services

The recommendations of Wards Engineering Service are based on a complete picture of your problems. With this catalog we send our Water System Information Form, No. 16274. When you have filled out this blank, you have given our engi-

A typical installation of Ward's Little Giant Shallow Well Outfit. It supplies running water to your basement, kitchen and bathroom. It also serves a stock tank in the barnyard and drinking cups at the cow stalls. The pump is electrically operated and entirely automatic.

The septic tank provides every advantage of modern city sewage disposal. Disposes of household waste through the natural process of bacterial action. No chemicals required. No upkeep. Easily installed. Read about Ward's Windsor Septic Tank shown elsewhere in this Book.

The shallow driven well. Very common type. Well point is driven down to water bed. Point is equipped with a screen which keeps sand and grit out of suction pipe. A complete line of Pumps and Well Supplies is shown on the following pages.

in the yard...in the barn

CAN USE AT A FEW CENTS A DAY

neers all the information they require to render you practical help in planning your system.

This form gives you valuable information about all types of pumps, showing typical installations for electric, windmill or engine power. It covers all kinds of wells, both deep and shallow, and other sources such as lakes, streams or springs.

The size and type of water system you select will depend upon amount of water required, kind of well, depth water must be pumped and kind of power you will use.

Wards Engineers consider carefully all these conditions in relation to your own installation and the advice they give you is sound and practical. It will give you an excellent installation, economical in first cost, economical to maintain, and destined for long years of perfect performance.

Fill out the blank fully, giving complete answers to every question that concerns your installation. Before you order, Wards engineers will give you a complete estimate of the cost—delivered—of all materials you will require.

Blue prints of your entire installation are prepared for you by skilled engineers. These instruction sheets tell exactly how to install each unit of your water system according to latest, most approved plumbing practice and are furnished when they are required in order to insure a perfect installation.

Save Money on Installation

With your order we will send, if their use is necessary, complete instructions for installation, including blue prints, and instruction sheets picturing and diagraming the installation of each unit. We will also show you how to hook up the power or plumbing you may install at the same time. These instructions are designed for the man of limited experience. They are simple and practical, and will enable almost anyone to make the entire installation without a moment's difficulty. There is no charge for this extra service. Use it freely. It will mean a better water system, better installed, and at a real saving of time and money.

An outside anti-freeze hydrant supplies water to the stock tank. A brass shut-off valve at the service pipe below is controlled by a hand wheel at the top of the hydrant. When valve is closed, the water drains out below frost line.

Drinking cups at the cow stalls are a sure source of profit. It is universally agreed that cows increase their productive capacity when water is easily accessible at all times. See our general Catalog for Dairy Supplies and Stock Tanks.

Pump 450 and 600 Gallons Per Hour

NEW! IMPROVED! We've completely redesigned old systems—added every worthwhile new feature . . . extra large air chamber—larger and more direct waterways—smooth, quiet stroke. We've put the sturdy new motor and pump on separate heavy mountings to make one of the most noiseless, vibrationless, longest lasting Systems possible. Upright tank has capacity of 42 gallons—plenty of water for every use, bath-room, kitchen and basement—for sprinkling, watering stock and fire protection. Compact—requires a floor space only 16 by 27 inches.

Wards Little Giant Has Every Worthwhile Mechanical Feature

- Sturdy, powerful $\frac{1}{3}$ and $\frac{1}{2}$ -H. P. Repulsion-Induction Motors.
- 42-Gallon Tank gives unusual storage capacity—not necessary to run pump so often—a big saving on current.
- Reciprocating Action Piston Pump operates on a smooth even stroke at low speed—no noise . . . no vibration.
- Built-in Strainer on suction line keeps out grit, etc.
- Special Outlet gives fresh drinking water direct from well.
- Air Volume Control keeps tank from becoming water logged.
- Brass Lined Cylinder . . . Timken Roller Bearings.
- Extra Large Vacuum and Pressure Air Chambers and direct waterways eliminate pulsation and water knocks.

Has automatic two-pole switch that stops and starts the motor . . . thermal cutout switch that automatically protects motor from overload . . . self-priming vacuum chamber . . . strong V-shaped rubber belt . . . splash lubrication . . . foot and relief valve . . . bronze connecting rod . . . stainless steel piston rod . . . rubber faced brass valves . . . wing guided . . . valves and piston easily accessible . . . pressure gauge and air volume control on tank.

Maintains normal pressure at a fraction of capacity power, leaving plenty in reserve for emergencies. Heavy cast iron housings and stand are finished in red . . . the motor is adjustable to take up slack in the belt. The only attention it needs is an occasional oiling.

READ INFORMATION IN PANEL AT LEFT

Constant pressure in tank, between 20 and 40 lbs., forces water into house at ordinary city pressure. Write to Wards Engineering Service Department (see Page 4) if you require a system to maintain higher tank pressure. Sold on Monthly Payments, see Page 3.

450-gallon outfit has $\frac{1}{2}$ -H.P. motor; 600-gallon outfit has $\frac{1}{2}$ -H.P. motor. Operates on 110 or 220-volt, 60-cycle A.C. Tank is 48 inches high, 16 inches in diameter. Overall height of pump 22 inches. Suction intake for $1\frac{1}{4}$ -in. pipe. Discharge outlet for 1-in. on both sides. Easy to install—complete instructions furnished. Shipped from Stock in Baltimore, Md. or Albany, N. Y.

181 HB 3439—450-Gallon Outfit—Complete with Tank and Fittings to Install.

Cash Price: Ship. wt. 320 lbs. \$71.45

Budget Plan Price: Only \$7 Down and \$7 a Month. 78.95

181 HB 3444—600-Gallon Outfit—Complete with Tank and Fittings to Install.

Cash Price: Ship. wt. 340 lbs. \$81.95

Budget Plan Price: Only \$8 Down and \$8 a Month. 90.45

If Belt Guard is Wanted, add \$2. Either Pump can be furnished with 25-cycle or 50-cycle Motor at \$5.00 extra.

Little Giant Pump Only Without Tank or Fittings

181 HB 3460—450-Gallon Size. Ship. wt. 200 lbs. Cash Price \$57.45

181 HB 3461—600-Gallon Size. Ship. wt. 215 lbs. Cash Price 67.45

DIRECT WATERWAYS
NEW! Large straight water channels assure a rapid free water flow—eliminates pounding, vibration, noise and wear. Insures smooth operation—long service.

FIRE PROTECTION
Large volume for fire protection—supplies $\frac{3}{4}$ -inch hose nozzle "wide open" with strong steady stream. Plenty of water for all purposes—stock watering, etc.

For Wells 22 Ft. Deep or Less

All Systems on this page pump from wells, lakes, streams, etc., where water level is not more than 22 feet below pump. They draw water horizontally over 100 feet at 22-foot water level and 200 feet at 20-foot water level.

Pressure in Tank Forces Water into House—at about Average City Pressure. A pressure of about 35 pounds will raise water 80 feet.

Write Wards Engineering Service Department

If Belt Guard is wanted, state on order and add \$2. Can be furnished with either 25-cycle or 50-cycle motors at \$5 extra.

PUMPS Cost Less at Wards

ENGINEERING SERVICE—A water system with a capacity of 225 to 250 gallons an hour will supply average household needs. For sprinkling, watering stock and fire protection a larger capacity is required. If in doubt as to your needs, let Wards engineers give you free advice. Write to Wards Engineering Service Department and ask for Free Estimate Blank No. 16274. When you get Wards Free Estimate Blank, all you need to do is answer the simple questions, and return the blank.

Wards engineers can then give you the answers to any questions you have asked and the delivered cost of the water system. Complete installation instructions are furnished when you order from Wards. With the aid of these instructions any man mechanically inclined can install a water system easily. If you are considering making an installation of plumbing or other related equipment in addition to the water supply system, we will be glad to furnish a free estimate on the complete job.

Pumps 250 Gallons per Hour

- Tank—18-gallon, heavily galvanized inside and out
- Motor— $\frac{1}{4}$ -H.P., economical in power consumption
- Pump—Reciprocating action—245 strokes per minute—galvanized inside and out to prevent rusting

\$45⁷⁵
CASH PRICE

A leader in its field! This Water System has all the extra quality features of Wards finest Water System, at the left, except that the motor and pump are lighter weight and mounted directly on the 18-gallon galvanized tank. Its capacity of 250 gallons per hour is sufficient for all ordinary household requirements of the average size family.

Without Belt Guard

$\frac{1}{4}$ -H.P. condenser-type motor is practically silent running. Two-pole switch automatically starts and stops motor. Cutout switch protects it from overloading. Air volume control keeps tank from being water logged. Gauge shows pressure in tank. Reciprocating action piston, operating with a smooth, quiet even stroke, forces water into the house at about city pressure. Brass-lined cylinder for long trouble-free service. Timken Roller Bearings and splash lubrication. Large vacuum and pressure air chamber prevents pulsation and water knocks. Will pump any distance within 100 feet from source of water, with a vertical lift up to 22 feet. Pump starts when pressure drops to 20 lbs.; stops when pressure reaches 40 lbs.

Lifts Water From Wells 22 Feet Deep

Fresh water opening permits cool drinking water to be drawn directly from the well, and the built-in strainer keeps out grit, preventing the cylinder from being scored. The self-priming suction chamber keeps the pump primed at all times. Suction and discharge valves and piston are easily accessible for inspection. There are two connections for $\frac{3}{4}$ -in. pipe and fresh water valve connection for $\frac{1}{2}$ -in. pipe. Size 40 by 14 by 29 in. high. Easily installed with complete instructions included. Shipped from Stock in Baltimore, Md. or Albany, N. Y. Ship. wt. either type, 180 lbs. See Page 2 for Freight Rates. Wards Engineering Service Department will advise you—Free of Charge—as to which Water System is best adapted to your needs. Write for Free Estimate Form No. 16274, if you are in need of assistance. Protect yourself and family by using a belt guard. If belt guard is wanted specify in order and add \$2 to price below. Systems for 25 and 50-cycle motors can be furnished for \$5 extra. State kind of current to be used.

Pumps 250 Gallons Per Hour DIRECT FROM WELL—USES NO TANK

A completely automatic direct from well Water System for the small home, beach cottage, etc. Just a dollar a day put aside for a month will give you all the conveniences that running water offers.

One-gallon iron pressure tank delivers water sparkling and cold direct from the well. Just a turn of any water faucet, and this sturdy little pump goes into action—giving you as much as 250 gallons an hour. Turn off the water and the pump automatically stops. No storage tank is required, but one may be used if desired. $\frac{1}{4}$ -H.P. Condenser Type Motor starts and stops automatically; starts at 20 pounds pressure and stops at 40 pounds, which forces the water into the house at about average city pressure.

The double action pump has brass-lined cylinder. The bronze connecting rod and crank are lubricated by the splash system. Automatic air volume control prevents tank from becoming water-logged. Has foot and relief valves. Will draw any distance within 100 feet of the source with vertical lift of 22 feet. Delivers pressure stream anywhere in the house. Compact—requires space only 31 by 13 by 21 inches high. Has $\frac{3}{4}$ -in. suction; $\frac{1}{2}$ -in. discharge. For 110 or 120-volt, 60-cycle A.C. If belt guard is wanted, state in order and add \$1.50. Shipped from Stock in Baltimore or Albany. Ship. wt. 141 lbs. Freight Rates Page 2.

If you are in doubt as to the correct pump for your home, write Wards Engineering Service Department—ask for Free Estimate 16274.

Without
Belt Guard

Pumps 350 Gallons per Hour

- Tank—42-gallon size, galvanized inside and out
- Motor— $\frac{1}{4}$ -H.P., very economical of power
- Pump—Reciprocating action—220 Strokes per minute—galvanized heavily inside and out

\$55⁹⁵
CASH PRICE

Without Belt Guard

It operates on the new low speed principle that eliminates wear and saves dollars on the parts YOU DO NOT HAVE TO BUY. The 42-gallon storage tank gives unusual capacity—the motor runs less frequently, and that means a big saving in current. Will pump any distance within 100 feet of water supply.

The heavily galvanized 42-gal. tank is mounted separately, permitting heavy solid mountings for motor and pump. Noise and vibration reduced to a minimum. Air volume control prevents tank from becoming water-logged. Tank is 48 in. high; diameter, 16 in.

The double action pump works in a brass-lined cylinder and has extra large water-ways. The Timken Roller Bearings and Splash Lubrication assure long, silent operation. The large Vacuum and Pressure Chambers prevent pounding and water knocks. A built-in strainer keeps out grit and dirt and prevents the cylinder from being scored. A fresh water opening gives cold, sparkling water direct from the well. Cast iron housings for added strength. Pump is 31 in. long; 13 in. wide and 21 in. high.

Two connections, suction 1-in., discharge for $\frac{3}{4}$ -in. pipe. Instructions included. Shipped from Stock in Baltimore or Albany. For Freight Rates, see Page 2. For Wards Budget Plan of Convenient Monthly Payments, see Page 3. For Pumps with Belt Guard, state in order and add \$2. Pump furnished with 25-cycle or 50-cycle motor at \$5 extra.

- Pressure Switch automatically starts and stops pump—keeps water pressure constant.
- All working parts splash lubricated.
- Oversize, Machine-cut Gears run in oil.
- 5-in. Stroke, 60 strokes a minute.
- Silent V-Belt gives even flow of power.
- Positive control Air Pump maintains proper air pressure.
- For 2 or 2½-inch drop pipe.
- Can be connected to elevated storage tank.
- All working parts accessible.

Let Wards Completely Automatic Deep Well Water Systems relieve you from pumping and hauling water, make possible a modern bathroom—an indoor closet—an up to date kitchen and laundry!

Completely automatic—electric switch keeps pressure between 20 and 40 lbs. in the storage tank—plenty of water for every need. Only attention required is an occasional oiling.

Every worthwhile mechanical feature. Compact—the pump and motor require a floor space only 27 by 13 inches. The large capacity, heavily galvanized tanks can be placed at a distance from pump.

The entire pump is enclosed in a heavy cast iron housing that keeps out all dirt and grit, insuring long, trouble-free service. Motors are for 110 to 220 volt 60-Cycle Alternating Current. *State kind of current you use.* We can furnish motors for other voltages. Write for special prices.

IMPORTANT—READ THIS

If you have a well that does not fall in the classification listed here, or if you are in doubt as to the pump you need, write to Wards Engineering Service Department.

For frost-proof installation, head can be lowered into frost-proof pit. When this equipment is desired, *state so in order*, and add \$3.75. For deep well outfits with gasoline engines, write for special prices.

Shipped from Stock in Baltimore, Md. or Albany, N. Y. Low Freight Rates on Page 2. See Budget Plan on Page 3.

Complete Outfits—Pump 200 Gallons Per Hour

Deep Well Head with motor; 1-in. discharge opening; 2-in. drop pipe; 1½-in. brass cylinder; 42-gal. tank with water gauge; pressure gauge, also valves, pipe and fittings to connect pump to tank.

Article Number	Depth Well	Motor H.P.	Ship. Wt.	Price

WHAT YOU NEED FOR A DEEP WELL OUTFIT

- Pump Head as listed at left.
- Cylinder (Select size from listings on page 30).
- Tank as listed below.
- Pressure Gauge and Relief Valve.
- Fresh Water Valve (optional).
- Pipe and Pump Rod (from pump head to cylinder).

If you have any questions, write our Engineering Service Department

For Budget Plan See Page 3

DEEP WELL ACCESSORIES

Black or Galvanized Pressure Tanks

Heavily galvanized inside and outside upright type tanks tested to 150 lbs., hydrostatic pressure. Especially made to meet the requirements for Pressure Water Systems. Galvanized tanks are hot dipped galvanized inside and out—Black tanks are coated with black asphaltum paint. Both have electrically welded seams and have two ½-in. tapings for water gauge and extra 1½-in. tapping for air volume control. Gauge and air control not included. The 18, 42 and 82-gal. tanks shipped from Stock, other sizes shipped from Factory near Philadelphia, Pa. Pipe and fittings on Pages 21 to 23.

Anti-Freeze Rods—For Deep Well Pumps

481 HB 3148—Permits placing pumping mechanism 5 ft. below working head under frost line. Outfit consists of 4 support rods, 1 air pump extension rod, and 1 pump rod extension with all bolts for attaching. Instructions included. Ship. wt. 11 lbs. Mailable. Per set.....\$3.75

Water Gauge

81 HB 3150—Use for determining water level in Water System tank. Ship. wt. 2 lbs. 4 oz. For all sizes listed above...\$1.19

Relief Valve for Extra Safety

81 HB 3145—Prevents damage to piping from excess pressure. ¾-in. inlet and ½-in. outlet. Mailable. Ship. wt. 12 oz. Each.....80c

PRESSURE GAUGE

81 HB 3151—Registers 0 to 80 lbs. 2½-inch face marked for each 2 lbs. pressure. For ¼-inch pipe. Mailable. Shipping weight 12 ounces. Each.....95c

FRESH WATER VALVE

81 HB 3147—Permits pumping water direct from well instead of through tank. For deep well pump. Fits 1-in. pipe. Mailable. Shipping weight 1 pound. Each.....\$1.85

FOOT VALVES

81 HB 3146—Foot Valve, for ¾-inch pipe, fits inside 1½-inch pipe.....60c
81 HB 3149—Same for 1-in. pipe. Fits inside 1½-in. pipe. Mailable. Shipping weight each 12 ounces.....60c

ELECTRIC CELLAR PUMP

Pumps water quickly and automatically from flooded basements, pits, excavations, drains etc. Pumps 800 gallons an hour at 5-foot head—600 gallons per hour at 10-foot head. Completely automatic—starts and stops by itself. Can be used wherever electricity is available. Easily and economically installed. Quiet and economical in operation. Maximum head 20 ft.

Check These Quality Construction Features

- Powerful Remy electric motor for 110 volt alternating current or direct current.
- Norma Hoffman ball thrust grease sealed bearings.
- Oil-less bronze intermediate bearings.
- Stainless steel shaft will never rust out.
- Cast bronze impeller for greatest strength.
- Positive automatic action.
- Four part adjustable take up lower bearing—water lubricated Goodrich Cutler rubber.
- Positive, rugged type switch.

The above construction insures many years of economical, trouble-free service. Complete with heavy iron cover as pictured. For 110-volt, 60-cycle Alternating Current. Write for special prices for other voltages. Height overall 40 inches. Can be installed in 18 or 20 in. tile. Discharge outlet for 1½-in. pipe. Shipped from Factory near Detroit, Mich. Ship. wt. 70 lbs. Low Freight Rates on Page 2 under Pumps, Power. Wards Budget Plan, Page 3.

281 HB 3049—With cover as shown.....\$34.45
281 HB 3048—Outfit without cover.....29.95

\$34.45
Complete with Cover

AUTOMATIC CELLAR PUMP

- Automatically drains water from cellars, pits and small excavations
- Heavy copper ball float—resists rust
- Corrosion-proof bronze gauge strainer
- Convenient operating lever and valve
- Strong, heavy galvanized iron base

\$14.75

Uses water pressure to syphon water seepage from cellars, pits etc. Excellent where water continually seeps in to your basement. Simple and economical to install—you can do it yourself by following the simple instructions furnished. Once installed it costs nothing to operate. Quiet in operation. So designed that no water can remain in discharge pipe; consequently all danger of a frozen waste pipe is eliminated. Tapped for ½-in. supply, 1-in. discharge, 18 in. high. Base fits inside 12-inch drain tile. Requires water pressure of 20 lbs. or more for successful operation. 5 lbs. of pressure raises water one foot. Shipped from Stock. Ship. wt. 18 lbs.

481 HB 6737.....\$14.75

City Sanitation for Country Homes

WARDS SEPTIC TANKS for Homes with Running Water but No Sewers

Every home needs a modern bathroom. The cleanliness and personal convenience of modern plumbing is no luxury when Wards offer the finest type of Septic Tank at so low a price. Safe and odorless—and after it is installed you merely leave it alone, except for an occasional (1 to 5-year) cleaning. The extent to which it safeguards the health and well-being of your family is invaluable. Wards Septic Tanks are:

- 14-Gauge Copper Bearing Steel Electrically Welded for strength and long life.
- Designed for Greatest Efficiency—No Chemicals Needed
- Equipped with Built-in Connections to Fasten Pipe
- Recommended by Health Authorities.

Operates on the same principle as many of the disposal plants in America's largest cities. The sewage is purified by a natural process of bacterial action. So sanitary and safe that it may be installed within 10 feet of house without any odor. Recommended as health insurance for homes without sewers. It is simple to install, too—thousands of our customers have done it without any previous experience by following our simple instructions which accompany each order. It is only necessary to connect it to house drain using several lengths of soil pipe—ordinary tile is used for the disposal bed which should be at least 100 feet and drain away from well or water source. The entire installation for the average home should be completed in two days by two men. Once it is installed it requires practically no attention—depending on soil conditions. Cover is removable allowing easy access. Shipped separately from Factory near Philadelphia, Pa. or Buffalo, N. Y. Freight is fast and economical. See Freight Rates under "Septic Tanks" on Page 2.

Grease Trap

Placed ahead of the Septic Tank, this Grease Trap catches grease and other hard-to-dissolve particles. No chemicals necessary. 14-gauge copper bearing steel; cast iron cover; openings for 2-in. soil pipe. Size, 18 by 24½ in. high. Shipped separately from Factory near Philadelphia, Pa.

281 HB 8209—Ship. wt. 65 lbs. \$7.25

SANITARY... ODORLESS INDOOR CHEMICAL CLOSETS Even if Your Home Does Not Have Running Water

EASILY INSTALLED

\$5⁴⁹

You don't have to do without some of the modern conveniences that make a home more livable when an Indoor Chemical Closet costs only \$5.49 at Wards! That's less than an old-fashioned out-house. A blessing for homes, farms, churches, filling stations or schools; wherever there is no running water or sewers. Sanitary, odorless Chemical Closet made for indoor installation that costs little and gives great comfort the whole year 'round. A necessity where there are old or sick folks. Avoid winter discomforts. Constructed of heavy sheet steel smoothly enameled with removable 6-gallon container of galvanized steel. Easy to keep clean. The three to six-month supply of chemical which is furnished, eliminates odors and kills germs. (For additional chemical see below.)

Complete with seven 12-inch lengths of vent pipe with two elbows; wall collar for vent pipe (all handsomely enameled); toilet paper holder, toilet paper and 1 gallon of chemical (enough for several months), strongly constructed oak seat and lid.

Outer case is 14½ inches high and 13½ inches in diameter. Requires floor space 3 by 4 feet. Can be installed quickly by one man. Mailable.

When Purchasing for Schools Be Sure to Comply with All State Ordinances

481 HB 6447—Complete. Ship. wt. 39 lbs. \$5.49
81 HB 6444—Extra 3-inch Vent Pipe in 12-inch lengths. Ship. wt. 12 oz. 15c
81 HB 6450—Extra 3-inch Vent Elbow. Ship. wt. 8 oz. 15c

98c

Chemical for Indoor Closets

This quick-acting disinfectant chemical works perfectly in all types of chemical closets. Causes sewage to liquefy, making it odorless and sanitary. 1-gallon can Mailable, 5-gallon can Not Mailable. For Low Freight Rates see Page 2.

581 HB 6441—1-gal. Can. Ship. wt. 19 lbs. 98c
181 HB 6439—5-gal. Can. Ship. wt. 48 lbs. \$3.95

NO HAND EMPTYING

\$18⁴⁵

Gives all the comforts and conveniences of a regular water closet installation for homes without running water. It is easy to install, sanitary, odorless and does not require emptying by hand. Just run a pipe to an ordinary barrel buried upside down in the ground outside and the chemical action in tank, aided by agitator, causes sewage to liquefy and drain into barrel. Enough chemical is supplied to last a family of five persons 3 to 6 months. For additional chemical order No. 581 HB 6441 or 181 HB 6439 listed below at left.

You'll like its fine appearance too... the outer steel case and vent pipe are smoothly enameled; seat and cover are of stained and varnished oak. The tank below the floor line is 18-gauge steel and has a capacity of 25 gallons. Complete with 8 feet of vent pipe and elbow, adjustable galvanized roof flange, hood ventilator cap, toilet paper holder, toilet paper, one gallon of chemical and instructions for installing. Barrel, elbow and pipe to barrel not included. We do not recommend installation less than 100 feet from drinking water supply. Shipped from Factory near Buffalo, N. Y. Low Freight Rates on Page 2.

When Purchasing for Schools Be Sure to Comply with All State Ordinances

281 HB 6460—25-gallon tank, size 14 by 34 inches. Ship. wt. 125 lbs. \$18.45
281 HB 6465—65-gallon tank, size 24 by 36 inches. Ship. wt. 160 lbs. 28.95
Make up an order of \$20 or more, you can select a wide variety of merchandise—things for the house, or for the farm, and have them all come at once by making just one small down payment and paying a small amount monthly—see Page 3.

Radiator Nipple Wrench

Simplifies radiator repairs. Strong malleable iron. For ¾, 1¼, 1½, and 2-inch radiator unions. Ship. wt. 1 lb. 8 oz. Mailable but not prepaid.

81 HB 6789—Each \$1.00

Calking Irons

Made of solid forged tool steel. Ship. wt. each, 1 lb. Mailable but not prepaid.

81 HB 6787—Yarning iron. ¾-in. stock. 35c

IF YOU'VE EVER USED A WARD PUMP

**Hand Operated
Force Pump
4-Ft. Set Length**

\$8.95
Complete

Smooth, easy acting with a volume of water with every stroke. Just the pump you need for filling your stock tanks. Also tapped opposite the spout for 1 1/4-in. iron pipe for pumping to overhead storage tanks. Sprinkling hose connection furnished. Has sturdy cast iron base to hold standard firmly in place. Extra heavy cast iron standard, painted green; drip hole above cylinder to prevent freezing; 6-inch stroke and many other features. Your choice of cylinders, both give many years of satisfactory service. Iron with brass valve seat—brass-lined with brass cage and brass valve seat. Extra Quality Pump Leathers good for about 4 years' service. Read "How to Order" on next page. See Page 2 for low Freight Rates on Hand Pumps.

Pumps Complete With 4-Ft. Galvanized Set Length and Cylinders for Wells Up to 30 Feet

PUMP SUPPLIES—Save Time and Money by Ordering from Wards

Brass Well Cylinder

Cylinder body seamless brass tubing. Valves are all brass spring spool poppet type. With waterproof, frictionless cup leathers and red rubber faced poppets. Plunger valve and check valve may be removed without removing casing. Fitted for 3/8-inch pump rod. State inside diameter of bore.
581 HB 3157—Ship. wts. 5, 6 and 9 lbs.

Size Casing Necessary	Inside Diam. Bore	Stroke	Lgth. Barrel	Pipe Size Top Bottom	Price
-----------------------	-------------------	--------	--------------	----------------------	-------

Octagon Wood Pump Rod

First quality Ash. Shipped in random lengths of about 18 feet. Complete with couplings. Diameter of rod 1 1/4-inches. Ship. wt. per foot 6 oz. Not Mailable.
181 HB 6037—Per foot. 19c
181 HB 6038—Galvanized forged steel 3-hole couplings to fit pump rod above. Ship. wt. 8 oz. 65c

Iron Well Cylinder

Wards cylinders are furnished with brass valve seats to resist corrosion. Brass-lined cylinders also have brass cage. For hand use, and smoothness and ease of operation we recommend the 2 1/2 to 3-inch for wells 55 to 100 feet deep. 6-inch stroke in 10-inch size; 10-inch stroke in 16-inch size. Cylinders up to 3 inches in diameter are tapped for 1 1/4-inch iron pipe, 3 1/2-inch diameter for 1 1/2-inch pipe, and 4-inch diameter for 2-inch iron pipe. Single leather plunger on 10-inch size, and 16-inch cylinders have a double leather plunger good for about 4 years. Shipping weights: 14 to 18 lbs. Mailable. State size wanted. May be bought on Monthly Payments—see Wards Budget Plan on Page 3.

YOU KNOW HOW GOOD THEY REALLY ARE

HOW TO ORDER PUMPS

IN THE description of each pump we state the depth of well the pump will serve—the depth being the distance between the pump platform and the lowest water level in dry seasons. Any of the pumps listed on this or the opposite page are suitable for shallow wells, where distance from pump platform to water is 20 feet or less. Our set length pumps are also designed for deeper wells where distance from pump platform to water is greater than 20 feet.

In set length pumps we attach the cylinder on the drop pipe 4 feet below the base of the pump. Additional pipe of correct size should be ordered to reach from cylinder to a point at least 6 inches below the lowest water level. If well is over 24 feet deep order enough pipe and pump rod to lower cylinder into water sufficiently deep to keep cylinder submerged even in dry seasons. For wells over 100 feet deep order our extra heavy pump standard. Lift pumps will draw water only to the pump spout. When it is desired to force water to an elevated storage tank or pressure tank order a force pump.

Our Engineering Service Department will furnish you with any additional information on Pumps and Water Systems you may want. Write them—this service is free.

For WARDS BUDGET PLAN See Page 3

PITCHER SPOUT LIFT PUMP

Think of the convenience of having a pump in your kitchen. No more carrying water from the outside, summer or winter. No pails of water standing around and becoming warm and brackish. This pump is as much a necessity in your home as a cooking range.

Made of heavy iron with adjustable head with set screw so handle can be turned in any direction. For wells or cisterns up to 20 feet deep. Base tapped for 1½-inch iron pipe. Ship. wts. 20 and 22 lbs. Mailable.

HAND-POWER WATER SYSTEM

LIFTS WATER FROM 20 FEET—FORCES IT AS HIGH AS 80 FEET

Have running water in your home from wells, cisterns, lakes, or streams where lift is not over 20 feet, and horizontal distance to water not over 200 feet. Air and water pumped at the same time. Tank is tested to 75 lbs. working pressure. Pump has 3-inch brass lined cylinder with 3½-inch stroke. 1¼-inch suction pipe. Outfit includes pump, tank, water gauge, pressure gauge, drain cock, and all valves and fittings to connect pump to tank. Pipe connection to pumping fixtures, threaded ¾-inch. Pump and fittings shipped from Stock. Tanks are shipped from Factory near Philadelphia, Pa. or Pittsburgh, Pa. Low Freight Rates on Page 2 under Hand Pumps.

\$3950

For BUDGET PLAN See Page 3

Horizontal Force Pump

Pump only, same as shown in above outfit. With 1¼-inch suction and one-inch discharge opening. Air attachment can be had for pumping air with water. Ship. wts. 63 and 62 lbs. See Low Freight Rates on Page 2.

181 HB 5939—Horizontal Force Pump with air attachment. Each.....\$12.65
181 HB 5936—Horizontal Force Pump without air attachment. Each.....\$11.95

CENTRIFUGAL PUMP—Use with Engine or Tractor

For irrigating; for draining swamps and ditches and for filling large overhead tanks. Handles a large volume of water where suction lift is not over 20 ft. Bearings are all bronze. Outboard bearing is ring oiled. Extra long packing gland with grease cup. Pumps with 2½-inch discharge openings or larger have flanged openings. Smaller sizes have suction and discharge tapped for pipe connections. Send these specifications with order: horizontal length, and vertical height of suction and discharge pipes; motor or engine size, speed and pulley size. Shipped from Stock in Baltimore or Factory near Syracuse, N. Y. Low Freight Rates on Page 2 under Power Pumps. State size.

THRESHER TANK PUMP

Pumps 1000 Gallons per Hour \$995

Capacity 1000 gallons per hour at 30 strokes per minute. Fills tanks, empties cess pools, etc. where suction lift is not more than 20 ft. Made of high quality materials. 5-in. smooth iron cylinder with 3½-inch stroke. With strainer. Adjustable discharge spout tapped for 2 in. iron pipe; 2 in. hose suction; 2 in. iron pipe; 1 in. hose discharge. Ship. wt. 75 lbs.
181 HB 5927—Iron cylinder, polished smooth. Each.....\$9.95
181 HB 5928—Same, but brass lined.....12.45

Brass Cylinder FORCE PUMP

For wells and cisterns up to 20 feet deep. 3-inch polished brass cylinder. Tapped for 1¼-inch suction pipe and for one-inch pipe for pumping to tank, etc. Plain spout with standard hose thread.

Shipping weights 17 and 18 pounds.

Mailable.

481 HB 5916—With plain spout.....\$4.75
481 HB 5915—Same as above, but with brass faucet spout for ¾-inch hose connection.....\$5.25

BARREL PUMP

Pumps gasoline, oil, syrup, or other liquids out of barrels. Used for filling gasoline tanks on tractors, cars, etc. Hand Rotary type. Pumps 13 gallons per minute. Forces liquid 15 to 20 feet above pump. Strongly made of iron with 3-foot discharge hose and gooseneck. Hose is not affected by oil or gasoline. Fits steel or wood barrels. Ship. wt. 65 lbs. See Low Freight Rates on Page 2 under Hand Pumps.
181 HB 5895—Each.....\$16.25

WELL BORER

Bores wells up to 25 feet deep and 8 to 14 inches in diameter. Just what you need to dig through sand, sticky clay, mud, and gravel with the minimum of effort. Handy for digging post or foundation holes. Can also be used under water. Hardwood handle. Adjustable blade. Has iron pipe extension giving total length of 25 feet. You will find many uses for this Earth Auger around your home and buildings. Shipping weight 45 pounds. Not Mailable. See Freight Rates on Page 2.
181 HB 5838—Each.....\$6.95

HOT WATER . . . at the Turn

39 Gallons of Hot Water Per Hour With No. 1 Fuel Oil

\$5900

Cash Price

FOR BUDGET PLAN
SEE PAGE 3

Fahrenheit. It will heat up to 40 gallons of hot water an hour (80 degrees temperature rise), while burning about $\frac{1}{2}$ gallon of oil. When the tank is full of hot water, it burns with a low flame, consuming about $\frac{1}{8}$ pint of oil per hour.

Burner is equipped with a demountable firepot for easy cleaning, and a secondary air adjustment that adapts it to a wide range of drafts. The intense, white flame causes very little carbon—burners seldom need cleaning. The controls are "Genuine Detroit," by the same manufacturer who makes carburetors for some of America's finest automobiles. The 30-gallon steel tank is hot dip galvanized inside and out, and tested to 300 lbs. for 125 lbs. working pressure. Heavily insulated with 1 inch of flake asbestos. Finished in light green with dark green trim. Water connections for 1-in. pipe; oil connection for $\frac{1}{4}$ -in. pipe or $\frac{1}{16}$ -in. O.D. copper tubing. We recommend that you install a Safety Relief Valve with your heater; see Page 34. Pipe and fittings on Page 21. Ship. wt. 345 lbs. Low Freight Rates, Page 2. *Shipped from Factory in Bloomington, Ill.*

281 HB 6660—30-gallon capacity. Cash Price. \$59.00

FUEL TANK for WATER HEATERS

Here is a Wards Automatic Water Heater ideally installed with 55-gallon Storage Drum (No. 181 HB 6653) and Stand (No. 181 HB 6654) shown at right. Drum is 18 gauge black iron, size 35 by 25 in. Connect to heater with $\frac{3}{4}$ -in. pipe or copper tubing. Tank can be used with Fuel Oil Burning Heater or Kerosene Burning Heater.

181 HB 6653—55-Gallon Storage Drum. Ship. wt. 52 lbs. \$6.00
181 HB 6654—Stand for Drum. Ship. wt. 13 lbs. 2.75

KEROSENE is Clean...Economical!

Heater With Insulating Shell

\$18²⁵

BUDGET PLAN
SEE PAGE 3

- Stands on its own legs—total height 39 $\frac{3}{4}$ in.
- Asbestos-lined shell of steel is attractive in appearance.

It's the extra insulation of the thick shell of asbestos lined steel that makes this Kerosene Heater outstanding. More efficient—much faster! The adjustable wickless burner radiates heat on 315 inches of seamless copper coil, giving rapid circulation.

The insulated housing, adjustable burner, and bronze coil header make it extremely economical of fuel—so

efficient that this heater can heat 20 gallons of water an hour (60 degree temperature rise) on just a pint of kerosene. Burns 20 hours on a single gallon of kerosene at a low flame. One gallon of kerosene will heat 143 gallons of water at a temperature rise of 60 degrees Fahrenheit. It stands 39 $\frac{3}{4}$ inches high on its own legs. The shell is a handsome crackle finish; other parts smoothly enameled.

For use with 30 to 40-gallon range boilers. Tapped for $\frac{3}{4}$ -inch water connections. Shipped from Stock in Baltimore or Albany. Freight Rates on Page 2. For Wards Budget Plan of Monthly Payments, see Page 3.

181 HB 7813—Ship. wt. 55 lbs. \$18.25

Storage Tank Water Heater

\$32⁹⁵

CASH PRICE

\$4 DOWN
\$5 A MONTH

- 22-gallon tank is heavy gauge copper bearing steel—galvanized inside and out for trouble-free service.
- No range boiler needed.

You don't need a range boiler with this Kerosene Hot Water Heater! It's a heater and a storage tank in one. Heavily built throughout, this combination Water Heater and Storage Tank is made for the utmost economy in operation. The 22-gallon tank is tested to 300 lbs. pressure for 150 lbs. working pressure—a double safety factor.

Vaporizing chimney burner gives an intensely hot flame—heating more quickly and economizing on fuel. Heats over 15 gallons an hour (60 degree rise). One gallon of Kerosene will heat 170 gallons of water to a temperature rise of 60° Fahrenheit. Solidly mounted on three steel legs inside and out. Shipped from Stock in Baltimore or Albany. Freight Rates on Page 2. Budget Plan on Page 3.

181 HB 6675—Ship. wt. 115 lbs. \$32.95

Clean, Smokeless
\$14⁹⁵

- Simple to operate
- Attach to range boiler

Four $\frac{3}{4}$ -inch seamless copper coils. One gallon of Kerosene will heat 113 gallons of water to a temperature rise of 60° Fahrenheit. It burns 20 hours on a single gallon of kerosene at a low flame. The new type adjustable burner uses kerosene vapor and burns with a hot blue flame. Height 22 inches. For use with 30-gal. range boiler. Has black japanned cast iron jacket. Tapped for $\frac{3}{4}$ -inch iron pipe connections. Glass container holds 1 gallon of kerosene. Ship. wt. 48 lbs.

481 HB 7814 \$14.95

of a Faucet Whenever You Want it!

WARDS FINEST GAS HEATER

\$32⁷⁵
CASH PRICE

\$4 down
\$5 A MONTH

Consider these EXTRA QUALITY FEATURES and you'll know why this is the greatest Automatic Heater Wards have ever offered! Has adjustable Grayson Thermostat—water at any temperature between 80 and 165 degrees. Has central spiral flue that adds 300 square in. of heating surface—heats water quicker. The inner steel tank is tested for 300 lbs. pressure—copper bearing and twice as strong as necessary, giving added protection. The steel tank is covered with a full 1 1/2 inches of thick air cell asbestos—the finest insulating material known. Outside shell is heavy 9-gauge steel, finished in beige enamel with brown trim.

Endorsed by the American Gas Association—proof of dependability. It's made extra strong, extra dependable with every worthwhile feature that we could find. That's why this is Wards finest gas heater—even better than the one at the right.

Completely automatic and self-regulating—just turn on the gas, light the pilot, and forget about it. When the tank is full of hot water, the Thermostat turns the flame down low to save fuel—as water is withdrawn, the Thermostat turns on full flame assuring steaming hot water at every faucet at any hour of the day or night. Time-o-stat Safety Pilot immediately shuts off gas should pilot accidentally go out. Tapped for 1/2-inch gas connection and two 3/4-inch water connections. Burns natural or manufactured gas. Shipped from Stock in Baltimore or Albany. Freight Rates, Page 2. For Wards Budget Plan, see Page 3.

AUTOMATIC GAS HEATER

• Fully approved by the American Gas Association
• 1-inch thick rock wool insulation between inner and outer steel casings

\$28⁹⁵
CASH PRICE

\$3 down
\$5 A MONTH

A big, full-sized, completely Automatic Gas Water Heater at a price made possible by Wards Mail Order economies. Heating capacity enough for the large home but so inexpensive to operate that it is practical for even the smallest family.

Light the pilot and you need never think of it again. A thermostat control maintains any desired temperature, automatically turning on or shutting off the gas as it is needed to heat water. You always have plenty of hot water for every purpose—for dishes, shaving or a bath. Yet because of the automatic control the cost of operation is little. A Safety Pilot Control automatically turns off the gas if the pilot is extinguished.

The 19-gallon inner tank is heavy copper-bearing steel, galvanized inside and out to prevent rusting. The large capacity burner covers the entire bottom of the tank with a hot, blue flame and the inch-thick rock wool insulation holds heat for a long time. The outer casing of steel is handsomely enameled Ivory with attractive black trim.

Two water connections are tapped for 3/4-inch iron pipe; the gas for 1/2-inch pipe. Burns natural or manufactured gas, but not gasoline. Shipped from Stock in Baltimore or Albany. Freight Rates on Page 2. For Wards Budget Plan of Monthly Payments, see Page 3.

181 HB 6711—19-gallon capacity. Diameter 15 inches. Height 57 inches. Ship. wt. 185 lbs. \$28.95

181 HB 6712—27-gallon capacity. Diameter 18 inches. Height 64 inches. Ship. wt. 260 lbs. \$34.95

DEPENDABLE GAS COIL HEATER

\$3⁹⁵ • Drip pan protects floor
• Improved burner gives intense hot flame and complete combustion

Heavy cast iron jacket and tight-fitting door are handsomely black japanned. The heavy, seamless 3/4-inch copper coils heat water economically and quickly. You can have shaving water in just 10 minutes with this heater. Water connections are threaded for 3/4-inch iron pipe. The gas valve is tapped for 1/2-inch pipe. Approved by the American Gas Association. Will burn either natural or manufactured gas. Easily attached to Range boiler. Drip pan catches condensation and dirt. Small cost for ample supply of hot water for the average family.

FOR 30-GALLON RANGE BOILERS

161 inches of seamless copper coils. Height overall 25 1/2 in. Ship. wt. 29 lbs. *Mailable.*

481 HB 7822—For use with Natural Gas. \$3.95

481 HB 7823—For use with Bottled Gas. 4.45

STORAGE GAS WATER HEATER

\$15⁹⁵

12-gal.

• Heavy Gauge Steel tank tested to working pressure of 150 pounds and mounted on three steel legs

• Tank is galvanized inside and out to prevent rust
Heats water quickly and economically. In ten minutes—enough hot water for the dishes. In 30 minutes—enough for the bath. The burner concentrates a hot blue flame on a special riser pipe so that water is heated quickly throughout the entire tank. No range boiler is needed, but 3/4-inch openings are provided to connect the heater

in line with the furnace or range boiler if you wish. The extra heavy galvanized steel tank is tested to 150 pounds pressure and mounted on strong steel legs of a convenient height. The heater burns either natural or manufactured gas but will not burn gasoline. *State Size.* For Freight Rates, see Page 2. For Wards Budget Plan, see Page 3.

PRESSURE-TESTED RANGE BOILERS Galvanized Inside and Outside

It's Clean Water You Want . . . as Well as Hot Water!

\$6⁹⁵

Without
Fittings

Hot water will be clean, and rust-free if it comes from one of these range boilers because they're hot-dip galvanized inside and out. The Boiler pictured at the right is electrically welded—the one at the left is both electrically welded and riveted for even greater strength and longer life. Standard weight boilers are pressure tested to 150 pounds for 85 pounds working pressure, the extra heavy weight to 250 pounds for 150 pounds working pressure. Boilers with fittings include stand, cold water tube and four 1-in. couplings. Tapped for 3/4-in. pipe. *State Size. Shipped from Stock in Baltimore or Albany.* Freight Rates under Range Boilers on Page 2.

EVERDUR RANGE BOILER

Rustproof—Leakproof
\$28⁹⁵ **\$3 DOWN**
CASH PRICE Balance Monthly

Plenty of clean hot water . . . for bath, kitchen and laundry . . . when it comes from a rust-proof tank of welded EVERDUR.

Made of a rust-proof alloy of copper, silicon and manganese that combines the corrosion resistance of copper with the strength of steel. Tinned on inside.

Most Economical in Long Run
Isn't it worth a few dollars more to install an EVERDUR range boiler and be able to completely forget it while it goes on giving the best of service year after year? There are no rust weakened tanks to be replaced with attendant expense, no rust colored water to worry about.

Our low price means the EVERDUR is the most economical range boiler in the long run. The sturdy EVERDUR tank is tested to withstand 200 pounds pressure. 85 pounds working pressure. Tapped for 1 in. pipe. Height 60 inches. Diameter 12 in. Capacity 30 gallons. For BUDGET PLAN See Page 3.

Shipped from Stock in Baltimore or Albany.
181 HB 6752—Boiler with couplings and cold water tube. Ship. wt. 75 lbs. \$28.95

RANGE BOILER with JACKET

30-Gallon Size **\$9⁸⁵**
Complete

Saves Fuel—Saves Money

It doesn't take the asbestos insulated range boiler long to pay for its cost with the fuel that it saves. This fuel saving is accomplished by the heavy 3/4-inch thick air cell asbestos jacket. The dead air cells in the jacket itself form a most efficient type of insulation. It holds the heat in the tank where it belongs. The water does not cool so rapidly and requires less fuel to keep it hot. Three brass draw bands and 2 pounds of asbestos cement for covering top of tank are furnished.

Tank Is Pressure Tested

The heavy gauge steel tank is electrically welded at all seams and galvanized inside and out to prevent rust. Tested up to 150 lbs. pressure; 85 lbs. normal working pressure.

Take advantage of Wards BUDGET PLAN of Monthly Payments if you wish. See Page 3. Shipped from Stock.

Size

Boiler Covers

Heat the water in the boiler—not the basement. In an unprotected tank hot water loses a large percentage of its heat through radiation. This flexible air-cell asbestos cover works much on the same principle as a vacuum to retain the heat. It pays for itself in the fuel that it saves. Easy to install. Three brass draw bands and 2 lbs. of asbestos cement to cover the top of the boiler are furnished. *Mailable.*

81 HB 5415—
Ship. wt. 7 lbs. \$3.75

CLEAR..SOFT WATER

...no matter where you live!

The hardest water becomes velvety smooth—soft as rainwater after passing through Wards Softener. The mineral inside absorbs all the irritating hardness. No chemical is added. Nothing to wear out. The entire cost of operation is the price of a few pounds of salt used occasionally for flushing.

\$48⁴⁵

For DISHWASHING—

With soft water the task of dishwashing is lightened. Less soap is required, and no hand roughening chemicals are necessary. China and glassware sparkle; and silverware is easily polished. No greasy residue to wipe off.

For LAUNDERING—

Only a fraction of the usual amount of soap is necessary with soft water. It forms instantaneous suds that clean. Fine silks and fabrics last longer and retain their luster and original colors. Leaves no soap curds in fabric.

For COOKING—

Soft water is far superior as there are no harsh minerals to destroy the natural food flavors. Prevents lime scale in teapots and other cooking utensils. It gives a greatly improved flavor to coffee and tea.

In the BATHROOM—

It gives you the genuine comfort of a real soft water bath. The soap provides a creamy lather for shaving and shampooing. It leaves the hair soft and silky and helps retain the natural beauty of the skin.

IMPORTANT

You may be using hard water without knowing it—use soft water once and you'll wonder how you've ever done without it. Let us know the degree of hardness of the water in your locality. Your State Dept. of Health will give you this information. If not send us a sample of the water, then we can recommend the proper softener. Tell us also the approximate amount of water you use.

Tank Tested to 100 Pounds Pressure

Built to last a lifetime. Heavy tank is 10 gauge steel for the two smaller sizes and 8 gauge steel for larger sizes. All seams are welded. Your choice of a tank that is porcelain enamel lined inside only, or a tank that is galvanized both inside and out. Both tanks are finished outside with an attractive spring Green auto enamel paint trimmed in jet black. If hardness of water is 20 grains (see left) the 20,000 grain size will soften 1000 gallons before salt water flushing (which you can easily do yourself) is necessary. Instructions included. For use only where water pressure is available. Budget Plan on Page 3. Shipped from Stock in Chicago, Ill. For Freight Rates See Water Softeners on Page 2.

EVERYTHING YOU NEED for a Plentiful Supply of HOT WATER

- COAL BURNING TANK HEATER
- 30 GALLON RANGE BOILER With Insulating Jacket and Stand
- PIPE and FITTINGS as Follows:

8 feet of 1-inch Galvanized Pipe.
Four 1-inch Galvanized Elbows
Two 1-inch Galvanized Unions
Three 1-inch Galvanized Nipples
Two 3/4-inch Galvanized Boiler Supply Fittings
One 1/2-inch Cold Water Tube
8 feet of 5-inch Smokepipe
One 5-inch Elbow
One 1/2-inch Boiler Drain Valve
One 1x1/2-inch Galvanized Bushing.

for Only **\$17⁵⁰**

This economical Outfit solves your hot water problem for all times. The 70-gallon capacity tank heater furnishes ample supply of hot water for a large family for about a bucket full of coal per day. Used with the 30-gallon insulated storage Range Boiler it assures you of an ample supply of steaming hot water for bathing, laundering, dishwashing and all household needs. It comes complete with 8 feet of smokepipe and one elbow, range boiler stand, and all necessary pipe and fittings for the ordinary connection of the heater to boiler—all at this one low price. Instructions for installing included. Tank heater is 21 inches high—it is our number 181 HB 8000 described in detail on Page 33. The 30-gallon range boiler is galvanized inside and out and is furnished with three-quarter inch thick air cell asbestos jacket which keeps water in the tank hot for a longer period of time—it is our number 181 HB 7011 fully described on Page 34. Shipped from Stock.

181 HB 7009—Ship. wt. complete 260 lbs.\$17.50

Wards Tank Heater REGULATOR

\$3²⁵ Complete

With Wards Regulator on your coal tank heater you are assured of hot water instantly whenever you want it... any hour... day or night. Automatic, trouble-proof and simple in operation. This regulator eliminates the constant attention, the drudgery and the uncertainty of hand operation.

The picture at the left shows Wards Regulator installed on an ordinary coal heater. The regulator is on the tee connection between the heater and the range boiler, and a length of chain is provided to reach down to the draft door of the heater. The regulator arm opens or closes the draft automatically, whenever necessary, to maintain a uniform temperature of water.

By eliminating useless overheating, Wards regulator saves on fuel. It is often necessary to tend the heater only once every 24 hours unless there is an unusually large amount of hot water used. Insures CLEAN HOT WATER. The regulator prevents boiling which precipitates minerals in the water.

The weight on the lever arm can be adjusted to maintain any desired temperature of water. Regulator is of ground steel, complete with chain and hook, ready to install. Instructions included. Threaded for 3/4-in. connection. Ship. wt. 6 lbs.

81 HB 7857—Shipped from Stock\$3.25

NO NEED TO WAIT—USE WARDS BUDGET PLAN

You know... by experience... that Wards prices are right. Nowhere can you buy quality merchandise at lower prices. And nowhere can you find a more reasonable plan of budgeted Monthly Payments than Wards offer. It permits you to buy now... pay as you use and enjoy your merchandise. See Page 3 for complete details.

Save 20% to 40% by Installing Your Own Heating System

Carefully Drawn Blueprints

Step-by-Step Instructions

Wards Engineers Will Help You

Charles Annis of Hymera, Indiana, figures Wards Engineering Service saved him \$199 on his furnace. Another concern quoted \$275 for a pipeless furnace, installed. Mr. Annis bought a Wards Pipeless for \$76, and from instructions we provided, made the installation himself.

Wards Engineering Department will give YOU the same practical help in cutting labor costs. We maintain a staff of keen, experienced engineers, at your service to give you any help you require in selecting, planning and installing your heating plant.

They will analyze your heating needs and tell you exactly what size furnace will do the best job for your home. And they will give you a FREE estimate of its cost.

When you order, they will lay out the entire plant for you. If you propose to do the work of installation yourself, they will provide you with whatever instructions are needed to enable you to do the job easily and well—a complete set of blue prints—simple, fully illustrated instructions—and any additional helps you need. The practicability of these instructions is proved by the hundreds of Wards customers who, without previous experience or more than ordinary deftness with tools, install their entire heating plants quickly, easily and satisfactorily.

Wards Will Estimate Your Heating Requirements and Quote You Exact Prices FREE

Let us quote you an estimate of the cost of your new heating plant. We make it particularly easy for you to secure this service. The Heating Information Blank No. 12681-3, when filled out, gives us all the facts we need to make a scientific and accurate analysis of your heating needs—exactly the same that you would secure should you hire a high priced heating engineer to look over your home and advise you on what type of furnace to buy.

Read the questions asked in Wards Heating Information Blank closely. Fill them in fully and as accurately as possible. Make measurements with extreme care. From this information we will quote your costs, determine what size furnace you require, and when you are ready to buy, draw up your blue prints and fill your order. Your care now will insure your complete satisfaction in your heating plant when it is installed.

Read What Others Say About Wards Heating Plants

I have been intending to tell you how nice my furnace is working. It cost us only \$15 for coal so far this winter. I estimate it has saved us \$80 in fuel since I installed it, Jan., 1932. We have had 100% better heat and there is not a place in the house that it fails to keep comfortable even in zero weather.

J. J. ERVIN,
Weston, W. Va.

We bought a Pipe Furnace from you last fall and we are very well pleased with it. We installed it ourselves and found it very simple—just followed your instructions. It is a very well built furnace and keeps our house warm easily and evenly. Yours is the very best furnace for a large house.

C. K. DICK,
Frazer, Mont.

I am very much satisfied with my hot water heating plant, and also with your courtesy and generous dealing with me. I installed the plant from your blue prints, doing all the work myself without any difficulty at all. And in spite of the fact that I am not a steam fitter, it works O.K.

GEORGE W. BURNETT,
Endicott, N.Y.

We think a lot of our Wards Pipeless Furnace. It is heating five rooms easily and our fuel cost is cut in half. I feel I made a good investment when I bought from Wards. Another company wanted \$275 to install their furnace in my home. I got Wards for \$76, and installed it myself, saving almost \$200.

CHARLES ANNIS,
Hymera, Indiana

WARDS WARM AIR PIPE FURNACE

THE principal advantages of a pipe furnace are the almost instant heat it gives when a fire is started, the ventilation provided from constant air circulation, and the register adjustments which make it possible to control the temperature in each room individually.

When air is heated it expands and becomes lighter than the cold air surrounding it. This principle is well illustrated by the warm air balloons sent up on the 4th of July. In these the warm air is imprisoned in the paper balloon, and in rising carries the balloon with it.

A Constant Circulation of Heated Air

A pipe furnace consists of an efficient heater surrounded by a closed casing of sheet steel. From the top of the casing, pipes are taken to registers in the different rooms of the house. Return, or cold air pipes are connected with registers in the floor of one or two downstairs rooms and lead to the bottom of the furnace casing.

When a fire is built in the furnace, air in the casing is heated and rises through the warm air pipes to the rooms, being replaced by the cold air which enters the casing through the cold air return pipes. This circulation provides for healthful ventilation in every room.

Healthful Moist Heat All Winter Long

Every Wards furnace is equipped with a built-in water pan. As air circulates through the system it absorbs moisture from the pan and overcomes much of the excessive dryness that is always caused when cold outside air is raised to 70 degrees. In the installation shown at the right an additional humidifier has been installed in the top of the casing. This will moisten the air still more, and is particularly desirable in climates where the winters are severe.

In this installation an automatic heater is connected to the boiler to supply domestic hot water. Since the burner in the heater operates only when the furnace is not in use, this hook-up combines the economy of a furnace coil with the convenience of an automatic system.

The cost of a complete installation is much less than you would expect, especially when the materials are purchased from Wards by mail. Buy on Wards Budget Plan if you wish, See Page 3.

WARDS WARM AIR PIPELESS FURNACE

A PIPELESS furnace combines the instant heat and good ventilation of a pipe system with extreme simplicity and economy. It is particularly suited for a small home with large, open doorways between the rooms.

A pipeless furnace operates on the same principle of ascending warm air as a pipe furnace, with this difference: circulation to and from one centrally located register is used to heat the entire home.

The Simplest of All to Install

A pipeless furnace has the same efficient heater used in a pipe furnace, but is surrounded by a double casing. This casing is so arranged that heated air from the stove can rise through the register *inside* of the ring, while cold air from the home can descend to the bottom of the casing (and thence up past the stove to be heated) through the openings in the register *outside* of the ring. If you study the arrows in the installation shown here, you will see that the warm air rises and is carried all through the house. As it cools it will settle to the floor and down through the outside portion of the register where it is again heated and circulated through the home.

Has All the Famous Ward Features

A Ward Pipeless Furnace is built of exactly the same high quality materials as the Ward Pipe Furnace. As a matter of fact, the furnace proper, or heater, is exactly the same in both. The casing is the only difference.

Careful attention has been given to all details of construction, assuring gas-tight joints which will prevent dust or gas from escaping into the circulating air.

Either system, when installed as described in our instruction books, will give an abundance of clean, healthful heat. The difference in cost lies only in the fact that a pipe furnace is equipped with pipes leading to each room.

In this installation an insulated range boiler has been connected to the furnace and equipped with an auxiliary heater which may burn either oil or gas. This arrangement enables you to have plenty of hot water both in and out of the furnace heating season.

"Show 'em the Inside" said One of Our Engineers "Then They'll Know Why *Wards De Luxe* HAS GREATER HEATING CAPACITY"

Look at that husky fire-box; that massive, 1-piece radiator, the extra weight, thickness and other features that will stand up under years of heavy firing.

① ONE-PIECE RADIATOR

We've made it of massive size... extra large and very deep... to expose the greatest possible heating surface to the air. Being of cast iron it holds the heat for a long time. Its one-piece construction prevents any gases escaping and becoming mixed with the air you breathe.

⑥ SMOKE CONSUMER

It acts somewhat like a set of "lungs" for the De Luxe... it actually "breathes" a blast of fresh air over the hot coals and causes a secondary combustion of the volatile gases. This action reduces smoke, increases heating efficiency and burns the gases that otherwise would be wasted.

② COMBUSTION CHAMBER

Here's the "heart" of the furnace... and the massive combustion Chamber of the De Luxe provides abundant space in which the fuel gases may be completely burned and the heat units used to heat your home—instead of being wasted in the form of soot and smoke.

⑦ LARGE ASHPIT

Removing ashes isn't much of a job anymore if you own a De Luxe. The one-piece ashpit extends through the front and has a large door for the easy removal of ashes. Surface ground door and frame are fitted paper tight to eliminate excessive drafts. It's extra deep, too.

③ SLIP-ON FRONT

It's as easy as rolling off a log to slip this front into place. No bolts or cement needed... yet no dust from the cellar... no smoke nor gas from the fire can get into the warm air pipes at any time. It's movable too, to eliminate cracking caused by heat expansion.

⑧ WAIST HIGH SHAKER

Throw away your gas mask when you shake the De Luxe. No bother, no mess, no dust... you don't even open the door. Remember the old type? You opened the door, knelt down, used an awkward hand crank and held your breath or almost choked from the dust.

④ TWO-PIECE FIREPOT

The fire pot of the De Luxe is heavily ribbed to add strength and radiating surface. Smooth inside to promote clean fire and easy elimination of ashes. It provides an extra large heating surface because there is only two inches difference in the diameters of the top and bottom.

⑨ ONE-PIECE BASE

Like the Rock of Gibraltar, this single massive casting, combining ash pit bottom and base ring, forms a firm solid foundation without joints and provides a permanent base. The ash pit bottom slopes up at the front and permits watering the ashes.

⑤ TRIANGULAR GRATES

Regarded by many as the most durable type. The bars are especially heavy yet are easy to shake. As they revolve practically all clinkers are broken. Grates are easily removed for cleaning by releasing two easily accessible catches at front.

⑩ SAFETY CLEANOUT

The radiator casting extends through the front and forms a gas and dust-tight joint. A gravity door at cleanout opening eliminates the necessity of removing the bolts found on most types of furnaces. And the wide opening makes cleaning easy.

Size for Size—

Wards De Luxe Will Heat More Rooms

And here's the most important news of all. According to the Standard Code (the yardstick of the warm air heating industry)... the heating capacity of the *Wards De Luxe* is so much greater than most any other make that, for example, our 20-inch firepot size will heat a home that would ordinarily require a 22-inch firepot. And that's true in all four of the most popular sizes. There are a lot of other features too—particularly the castings. We just wish you could feel their thickness and weight. They're far heavier and thicker than most; that's mighty important because extra weight and thick-

ness mean years added to the life of the furnace. The castings are smooth too... When you run your hand down the inside you'll notice how smooth it feels and how tight the deep cup joints fit... no gas is going to escape through them and contaminate the air you breathe. The feed door is oversize to permit easy firing. There are two water coil openings so you can connect your hot water heater on either side without using a lot of extra pipe. The built-in humidifier is higher in the back so that the overflow spills outside the furnace instead of inside.

SEE FOR YOURSELF HOW THE *Wards De Luxe* FURNACE EXCELS

For any fair comparison of furnaces the two most important features to consider are the Actual Weight and Furnace Capacity rated in accordance with the Standard Code, the official heating guide of the Warm Air Heating industry. Extra weight and thickness increase the life of the furnace.

\$5 A MONTH

SEE PAGE 3

Impartial comparison of the Wards De Luxe Pipe Furnace with other well-known makes revealed this startling fact: Our furnace had a greater heating capacity—Our furnace was heavier—better able to stand hard use. And finally, our furnace was lower priced!

Heat can't escape from a Wards De Luxe. A double galvanized casing seals it inside, forces a strong warm current into every room in the house. The short inner-casing allows plenty of room for clean, fresh air to pour in from cold air ducts. Before it is heated and swept into the rooms, it absorbs healthful moisture from the built-in water pan.

Plenty of Moist Heat

The Wards De Luxe Pipe furnace is made in five sizes to heat homes or other buildings with 4 to 11 rooms. Notice the cut away view on the opposite page. Turn to Page 37 and read how an efficient warm air system operates. Then decide to bring your family the healthful comfort of clean, abundant moist heat. Five dollars down and a few dollars a month is a small price to pay for cold-weather comfort. See Page 3.

Complete with casings, bonnet without collars, cement, check draft, regulating dial with chain, pulleys, etc. and instructions for installing and operating. Top or bonnet furnished without collars or holes for pipes, so that you can arrange for pipe connections to fit your needs. Water coils, smokepipe, elbows, dampers and collars are extra equipment, they're shown on Pages 44, 45 and 49.

We Furnish Blue Prints-Floor Plans-Everything So You Can Set It Up Yourself

Wards Engineering Service Department will furnish you complete information for making your installation. To estimate your heating requirements we must know the space to be heated. A convenient Heating Information Blank is enclosed. See Page 36. Fill in all the infor-

mation asked for in this form.

When you return it to us, we will give you a free estimate of cost. Then, when we receive your order, we will make up a set of blue prints showing how to make the installation. There is no charge for this service.

Here is an actual photograph of a Wards De Luxe Furnace as installed in the 2-story house of Mr. Peter Ahnen at 4922 Byron St., Chicago, Ill. The furnace was put in shortly before a recent spell of zero weather and Mr. Ahnen reports that it delivered "plenty of heat," keeping the entire house comfortable.

BUILT LIKE A BATTLESHIP

Gas-tight, boiler plate steel body. Extra heavy. Cold riveted, electrically welded.

Extra heavy, 12-gauge steel radiator, cold riveted, electrically welded.

Large capacity Humidifier, high up for efficient evaporation.

Double Feed Doors. Extra Large. Take extra big blocks of wood or coal.

Firepot lined with Cupola Fire Brick to withstand tremendous heat. Third row in back protects body.

Easily operated Duplex Grates. For all kinds of solid domestic fuel.

Boiler plate Steel, riveted and welded to prevent soot, dust and fumes from escaping into your home. Ideal for Gas and Oil Burners

Modern—Efficient—Economical

You'll be impressed with the outstanding qualities of this Wards Steel Furnace. The entire inside—shape, materials and construction—is radically different from ordinary types of furnaces. It represents new design at almost every point in the construction. Note how the combustion chamber and radiator are riveted and welded into one solid unit as sturdy as a battleship. It's rigid and strong—built for many years of service and heating comfort. The seams are so tight no fumes, gases, soot or dust can escape into the house and become mixed with the air you breathe.

Notice also the heavy Cupola fire brick lining in the firepot section of the drum. This brick is two inches thick, of the finest quality obtainable; there's a third row in the back to protect the furnace body from becoming overheated. And here's an important feature: you can use any kind of fuel with Wards All-Steel Furnace.

WARDS HAS STEEL FURNACES TO HEAT FROM 5 TO 13 ROOMS

The prices quoted below include the furnace, complete with heavy galvanized casings, bonnet without collars, cement, check draft, regulating dial with 25-foot chain, pulleys, poker, shaker handle and a complete instruction booklet for installing. Water coils, smokepipe, elbows,

pipe and dampers are priced on Pages 44 and 45. For BUDGET PLAN see Page 3.

Shipped from Warehouse in Southwestern Ohio or stock in Chicago. For Estimated Freight Charges see Furnaces on Page 2.

Rated According to Standard Heating Code

The Standard Code, a set of rules to govern the proper installation of Warm Air Heating Systems, was developed to protect the public against wrong installations. It is approved and issued by authority of: National Warm Air Heating and Ventilating Association, Inc.; The American Society of Heating and Ventilating Engineers; and National Association of Sheet Metal Contractors. It is America's highest Authority on warm air heating.

The ratings given at the left are based on the Standard Code Ratings. This means that the proper size furnace positively will heat your home if installed according to the Standard Code specifications. Note also the many other superiorities listed above at the left. All of them combined make Wards Steel Furnace the best that modern engineering and manufacturing skill can produce. And to be sure we overlooked nothing... the design is especially adapted for efficient operation with either gas or oil burners.

Wards New Pipe Furnace

It's Really Modern

Wards Do Some
Designing . . .

Proving That an
Efficient Furnace
Can Be Good Looking

\$66.95

Cash
Price

\$6 Down

See Page 3

NEW! MODERN! Wards offer a furnace as up-to-date as tomorrow's news! We've completely redesigned old furnace styles—kept every worthwhile construction feature—but made the furnace a thing of beauty. NOW your basement becomes a playroom, a place for your games and your guests.

To start with, we've made the furnace rectangular, instead of the out-moded round shape. We've covered the metal casing with a beautiful green crystalline coating, sprayed on and oven baked to a hard surface. Smoke tight . . . gas tight . . . dust tight, the furnace does not leak dirt and is as easy to clean as any ordinary piece of furniture. A damp cloth makes its crystalline coat gleam. Metal corner posts and black trim accentuate its beauty.

Of course, the "insides" of a furnace are still as important as ever. These new furnaces embody every worthwhile feature of fifty years' experience in heating engineering. The massive inner castings are of cast iron, proved to be the most durable and at the same time the best material for furnace construction. One piece radiator and leak-proof construction make the furnace smoke-tight, dust-tight, soot-tight. More efficient—actual tests prove that a shovel of coal goes farther in these new furnaces. There are two reasons for that: One lies in the heavier, tighter construction . . . a construction that holds and radiates heat longer . . . cleaner, more healthful, too—no soot or gases can leak through the house. The second reason, this new furnace is really a bigger furnace than most other makes. The firepot tapers out so that it holds a bigger bed of coal—the fuel is burned slower—every last bit of heat is extracted. **Furnaces Shipped from Factory near Birmingham, Alabama. Wards Complete Winter Air Conditioning Unit

Everything you desire in winter comfort! This system warms, cleans, circulates, moistens and purifies the air in your house. Complete unit consists of: (1) Wards new, modern rectangular Furnace described above—the finest furnace we have ever presented; (2) Wards new Air Circulator and Filter, described below, to force even temperatures throughout the house and to clean and purify the air; (3) Wards Automatic Drip Humidifier, described below at the right, to give you healthfully moist air.

The furnace included in this unit has a 20-inch firepot. Wards can furnish complete units of larger size at the lowest possible prices. Write for quotations.

Furnace shipped from Factory near Birmingham, Alabama; Air Filter and Circulator shipped separately from Factory in Chicago; Humidifier shipped separately from Stock. Estimated Freight Charges on Page 2.

281 HB 2990—Complete unit (furnace firepot 20 inches). Ship. wt. 1292 lbs. . . . \$153.00

Wards can furnish a Thermostat and a Blower Control to make your unit completely automatic—electrically controlled. The thermostat operates the furnace draft and damper to maintain any house temperature desired (see Thermostats on Page 51). The blower control synchronizes the blower with the furnace—speeds up the blower when the furnace is hottest. For Thermostat, state in order and add \$14.95. For Blower Control, state in order and add \$8.95.

See Page 3

How the Blower Works

Cold Air is drawn into the blower from the return ducts. The air is first cleansed and purified by passing through dirt and germ removing filters—then sent into the furnace casing by the sturdy centrifugal fan. The air is thoroughly warmed—as it passes over the hot castings, then sent out through the house.

Banish Cold Spots!
Breathe Clean Air!
Increase the
Efficiency of Your
Furnace!

Wards new, improved Air Filter and Circulator gives the highest possible efficiency to your system—whether new or old—and at the same time cleans and filters the air you breathe. This blower and filter is a part of Wards complete system shown above, but can be installed on any furnace to give you two of the most vital features of complete air conditioning—forced circulation and dust filtering.

Forced air circulation—provided by an ample centrifugal fan, operated by a sturdy electric motor—gives you even temperature throughout the house. There are no cold rooms . . . no cold spots . . . no stratification of heat. Compact, unit is easily installed on your furnace. It is 32 inches high, 33 inches wide, and extends out 27 inches. Attractive green crystalline enamel finish.

The air circulator shown here is ordinarily used with a 20 or 22-inch furnace. For lowest quotations on larger sizes write to Wards Free Engineering Service Department.

Operates on 110 to 120 volt, 60-cycle A.C. State size.

Shipped separately from Factory in Chicago.

281 HB 8470—Capacity of 1200 cubic feet per minute. Shipping weight 180 lbs. . . . \$80.00

For highest efficiency of your air circulator, install Wards automatic Blower Control. Located in the bonnet of the furnace, this control synchronizes the blower with the furnace—speeds up the blower when the furnace is hottest. Completely automatic. For blower control, state in order and add \$8.95.

\$7.95

Complete

Wards Automatic Drip Humidifier

Banish daytime drowsiness! Wards Automatic Drip Humidifier will make the air in your home healthful, exhilarating and bracing . . . because it

provides an adequate proportion of moisture. Doctors and scientists agree that a temperature of 70 degrees with 40 to 50 percent humidity helps prevent head colds, sore throats and other ailments. Moreover moist air eliminates cracking of walls, spreading of windows and floors and damage to furniture through drying out.

It slips into the top of your furnace casing. The flow of water is thermostatically controlled so that the hotter the furnace, the more moisture is provided. Water is distributed to the pan by the drip method, and can be adjusted to any desired amount. All parts are of brass and aluminum except the cast iron pan. Instructions for installing included. Will fit any pipe furnace. Ship. wt. 27 lbs. **Mailable.**

CBA MONTGOMERY WARD 41

And if You Prefer a PIPELESS FURNACE—

Here is a *Wards De Luxe*

with 2-Piece Firepot and Triangular Grates

\$64⁵⁰
CASH
PRICE

\$6 down
See Page 3

One of the most economical of all heating plants. The first cost is the last. No pipes to buy nor expensive labor costs. Install the unit in your basement—make an opening in the floor above for the warm air register. Regulating dial upstairs makes it easy to operate check damper and draft.

Has All the Famous De Luxe Features

This is the same Wards De Luxe shown on Page 38. Warm-air register and a triple casing of heavily galvanized sheet-steel converts it into a Wards De Luxe Pipeless Furnace. Cold air from your house descends through the outer casing, moves around the shorter inner casing where it is heated. Then it surges upward in a blast of warm air through the central register and circulates freely among the rooms. An additional register can be installed in the floor of a 2-story house to better conduct heat beyond the first floor.

Here's How to Get Best Results

To get best results from a pipeless furnace your house should be constructed to permit free circulation of air. It should be compactly arranged; rooms should have large doorways. Send us a description or a rough sketch of your room arrangement and we will tell you if this type of heating is suited to your home. See Page 37 for further information on the Pipeless Furnace.

Made in four sizes to heat homes containing 4 to 11 rooms. Complete with floor register, cement, check damper, regulating dial. 25 feet of chain, pulleys, poker, shaker handle and directions for installing and operating.

Write For Free ESTIMATE BLANK

Wards maintain a staff of skilled heating engineers to aid you with your heating problems. They will advise you, free of charge, what type and size heating system is best suited for your particular home, if you require assistance. They will also send you the delivered price of all materials needed for the complete installation. Write to Wards Engineering Service Department, Montgomery Ward, for **Free Estimate Blank No. 12681-2**. Fill in the simple questions and return.

When we receive your order a skilled draftsman will draw up a complete set of blueprints showing the exact location of all parts for the complete installation for your home. With the aid of the blueprints, and instruction book that is furnished, any man mechanically inclined can quickly and easily install the heating system.

There is no charge for this service, and it obligates you in no way. After sending for the Estimate Blank, and receiving our complete estimate, you can feel free to order or not, just as you please.

THINK OF IT—A Full-sized Quality Furnace for About What You Would Have to Pay for a Good Stove

Wards Standard Quality Pipe Furnace

Wards Standard Quality Furnace is second only to our fine Wards De Luxe. It's a mighty fine job throughout, in fact it's made so well that many would call it their very best grade. The workmanship is excellent, the cast iron and other materials are first quality and the trouble-free service it has given over a period of years is the best testimonial any furnace can possibly have. And the features of the Standard Quality shown below tell you as well as any Heating Engineer could why this is an outstanding value. From what you yourself know about furnaces, even if your knowledge has been limited to just what others have told you, you'll recognize features here that are unmistakable marks of quality. Read about them. Complete with heavy galvanized casings, cement, bonnet—less collars, check draft, regulating dial, 25 feet of chain, pulleys, poker, shaker handle, fuel economizer and installation instructions. For your convenience the bonnet or top is shipped without collar or holes for pipe—you can locate the holes to suit your particular job. The smokepipe, elbows, wall pipe and dampers are priced on Pages 44 and 45, the watercoils on Page 49.

Look Over These Quality Features

- ① **ONE-PIECE RADIATOR.** Is unusually deep and provides highest possible heating efficiency and lower fuel cost.
- ② **COMBUSTION CHAMBER.** The dome shape and corrugations increase heating surface. Large, heavy chamber transmits the maximum heat units to radiators.
- ③ **ONE-PIECE FIREPOT.** Massive construction. Deep corrugations increase heating surface and add to strength and durability. Extra heavy triangular grates made to last for years.
- ④ **LARGE HIGH ASHPIT** for easy removal of ashes. Heavier and stronger than used on most furnaces selling for more.
- ⑤ **BOLT-ON FRONT.** Cement makes gas-proof and smoke-tight joints.
- ⑥ **LARGE HUMIDIFIER** is easily accessible. It provides moisture to make the air in your home more healthful.

Wards Standard Quality Pipeless

A simple, efficient heating plant that needs little space and is easy to install

Just the thing for the small compact home with means of circulation between rooms. It's easy to regulate and keeps your home cozy and cheerful—and does it at the lowest possible cost. In the first place the Standard Quality doesn't cost much itself . . . and in the second place it's economical on fuel. It doesn't have a yawning mouth that constantly cries for more coal till it makes your coal bin look as bare as Old Mother Hubbard's cupboard. And no wonder—with all those quality features listed above (exactly the same as used in our Standard Quality Pipe furnace) it's bound to

be a mighty efficient heating plant. It has a triple casing such as is used on the best pipeless furnaces. And if you follow the instructions you can install it as well as any expert. We furnish you with floor register, casings, cement, check draft, regulating dial with 25 feet of chain, pulleys, poker, shaker handle and instructions for installing and operating. Nothing more to buy. For basements up to 8 feet high.

Conform to "Standard Heating Code"

● A complete line for your warm air installation. Each piece is made on precision machinery from the finest quality materials known to the industry. Careful inspection at the factory insures perfect fitting.

● Both single and double fittings conform to the "Standard Heating Code" of The National Warm Air Heating Assn.

● The single tin fittings are sturdy and inexpensive and will give satisfactory service for years. Our heavy, strong double tin fittings are especially recommended because of a sealed air insulating chamber that gives additional protection against fire hazards, reduces heat loss and delivers more heat per pound of fuel.

● Whether you are going to install a complete Warm Air system or make repairs in your old one, our Engineering Service Dept. will plan it for you. See Pages 4 and 5.

● All Warm Air fittings are shipped from Factory in Cincinnati or Warehouses in Philadelphia, Pittsburgh, Rochester or Boston.

For Freight Rates, see "Furnace Fittings" on Page 2.

WARDS ENGINEERING SERVICE DEPT. FOR FREE INFORMATION

Whatever you need in the way of plumbing and heating equipment—Wards can fill that need. We carry one of the largest and most complete lines in America.

If there is any furnace fitting which you want and do not find listed here... or if you do not find the size you want... write to Wards Engineering Service Department for free information and special prices.

Wards engineers can perform many useful services for you. Are you wondering how much a complete new heating plant for your home would cost? Would you like to know the respective merits of a warm air furnace and a hot water boiler? If these, or any questions like them, are puzzling you—write to Wards Engineering Service Department. Experts will help you solve your problems... free of charge... without obligation.

INSTALLATION SUPPLIES

Damper Regulator

Permits hand operation of damper from upstairs. Indicates "Open," "Closed," and "Check." Oxidized copper finish, pressed steel body. 30-ft. safety chain, 4 pulleys, 2 "S" hooks, and wood screws for fastening to wall. Ship. wt., 1 lb.

281 HB 8373—Complete..... 95c

Sheet Metal Screws

Shipped from Stock. Ship. wts. 8 oz. and 1 lb. State length.

81 HB 8376—1/2 inch. Per box..... 57c
3/4 inch. Per box..... 75c

Galvanized Draw Bands

Adjustable. State size.

Diam.	Ship. Wt.	Each
7 inch	12 oz.	18c

Steel Chain

Box contains 36 ft. length. Ship. wt. 2 pounds.
281 HB 8374—Per box..... 62c

WARDS HOT WATER HEATING SYSTEM

PICTURED here is a Wards Hot Water Heating System, installed in a home of moderate size. It was planned and laid out by Wards Heating Engineers, and embodies all features needed to give perfect heating comfort in the home. A hot water system is featured by its quiet, uniform heat, cleanliness and ease of control.

The electric thermostat heat control and automatic water heater are, of course, optional and can be installed with any heating system.

PIPES PITCH DOWN IN DIRECTION OF ARROWS

IN A hot water heating plant the entire system—radiators, pipes, boiler—is filled with water. It operates on the principle that warm water is lighter than cold, which causes the heated water to rise and circulate through the system.

When a fire is started in the boiler, water surrounding the fire pot is heated and rises to the top. It continues to rise through the pipes connected to the top of boiler until it reaches the radiators, where much of its heat is radiated by the metal and transferred to the air in the room. At the same time a freshly heated quantity of water is rising from the boiler, so the cooled water in the radiators flows back to the boiler through the return pipe. Here it is again heated, and once more starts on its journey through the system, absorbing heat from the fire and transmitting it to the air in the rooms above. The system is protected against excessive pressures by a relief valve. See Page 54.

The thermostat used in this installation is connected to a clock. Set it, once and for all, so it will hold any desired temperature during the day and then allow the home to cool ten or fifteen degrees during the night. In the morning it will automatically open the drafts. All you need to do is fire the boiler, remove the ashes, and set the thermostat at the temperature you wish. See Page 51 for thermostats.

The automatic heater is connected to the boiler by a heating coil (See Page 49) which supplies all the hot domestic water necessary when boiler is in operation. However, during spring and fall months fire in boiler is held at a lower point and during the summer it is allowed to go out entirely. When fire in boiler is too low to provide an adequate supply of hot water, the automatic heater will go to work and keep a tank full of piping hot water. On Pages 32, 33 and 35 are complete descriptions of all types of automatic heaters.

WARDS STEAM HEATING SYSTEM

In a steam heating system, only the boiler contains water. This small quantity of water is quickly brought to a boil and changed to steam which rises through pipes to the radiators, forcing the air ahead of it. The air vent at the end of the main, and the valves on each radiator, permit all air to escape rapidly but close instantly when reached by live steam, thus preventing the loss of water or steam from the system. The main vent increases the efficiency of the system by expelling air and allowing steam to fill entire main and rise in all radiators simultaneously.

As steam in the radiators gives up heat to the room, it condenses and becomes water again and returns to boiler, where it is again converted into steam, repeating the process.

Wards Steam Boilers maintain a uniform working pressure. They are equipped with automatic damper regulators which check the fire at any desired pressure. As heat is given off in the house the pressure falls, and the regulator again opens the drafts. Each Wards boiler is equipped with a safety valve.

Wards one-pipe steam systems were specially designed by our own engineers to eliminate objectionable noises.

Every *Wards Steam System* can be equipped with vacuum vent and radiator valves. These cost slightly more than standard valves, but will more than pay for themselves in fuel saved. These valves are shown on Page 54.

A steam heating plant, such as the one shown here, gives quick heat and is particularly suitable where a control of individual radiators is desired. When the radiators are equipped with vacuum valves, this makes an unusually efficient installation. Wards engineers will design a similar system for your home to give the maximum in heating efficiency.

The domestic hot water supply system shown here consists of an insulated range boiler (see Page 34) with an auxiliary gas or oil heater for summer use. It is also equipped with an indirect heater which supplies hot water during the heating season without firing the auxiliary heater. See Pages 33 and 49 for further details on domestic water heating systems.

WARDS VAPOR HEATING SYSTEM

Wards Vapor Heating Systems combine the good features of Steam and Hot Water Heating. They provide for instant heat in any radiator and permit individual control of each radiator. They are absolutely noiseless in operation.

Each radiator in a Vapor System is equipped with a packless valve on the supply end to control the amount of steam (or vapor) in the radiator and a thermostatic trap on the return end which permits the condensed water to return to the boiler only after it has given up its useful heat. With a declining fire a partial vacuum is created, causing the water in the boiler to continue to vaporize and give heat to the radiators for a considerable period.

The Wards Oil Burner is fully described on Page 50. When installed as shown at left, it is controlled by a thermostat and clock to give the desired temperature during the day, automatically lower the temperature at night, and raise it again in the early hours before you get up.

The indirect water heater and range boiler are connected to the heating boiler and will furnish all the hot water you want. In the summer, to have the burner heat the range boiler only,—simply close a valve on the heating system. Hot water is then furnished at a lower cost than could usually be done with gas. With this arrangement, a fully automatic system is obtained which requires practically no attention either winter or summer. If, in severe weather, a door or window were carelessly left open so that the demands from the thermostat on the heating system might cause too high a steam pressure, a protective Vapor-stat will automatically turn off the Burner. In the summer the Burner is automatically regulated by the demands of the domestic hot water supply.

The concealed radiators, shown in this installation, are built of seamless copper tubes with copper fins to permit rapid radiation. They can be furnished to be built into the walls of a new house or concealed in a standing floor cabinet for homes already built. Concealed copper radiation heats by convection and gives a more even distribution of heat than any other type of radiation. See Page 52. A vapor system can be installed with a coal or gas burning boiler and cast iron radiation just like steam or hot water.

The arrows show you why you get quick heat with little coal

Here you actually see how the scorching heat encircles every section . . . in fact, Wards De Luxe construction with its long flue travel and large heating surface insures rapid and efficient absorption of heat from the fuel. The circulation of water in the waterways is exceedingly rapid. The flue arrangement and the great amount of space in the combustion chamber (between top of the fuel bed and crown sheet) allows an easy, unrestricted flow of the burning gases, which assures a proper and complete combustion rate and easy regulation.

There are many other advantages too . . . listed below . . . all of which combined meet the most exacting requirements of engineers, architects and contractors. All factors considered . . . and at Wards amazingly low price . . . it's a value hard to equal. Backed by Wards Heating Guarantee Printed in full below at left—your assurance of Quality and satisfaction.

And These Features Tell You What You Cannot See

Heavy metal jacket finished in Cardinal Red with black enamel doors.

The insulation on four sides and top with heavy 1-inch asbestos, means a great saving in heat and fuel.

Heavy rocking type grates that will permit the burning of all domestic sizes of fuel.

Deep firepot permits firing sufficient fuel to insure long periods without attention. The large combustion chamber allows thorough mixing of gases and burning them into useful heat without excessive loss in the form of smoke and soot up the chimney.

Extra large ash pit insures long life of grates and ease of ash removal.

All feed and clean out doors are ground to fit, preventing the leakage of cold air to flue way or escape of gases into the cellar.

Design of water ways insures rapid circulation throughout the boiler.

Sections easily assembled. Each boiler furnished with shaker handle, steel wire cleanout brush, poker equipment shown on illustrations and instructions for installing and operating. Overall height 58 inches, with 46-inch water line for steam boilers. 9-inch smoke collar.

Note in the large picture above, the long travel of flame—3 times the length of the boiler, causing rapid circulation of the water in the numerous tubes. There is no waste of heat. The fire-pot is unusually deep and holds fire for long intervals.

Heating Guarantee

We Guarantee Wards De Luxe Boilers to be free from defects in material and workmanship and to give satisfactory service when installed and used according to instructions.

We further guarantee, upon request and without charge, to make adjustments and repairs to said system which become necessary, or replace any parts found defective in manufacture, during the first year after purchase—where said adjustments, repairs or replacements are required through any fault of ours.

Shipping Points and Freight Rates

All Boilers on this page shipped separately from Factory in western New York or Warehouse in Central New York, Long Island or Central Maryland.

For Low Freight Rates turn to Page 2 and look under "Boilers, Cast Iron Heating."

One of the Many Wards Square Boilers Now in Use

A neat Hot Water Boiler installation in the home of Mr. Albert Lewandowski, Waukegan, Ill. He has a brick bungalow with 5 unusually large rooms. He selected a Wards Square Boiler following the recommendations of our Engineering Department as to size of boiler and radiation required.

Every room in the house is comfortably heated at all times, with a surprisingly small amount of fuel, reports Mr. Lewandowski, who is very well satisfied. Wards also supplied all the plumbing fixtures for this home.

IF YOU PREFER A ROUND BOILER Wards Boilers do a Fine Heating Job

Round Boiler
for Hot Water
\$48.75

\$5 Monthly

Heat... and plenty of it... quickly! That's what you get with either a Round Hot Water or Steam boiler. The fire travel is scientifically guided by means of staggered openings so that the heat units are absorbed by the water instead of passing up the chimney. The unusually deep firepot holds a large quantity of fuel, thereby maintaining the temperature for long periods of time. The sides of the firepot are smooth and tapered to prevent crusted fuel from hanging to sides and insuring a self-cleaning surface. You can burn all sizes of domestic fuels too... and a positive setting of the shaker allows the fire to be gently agitated or completely dumped. Any good Heating Engineer will tell you the other features shown above are the best you can possibly get anywhere. Boilers shipped in sections with complete instructions for installation. Both Hot Water and Steam Boilers include damper regulator, gauges, etc. as pictured above. In addition a shaker handle, wire flue brush and poker are furnished. May be purchased on Wards Budget Plan—see Page 3. Shipped from Warehouse near Pittsburgh, Pa., Glendale, L. I., Philadelphia, Boston or Chicago. For Low Freight Rates see under "Boilers, Cast Iron Heating" on Page 2.

Make Your Old Heating Plant Lead a CLEANER LIFE ... install a Wards OIL BURNER

ALL ELECTRIC
For Alternating
Current Only

No shoveling, no waiting for the fire to "burn up," no dust, no ashes. It's entirely automatic! Start it... set your thermostat for the temperature desired, and the fire will burn only long enough to reach the desired temperature... then it stops automatically. If your room temperature drops a couple of degrees it automatically starts again. Wards Oil Burner can be installed quickly in almost any type of heating plant. Wards Oil Burner is carefully built and is so reliable in operation that its maintenance cost is very small. You can change the temperature by moving the control pointer on the room thermostat.

It's economical as it uses low-priced oil and is exceptionally quiet in operation. Can be adjusted to heat from 5 rooms to a hotel.

These Features are Sure Proof of This Oil Burner's Quality

Listed and inspected by Underwriters' Laboratories, Inc., and bears their label.

Draft tube, transformer housing, motor support and pump assembly support are all part of one rigid casting.

High grade cushion mounted motor—meets all Utilities power requirements.

Has Penn Switch plain Room Thermostat without clock. 8-day Clock or Electric Clock thermostat may be had at extra charge.

Spun steel fan, Sirocco type, ample size, specially balanced. Mounted directly on motor shaft, insuring quietness, and maximum air delivery.

Heavy supports adjustable to any height.

Pump, Strainer and Valve assembly mounted as a complete unit. May be removed individually. Glossy red finish. Motor is black.

Draft tube with deflectors gives flame a swirling motion.

Burns No. 3 (28 degree to 32 degree gravity) Heavy Fuel Oil.

Entire nozzle assembly can be removed as unit.

Nozzle is made in sizes ranging in capacity from 1½ to 5 gallons per hour, and in 45°, 60° or 80° angles so each installation may have best possible applications.

Has Newest Modern features that prevent interference with radio reception.

Wards Heavy Duty Boiler

For Large Homes... Schools... Apartment Buildings

Here's the boiler for a lifetime of service. Use where the cost of operation makes it highly important to have the most efficient heating plant. As the combustible gases are distilled from the burning coal they are mixed with air and burned thoroughly. The fire travel is three times the length of the boiler; first to the rear, then front through the lower flues, and finally back to the rear where it leaves through the smoke outlet. Wards De Luxe Heavy Duty Boiler is especially adapted to burning oil on account of its large combustion chamber. Heating surfaces are arranged to extract practically all useful heat from the hot gases.

For Hot Water, Steam and Vapor Systems—Burns Coal or Oil

Furnished with rocker type grates which are reinforced with double bridge webs to support an unusually large bed of coals. Shipped in sections for convenient handling through doorways. Smoke pipe collar 10 inches on 21-inch boilers, 12 inches on 25-inch. Water line, 43 inches on 21-inch, 45 inches on 25-inch. Jacketed boilers complete

with steam or hot water trimmings. If you need larger sizes write us for prices. *Boilers Shipped from Warehouse in Chicago, Boston, Glendale, L. I., Philadelphia or McKeesport. State size. See Est. Freight Charges under "Boilers Cast Iron Heating" on Page 2. Buy on Wards Budget Plan if you wish—for details See Page 3.*

Automatic Coal Heat with Wards Stoker

ELIMINATES HAND FEEDING . . . CUTS HEATING BILLS

Assures Even
Temperature
at All Times

Clean heat . . . automatic heat . . . with coal, the cheapest of all fuels! Wards offer you a modern, up-to-the-minute Automatic Coal Stoker to relieve you from dirt and the unpleasantness of frequent trips to the basement. This stoker asks just one thing: that the hopper be filled occasionally with coal.

Not just cleaner . . . more convenient . . . Wards Stoker firing is far, far more economical than hand firing. It burns the small sizes of coal, which cannot efficiently be fired by hand. Coal costs less in these sizes, yet you get more heat from it than from lump coal, hand fired. Tests show this stoker will reduce your coal bills 20 to 50%. It is 40 to 70% less expensive to operate than an oil furnace; 50 to 80% less expensive than a gas furnace.

Most important of all are the advantages of forced underfiring. As shown in the small diagram above, the feed worm forces coal upward, under the fire. Coal is slowly preheated, volatile gases passing upward, through the fire where they are burned. Coked coal is burned when it reaches the top. There is no smoke. No costly fuel waste. No Ash. A firm clean clinker forms around the fire and is easily removed with a hook specially provided.

Wards stoker is adapted to any kind of heating plant—warm air, steam, or hot water. Automatic Controls are furnished which maintain any desired temperature. A touch of your hand on the wall thermostat and the Stoker automatically changes the temperature in your house.

All parts have been made heavier and stronger than is the general practice to insure long life. 300-lb. capacity.

Hopper and duct are of heavy copper bearing metal. Conveyor of one piece cast nickel chrome alloy steel especially designed for this severe service.

The sturdy electric motor drives the feed conveyor through a carbonized alloy steel worm gear. All gears are totally enclosed in an oil bath providing unfailing lubrication. Multi-blade fan provides a force draft to burn fuel most economically.

Easily installed—the entire job can be done in a few hours. We furnish complete instructions. Complete with all automatic controls—thermostat, high-limit control and hold-fire control—and clinker remover included. Operates on 110 to 120-volt, 60-cycle A.C. Monthly Payments on Page 4. Freight Charges on Page 3 under "Furnace Fittings." For larger installations, write to Wards Free Engineering and Service Department. Ship. wt. complete 450 lbs. Shipped separately from factory in Chicago.

Control Your Furnace from Your Easy Chair

\$14.95
Complete with
Thermostat

You can control the temperature of your house from your easy chair with Wards Automatic Heat Control. Suppose you want a room temperature of 70°. Just set your thermostat at 70 and electric controls will automatically operate the draft or check damper of your furnace or boiler to maintain that temperature. A touch of your finger on the thermostat will change the temperature at any time. No running up and down stairs.

Gone are all wastes of overheating . . . or discomforts of chilly, underheated rooms. Wards Heat Control eliminates the threat of sickness from uneven temperatures. Your house is always at the temperature you like best—always comfortably warm, but never too hot. Baby can play on the floor without catching cold.

These outfits soon pay for themselves, by maintaining even temperatures, they economize on fuel. They make it easy to keep a low fire in your furnace or boiler overnight. Just set your thermostat down—the fire is kept burning slowly all night. You won't waste heat in sleeping hours, yet you're sure of a warm fire in the morning.

The handsome thermostat is mounted on wall of living room—or wherever most convenient. Nothing else shows. Hidden wires run to the basement where the sturdy electric motor operates check draft and damper by chains and pulleys. Everything is automatic—trouble-proof.

Outfit furnished complete with thermostat, electric motor with transformer, 30 feet of thermostat cable, 4 pulleys, insulated staples, and mounting screws. Complete instructions make installing an easy job.

81 HB 7670—Uses 110 to 120-volt, 60-cycle A.C. Ship. wt. 10 lbs. Mailable \$14.95

Wake Up in A Warm House

30-Hour Clock
Thermostat Outfit **\$19.85**
Complete
Outfit

Let a clock do your early morning furnace tending! Has all the advantages of the unit at left—and in addition, has a 30 hour clock thermostat. When you go to bed, you cool the house by setting back the thermostat; and set the clock, say—six in the morning or any hour you wish.

Promptly at that hour, the clock snaps the thermostat over to the temperature you set—and your house is automatically warmed. No more jumping out of bed to fire the furnace. Just wind and set daily. Electric motor with thermostat uses 110 to 120-volt, 60 cycle A.C. Chain, pulleys and all fittings included.

81 HB 7671—Ship. wt. 11 lbs. Mailable \$19.85

Eight-Day Clock
Thermostat Outfit **\$32.45**
Complete
Outfit

The last word in Heat Control Outfits! 8-day Clock thermostat has two sets—one to cool house at night, one to warm it in the morning. Solves all temperature worries.

When the outfit is installed, you set the day-time and night dials at the hours you choose. No need to touch it again, except to wind the clock once a week.

Electric controls will warm your house in the morning—and automatically cool it at night. Outfit includes 8-day clock thermostat, electric motor (for 110 to 120-volt, 60 cycle A.C.), chains, pulleys, instructions, and all fittings as in outfit at left.

81 HB 7672—Ship. wt. 12 lbs. Mailable \$32.45

Protect the New Job with GOOD Paint . . . See Wards General Catalog

★CBA MONTGOMERY WARD 51

"the Answer My Dear is COPPER RADIATION..."

Old style radiators took up so much space that I decided to replace them with these modern heating units that fit right in the wall. That pretty little grill under the window is all you see . . . and have you noticed that our house is warmer than it's ever been before?"

Mrs. C is just one of the many homemakers who praise this new type of heating system. It enables you to put furniture where you want it without having to allow for a lot of bulky radiators.

Three types . . . completely concealed, partly recessed cabinets, or exposed cabinets. They take little space, and painted the color of your walls, their smart lines add greatly to the appearance of the room. This modern heating system costs no more for fuel than ordinary radiators, and because it is clean heat it keeps down decorating costs. It is simple and inexpensive to install.

PARTLY RECESSED CABINET TYPE—for use in walls or under windows where wall depth only permits partly recessing.

FLOOR-CABINET TYPE—Complete assembled cabinet. May be used to replace present cast iron radiators. Requires no recessing.

BUILT-IN-WALL TYPE—with removable metal panel front that fits flush with wall or extended front.

Copper Radiation costs less than Cast Iron Radiation with Enclosures

Steel cabinets and metal panel fronts are finished with a prime coat of dull gray—ready for finishing to conform with any color scheme. Connection to the pipes is same as in cast iron work, but installation is much easier because the unit is much lighter and easier to handle.

The cost per radiator, either partly recessed, panel front or fully exposed cabinet style is no more than for a cast iron radiator with enclosure.

You will be surprised how little it will cost to install a new, modern heating system or even to modernize your present system.

We believe that this is the most efficient heating unit ever devised for vapor and steam systems, because it uses the principle of air circulation to carry heat. Made of best quality materials and designed for a maximum heating surface with minimum resistance to air flow. Closely spaced copper radiating fins, bonded to copper tubes, give off heat quickly. The tubes are extra heavy and tested to withstand tremendous pressure.

LET OUR ENGINEERING DEPARTMENT PLAN YOUR RADIATION

We will do all the planning and figuring for your heating job—tell you what size boiler or furnace you need, what type, size and how many radiators you should have and how much pipe, etc.—and how to install it yourself.

If you are remodeling, write and tell us details of your present system and we will tell you whether or not you can use copper radiation. This type of heating is not applicable to all systems. Inserted in this book is a Heating Inform.

Blank Number 12681 which makes it easy for you to send us all information we need to make a complete estimate of the cost of a heating system for your property. See Page 36.

When you use the services of Wards Engineers, you'll have the comforting certainty that your heating plant will be efficient and will heat your whole house as you want it heated. Their valuable advice is FREE, and is given to you before you spend a cent!

CAST IRON RADIATION with Trim Modern Lines

Slimmer Tubes and More of Them for

Better Looks and Greater Heating Surface

... and here are the New Slim-Tube Radiators—the type of cast iron radiation that is specified by up-to-date architects. *They're Modern*—classic stream-line design. *They're more Efficient*—the slender tubes and wide spacing with proper proportion of heating surface to air space increases the amount of heat radiated amazingly. *They're Convenient*—may be installed under windows, along walls—almost anywhere. *They're Dependable*—high quality cast iron, perfectly machined, assures trouble-free installation. *They're Priced Right*.

Here's How to Figure Radiator Heating Surface

Wards ENGINEERING SERVICE DEPT. will advise you how many square feet of radiation your home requires; if you will just write us. If you already know your requirements, you can figure the number of sections of each radiator by dividing the square feet required by the square feet given for each section. To determine length, multiply number of sections by the thickness of each section.

Freight Rates and Shipping Points

For Wards Budget Plan of Monthly Payments see Budget Plan, Page 3. *Shipped from Warehouse in Washington, Dunkirk, Long Island City, Utica, Boston or McKeesport.* For total weight of radiators multiply the total amount of radiation in square feet by the shipping weight per square foot which is 5½ lbs. For Freight Rates see "Cast Iron Heating Radiators," Page 2.

Note: Wall radiators and radiation in sizes and tubes not listed in the table below can be had. Write us for any information you need.

HOT WATER . . STEAM and VAPOR ACCESSORIES

SUPPLIES FOR HOT WATER SYSTEMS

Wards Automatic HOT WATER Pressure Regulator

Economical—automatic. Will add water to system and maintain a constant proper pressure. Speeds circulation. Saves fuel. Constructed throughout of highest quality brass and bronze. Threaded for 1/2-inch pipe connections. Easily installed. Instructions included. *Mailable.* Shipping weight 10 pounds.
81 HB 7892.....\$8.65

Hot Water Radiator Valve
Solid brass, heavily nickel-plated. Complete with union. *Mailable.*
81 HB 7900—State size.

Pipe Size	Ship. Wt. Lbs.	Each
3/4 inch	1 lb. 8 oz.	87c
1 inch	2 lbs. 8 oz.	\$1.05
1 1/4 inch	3 lbs. 12 oz.	1.30
1 1/2 inch	3 lbs. 4 oz.	1.65

Pressure Relief Valve

Entirely automatic. Prevents excessive pressure due to overheating of closed hot water heating systems. Set for pressure of 30 lbs. Easily installed. Listed by Underwriters' Laboratories, Inc. *Mailable.* Shipping weight 7 pounds.
81 HB 5416—Each.....\$3.60

HOT WATER Damper Regulator Complete

Regulates draft and check damper according to water temperature. Complete with lever, weights, pulleys and chain. Japanned steel body. Threaded for 1-inch boiler connection. Shipping weight 10 lbs.
81 HB 7858.....\$4.85

Combined Altitude, Pressure and Thermometer Gauge

Registers height, pressure and temperature of water. For closed or gravity hot water heating systems. 3 1/2-in. face. Threaded for 1/4-inch pipe connection. *Mailable.* Ship. wt. 12 oz.
81 HB 7923.....\$1.65

Hot Water Thermometer

White enameled metal thermometer. Scale is graduated from 60 to 260 degrees Fahrenheit. Threaded 1/2-inch iron pipe. *Mailable.* Shipping weight 6 ounces.
81 HB 7910.....55c

Radiator Key Air Valves

Brass, nickel-plated, 1/2-in. thread. *Mailable.* Shipping weight each 3 ounces.
81 HB 7912—Valve only.....6c
81 HB 7915—Key only.....3c

Boiler Stop Leak Liquid

Stops boiler leaks quickly and effectively. Removes and prevents scale formation. Instructions included. *Mailable.* Shipping weight 3 lbs. 8 oz.
81 HB 5610—1-qt. can.....59c

VAPOR SPECIALTIES

Modulating Packless Valve

For vapor or vacuum. Leak-proof. Quick opening. Graduated dial, with wheel or lever handle. Nickel-plated. *Mailable.* Shipped from Eastern Pennsylvania. Ship. wts., 1 lb. 8 oz., 2 lbs., 2 lbs. 8 oz. State type of handle and size.
281 HB 7600—With union.
Pipe size, inches.....1/2 3/4 1
Radiation Cap. sq. ft. 25 65 125
Each.....\$2.35 \$2.75 \$3.25

Compound Retard Gauge

Registers Pressure and Vacuum. 3 1/2-in. face, black steel case. With stop cock. Threaded 1/4 in. Ship. wt. 1 lb. 4 oz. *Mailable.*
81 HB 7942.....\$1.65

Air Eliminator

Vents air from vapor systems, at one central point in basement, with less pressure than is possible with individual vents on radiators. Vents air quickly from systems having up to 2000 sq. ft. of radiation. Shipped from stock.
81 HB 7605—Ship. wt. 9 lbs.....\$7.50

Thermostatic Radiator Trap

For vapor, vacuum and low pressure steam. Self-aligning thermal unit. In angle, right or left corner offset or straight patterns. Nickel-plated. *Mailable.* Shipped from Factory in Eastern Pennsylvania. Ship. wts., 1 lb. 8 oz. and 2 lbs. State pattern and size.
281 HB 7601—With union.
Pipe size, inches.....1/2 1/2
Radiation Cap. sq. ft. 200 400
Each.....\$3.75 \$4.50

Steam Gauge

Registers pressure up to 30 lbs. 3 1/2-in. face, black case and chromium plated rim. Threaded 1/4 in. Ship. wt. 1 lb. *Mailable.*
81 HB 7943.....\$1.15

Steam Damper Regulator

281 HB 7611—Responds to pressure variations of 1 ounce, opens or closes check and draft. 7-in. diaphragm. Lever, chain, pulleys, weights included. 1-in. thread. Shipped Separately from Factory in Chicago. Ship. wt. 35 lbs.....\$12.45

Boiler Return Trap

For vapor or low pressure steam systems. An efficient, positive device for returning condensation direct to the boiler. Prevents damage to the boiler due to water becoming locked in the system. Capacity 1500 sq. ft. radiation. No adjusting; positive, simple and noiseless. Heavy outside casting of high grade cast iron. Inlet and outlet tapped 2 in. Instructions included. Shipped from Factory in Eastern Pennsylvania. Shipping weight 90 pounds. For Low Freight Rates see Page 2 under "Boiler Parts."
281 HB 7604—Complete with water gauge.....\$39.75

EXPANSION TANKS

Tank for Hot Water Gravity Systems

\$620 For installation in attic or other high point in system. Heavy galvanized steel, welded and riveted. Standard tapings for pipe connections. *Not Mailable.* Shipped from Stock. For Low Freight Rates on Expansion Tanks see Page 2 under "Galvanized Tanks."
181 HB 7905—State capacity tank wanted.

Capacity in Gallons	Size, In.	Radiation Capacity	Ship. Wt.	Each
15 gal.	12x30	500 sq. ft.	43 lbs.	\$ 6.20
20 gal.	14x30	700 sq. ft.	58 lbs.	7.95
26 gal.	16x30	950 sq. ft.	68 lbs.	9.85

Basement Tanks \$535 18-Gallon

For Hot Water Closed or Pressure Systems. Located on the basement ceiling about 5 feet away from the boiler. Rolled copper bearing steel, painted red. Two 1-inch tapings. *Not Mailable.* Shipping weights, 47, 58, and 65 pounds. See Low Freight Rates on Page 2 under "Galvanized Tanks."
181 HB 7906—State capacity tank wanted.

Capacity in Gallons	Size, In.	Radiation Capacity	Each
18 gal.	12x36	350 sq. ft.	\$5.35
24 gal.	12x48	600 sq. ft.	6.35
30 gal.	12x60	800 sq. ft.	6.95

SUPPLIES FOR STEAM OR VAPOR SYSTEMS

Automatic Air and Vacuum Valve

Use this chrome plated valve on radiator and one listed below for mains or return lines, to make gravity steam system into vacuum heating system. Saves fuel, radiators stay hot longer. Bronze ball prevents air from being drawn into system when steam pressure goes down. Brass float. Chrome plated shell. Stem of nickel alloy.
81 HB 7971—Ship. wt. 4 oz.....\$1.15
81 HB 7973—With straight shank for main and return line. 1/4-in. pipe thread. Ship. wt. 8 oz.
Mailable......\$1.35

No. 1 Automatic Syphon for Steam Radiators

81 HB 7970—Automatic. Frees radiator of air. Closes against steam. Chrome-plated. Metal thermostat float. Wt. 4 oz. *Mailable.* Each.....75c
81 HB 7972—With 1/4-in. straight shank for mains, return lines, coils. 1/4-in. pipe threads. Ship. wt. 4 oz. *Mailable.* Each.....95c

Vacuum Radiator Valve

Heavily chromium-plated. For steam radiators. Keeps air out of system, maintains more even temperatures. Syphon tube keeps valve free of water. 1/2-inch pipe thread. *Mailable.*
81 HB 7989—Ship. wt. 4 oz. Each.....95c

Syphon Radiator Valve

Automatic float type Syphon Valve. Syphon tube prevents splutter in radiators. Noiseless in operation. Shell is highly nickel-plated to resist rust. Non-adjustable 1/2-inch pipe thread. Ship. wt. 3 oz.
81 HB 7976—Each. *Mailable.*.....29c

Steam Radiator Valve

Brass, nickel-plated. Complete with Union. *Mailable.*
81 HB 7901—State size.

Pipe Size Inches	Ship. Wt.	Each
3/4	1 lb. 12 oz.	95c
1	2 lbs. 4 oz.	\$1.20
1 1/4	3 lbs.	1.50
1 1/2	4 lbs. 12 oz.	1.90

Water Boiler Feeder

This "boiler watchman" adds water to the boiler as required. Cast iron. Working parts are brass and monel metal. Tapped for 1/2 and 1 inch pipe. *Mailable.* Shipped separately from Factory in Chicago, Ill.
281 HB 7610—Ship. wt. 55 lbs.....\$32.50

HOT WATER and STEAM SUPPLIES

Union Elbows

Brass, nickel-plated. To be used with hot water or steam radiator valves. *Mailable.*
81 HB 7904—State size wanted.

Pipe size	3/4 in.	1 in.	1 1/4 in.	1 1/2 in.

Boiler Flue Brush

Steel wire. Threaded for 1/4-in. pipe handle. *Mailable.* Shipping weight 1 pound.
81 HB 7891—Each.....39c

WARDS SAVE YOU MONEY ON EVERYTHING YOU NEED

If You Don't See it Here, Look in Our General Catalog

SOMETHING you are looking for? Some high grade varnish for your new front door? Yes, of course we have it. You'll find it in our General Catalog. And there are the tools you will need if you plan on doing your own remodeling—wiring materials, paints and a lot of other high grade home remodeling needs—complete lines too extensive to show in this catalog.

Pick up your copy of *Wards General Catalog*. Turn to

the great Home Modernization Department. It's full of ideas to make your home more comfortable, more convenient, better looking—and actually a better market value. Savings on everything you order. You always pay less when you purchase by mail.

If there's something you can't find in our General Catalog, something special, write our Engineering Service Department. They'll gladly quote you prices without obligation.

HARDWARE

Turn to our general Catalog for complete selection of Lock Sets, Window, Cabinet and Door Hardware. We offer a choice of many designs and finishes to fit the architecture of most any home. Garage and Barn Door Hardware, Nails, Screws—everything at substantial savings.

METAL ROOFING

There is no finer metal roofing made than Ward's new 2-oz. ZINC COATED COPPER-STEEL ROOFING. Read in our general catalog why it lasts longer—how easy it is to apply—how much you save buying it by mail. You can also make a savings on Eaves Trough and fittings, either galvanized steel or copper.

PAINTS

When you need paint, varnish, enamel, lacquer or even a brush, don't forget to use your copy of Ward's general catalog. Quality paints add protection, charm and beauty to your home. We make them all in our own factory and know what is in every can. Selling them direct to you by mail assures lower prices—always.

ELECTRICAL

Over 1,000 items in our electrical department. Anything you may need to completely wire your home. Lighting fixtures, fuses, switches, power motors, or even a complete lighting plant—everything at sensibly low prices.

Complete wiring for a 5-room house can be bought at Ward's for about \$34.95.

TOOLS

Whether an expert or just a handy man, you'll find a lot of satisfaction shopping through our hardware department. Ward's Lakeside Brand always represents a fine quality. You'll find many other famous names, too. There's everything from a nail or bolt to a complete workshop.

... These MODERN ENTRANCE DOORS Will Give Your Home That Charming Old World Atmosphere ...

DORCHESTER

\$21⁷⁵

Today, with beautiful homes planned in Old English, Colonial, Spanish and French Provincial styles, the front door has come to be of great importance. These distinctive V-joint Batten doors are correct in every detail. Heavy and massive in appearance, yet correctly proportioned. They're full 1 1/4 inches thick. Built upon a Pondosa Pine core to which the tongued and grooved V-Jointed Pondosa Pine veneer is glued. All doors are carefully wrapped in tough paper and securely crated. Hardware Not Included. See prices below.

Old Iron Finish Hardware

Rustic Front Door Lock Set. Will not streak or mar doors. Large grip handle, length 10 1/2 inches, with thumbpiece on outside. Knob inside. Reversible cylinder lock, size 5 by 3 3/8 inches. All exposed parts made of solid cast brass.

84 HB 3076—Shipping weight 5 lbs. \$7.85

Rustic Hinge Plates. There is nothing that adds more to a front door than hinge plates of Rustic Old Iron Design. All exposed parts of cast brass, old iron finish.

TRULY COLONIAL . . . through just such doors Washington welcomed guests to Mount Vernon

COLONIAL architecture expresses a simple and rustic beauty that has a charm all its own. This authentic colonial door is a reproduction inspired by the gracious door-ways that welcomed guests to spacious Southern homes in pre-revolutionary days. It radiates a warmth and hospitality that sets your home apart. And you need pay no more for this sturdy, massive door than for one less suited to Colonial design. Place your order now with the confidence you are securing lasting beauty and long service at savings typical of those you always make at Wards.

Colonial Sidelights

These sidelights give the final touch to the Colonial atmosphere you desire to create. A pleasing flood of light gleaming through the glass at night . . . offers a truly cheerful welcome to your guests.

Sidelights are carefully made of clear Pondosa Pine, 1 3/4 in. thick, same as door, sanded, and ready for painting. Glazed with 5 lights of double strength glass. They match our Colonial door perfectly in design. For Sidelight Frames see Page 64.

These **CRAFTSMAN ENTRANCE DOORS** are outstanding favorites
They're appropriate for any home . . . they're **EXTRA** sturdy, **EXTRA** quality

TODAY architects emphasize the importance of the front door, because it so often can set an atmosphere of hospitality for the entire home.

You couldn't find a sturdier or better looking door than the HOLMES. Because of its simplicity it will harmonize with any type of architecture. It's made of two woods—Pondosa Pine to withstand check and warp when exposed to severe weather—Oak Veneer to give your home extra beauty by its fine grain and rich, warm color.

Strongly made of the best materials, this Door is priced low because Wards ship direct to you from the mill.

Shipped from Mill in Philadelphia, Pa.

YOUR front door should be more than a protection against intruders and the weather—it should tell a flattering story of your own good taste.

The WHITTIER is a door to be proud of. Beautiful Oak Veneer with Wards thick, beveled plate glass, it adds beauty and dignity to any home. Driving rains, freezing cold or summer heat . . . the sturdy Pondosa Pine withstands them all hanging straight and true.

Both woods are especially chosen for their beauty and grain and the excellent way they take a finish. Like all our good doors, the Whittier will give long and faithful service.

Shipped from Mill in Philadelphia, Pa.

3-0 x 7-0	7.20	16.25	12.50	20.50	120

Buy these MODERN ENTRANCE than ordinary doors . . . yet they're better

IN MAKING these fine doors we were more interested in their quality than we were in keeping their prices down, but with the lumber market low and our money-saving-method of shipping direct from mill to you we've been able to do both. In fact, it is amazing that such handsome doors as these, built as carefully of first grade materials, should be selling at such extremely low prices.

Every one of these doors is strong and sturdy, built to stand up staunchly in all kinds of weather. Pondosa Pine is used for stiles and rails because it withstands check or warp, and Fir for the panels because of its beautiful grain. That's why we especially recommend a Ward door built of solid Pondosa pine for entrance ways with no protecting porch.

For extra beauty and to give your home charm and distinction, we've also built these doors of beautiful Oak veneer. Like fine furniture, Wards doors are built up on a white pine core with the veneer glued on with waterproof glue

3-0 x 7-0	15.00	18.30

DOORS . . . they cost so little more styled . . . and you'll be better satisfied

under great pressure. Doors made this way resist warping. Only the finest grade of rotary cut Oak veneer, especially chosen for beauty of grain is used—and it takes a beautiful varnish finish.

The plate glass in Ward doors is the same, thick lustrous quality used for show cases and other places where extra endurance and beauty is required.

So many people have difficulty finding just the right door to "go with" their houses. That's why we styled these doors to harmonize with all types of architecture. Each one is architecturally correct and perfectly proportioned for dignity and beauty. The Longfellow, Tacoma or Oakland for instance would be exactly right with any house that has picturesque divided light windows. Yet they'd add a touch of variety to the home with two-light windows. The graceful glass panels of the Riley or Sacramento suggest combination with long, horizontal bungalow lines, but put one of these doors in another type of home and it will look equally well.

65 out of every 100 homes find these doors **MOST**

WARDS recommend these doors for those who are looking for quality, appearance and good workmanship in doors, and yet want to keep the cost down. Order any door separately, if you wish, but you can save time and money by ordering a complete door set. (See bottom of this page.)

Our designs are those approved by leading architects as correct. They will harmonize with almost any style of home. Notice their good proportions—the wide stiles and heavy bottom rails that give them strength and dignity.

All doors are carefully constructed by expert workmen to insure long service. Full 5-inch hardwood dowel pins with high grade waterproof glue, hold stiles and rails securely together. Carefully sanded—ready to finish.

ECONOMICAL for front, rear or side entrances

ALL but three of our doors (York, Dover and Byron) are made of clear Pondosa Pine—the outstanding wood for serviceable yet economical doors.

The York, Dover and Byron doors are "B" Quality Fir. They are just as strong, just as well made, but are graded "B" because of small imperfections in the wood—which paint or stain will cover.

Freezing winter cold or blazing summer heat—dampness or dryness—Pondosa Pine and Fir both will withstand exposure to all kinds of weather. We have many letters from enthusiastic customers telling us that Wards doors hang straight and true for years.

Glazed with good quality clear glass firmly held in place by wood stops. All doors carefully wrapped and crated for safe delivery.

These Doors are ALL Made of First Quality Clear Pondosa Pine

Wards Hawthorne door has long been an outstanding favorite with thrifty people. It is especially recommended for use in places where the glass might accidentally get broken. Because the glass is divided into six small lights instead of a single large one, the cost of replacement is extremely small.

Opening Size Width Ft. In. Height Ft. In.	Approximate Glass Size Inches	Ship. Wt. Lbs.	274 HB 1072 Hawthorne Clear Glass	
			1 3/4 In. Thick	1 3/4 In. Thick

MIRROR DOOR

\$15⁷⁵

2-0x6-0

Furnished in plain Red Oak, All Gum Veneer or Pongosa Pine stiles and rails with Fir panel. The Mirror, with its lustrous reflecting surface, is made of best quality polished plate glass. The opposite side of this door is the same as our Insert-Panel door shown below at right. Doors are 1 3/8 inches thick with 5-inch hardwood dowel pin construction. Carefully and smoothly sanded so that you can easily stain or enamel them to match your woodwork.

Average ship. wt. 95 lbs. Shipped from Philadelphia, Pa. For Door Jambs see Page 74.

You need at least one **MIRROR DOOR!**
You should have one in Every Bedroom . . .
in the Bathroom . . . in your Guest Closet

YOU MUST have doors, and if you're particular about your appearance, you're going to want full-length mirrors. Why not settle two problems in one by installing mirror doors. Modern home-owners install them in every bedroom, in the bathroom and in coat closets downstairs.

Every woman, and man, too, looks and feels better groomed after a head-to-toe picture so easily obtained in a full length mirror door. That's why a mirror is one of the first things a guest searches for upon entering the house. And a mirror door is just as important as it is convenient.

Authorities agree that a mirror is one of the most useful articles for decorating the home. Its reflection of colors and objects gives the room life and warmth. Why not install a mirror door now, while prices are low? At Wards they cost much less than you'd ordinarily pay for glass and door if you bought them separately.

THREE-PANEL DOOR

Very popular with Wards customers because of its splendid construction and low price. Slight imperfections in the wood cause these doors to be graded "B" quality but they are just as strong and well made as other doors which sell for considerably higher prices.

Strongly made with dowel pin construction like all Ward doors. The hardly noticeable imperfections won't show at all when the door is painted or stained.

Detail of Wards
Insert Panel Door

INSERT-PANEL DOOR

Our newest and most beautiful interior door. One that we know you'd pay much more for than Wards low price if you bought elsewhere.

The center panel is of 3-ply birch, gum, oak or fir veneer. All woods carefully selected. The Mouldings have the grace and dignity of classic architecture.

If you're striving for perfection in every detail of your home, we recommend that you choose this door.

MAKE YOUR OWN MIRROR DOORS

It's Easy . . . Takes Only a Few Minutes
. . . And Is Very Economical

With this complete outfit you can make a beautiful Mirror Door out of any door in your home. We furnish either plain or bevel plate mirror, door moulding, glass stop and brass screws for applying. The glass stop and mouldings frame the mirror and hold it firmly in place. Can be put on in a few minutes without even removing door.

Below you will find sizes of mirrors to order for doors of various sizes. The moulding can be furnished in Yellow Pine, Pongosa Pine, Birch or Oak.

State wood wanted. Shipped from Mill in Philadelphia, Pa.

Buy **INTERIOR DOORS** complete with Jamb, Trim, and Hardware... all at one low price

EVERYTHING you need to install a new door and all at one low, money saving price. When you buy Complete Door Sets—you save a lot of time in ordering—you get all the pieces you need—there's no waste of time or material in fitting—everything comes to you from one place and at one time.

Below we show three of our most popular interior doors, complete with hardware and finished with our Craftsman trim. (Two sides of trim are included in a set.) At the right the door jamb, lock set and butts are pictured. Of course, you may order any door separately. You'll find it priced that way in the first table of prices below.

All doors are made of woods carefully selected for grain and color. Five-inch hardwood dowels are used in all joints. This accounts for the great strength and rigidity of our doors. All panels are of three-ply. The trim is made of clear Yellow Pine (oak furnished for oak doors) with head and side casings $3\frac{1}{2}$ inches wide and backband $\frac{3}{4}$ by $\frac{1}{2}$ inch. Jambs are also of clear Yellow Pine (oak furnished for oak doors) with side jambs dadoed for head jamb. Lock set is of best quality, dull brass finish. Fluted glass knobs.

Doors, trim and jamb furnished smoothly sanded, ready to stain or paint to match your woodwork. For Paints and Varnish see Wards General Catalog.

BA MONTGOMERY WARD 63

FRENCH DOORS Have That Extra Charm No Other Door Can Give Your Home

OFTEN the only difference between a beautiful home and a less attractive one is in the details of the finish. Many ordinary looking houses could be transformed into smart, attractive ones by just a few distinctive finishing features—such as French Doors. They are especially decorative and give the home new character and beauty.

If you are remodeling your home put a pair of French Doors between the hall and living room—leading to your sun porch or terrace—between the living and dining room. Leave them undraped—or hang curtains or net to match the color scheme of your room. A single French Door or Terrace Door is especially attractive when used for the opening onto a screened or sleeping porch. And here's something else—French Doors at the top of your stairs will prevent those chilly drafts that often come down open stairways into the living room.

French Doors are made of clear Pondosa Pine, Gum or veneered Red Oak $1\frac{3}{8}$ or $1\frac{1}{4}$ inches thick. Side and top rails are $3\frac{3}{4}$ inches wide; bottom rail $8\frac{3}{4}$ inches. Glazed with double strength glass. T shape Astragal is furnished for center. Shipped from Philadelphia, Pa. See Page 2 for Low Freight Rates.

MODERN HARDWARE for FRENCH DOORS

Lock Sets

French door hardware should always create a good impression. Here is a very conservative, yet very attractive set—a design of unusual pattern with its narrow and gracefully curved escutcheons—one that is admirably suited for all fine homes.

The complete set consists of two escutcheons $6\frac{1}{2}$ by $1\frac{1}{2}$ inches. The outside trim has a well-shaped lever type handle; the inside trim has a glass knob. A strong reversible lock $3\frac{3}{4}$ x $3\frac{3}{4}$. All the necessary screws, and one key. Dull brass, relieved finish. Shipping weight 2 pounds 8 ounces. 84 HB 3085.....\$1.75

Door Butts

Loose pin has non-rising feature. Screws to match. Size $3\frac{1}{2}$ by $3\frac{1}{2}$ inches. Dull brass finish. Ship. wt. 1 lb. 8 oz. 84 HB 3602—Per pair.... 19c

Flush Bolts

Wrought steel. Plate $6\frac{1}{4}$ by $1\frac{1}{4}$ inches; 9-inch rod. Screws included. Dull brass finish. Shipping weight each 5 ounces. 84 HB 3376—Each.....\$1.25

TERRACE DOOR

Our Terrace Doors are carried in stock in the sizes listed below. They can be used singly for entrances opening onto porches, sun parlors, etc. Where extra heavy French Doors are wanted these doors can be hung in pairs. We recommend the use of an Astragal when used in pairs. (See page 79 for prices.)

Doors are strongly built for long service. Genuine dowel pin construction using 5-inch hardwood dowels. Furnished unfinished so that you can enamel or stain and varnish to match your woodwork. Glazed with best quality clear glass.

Average shipping weight 120 pounds.

It takes only a few **FRENCH WINDOWS** to completely transform a room

WARDS French Windows are made of clear Pondosa Pine, 1 3/8 inches thick, thoroughly seasoned and kiln dried. All joints are mortised and tenoned. They are glazed with best quality clear glass firmly held in place by zinc points and Primeless oil putty. Rabbed at center stiles to insure a water tight fit. We make them in six popular sizes listed below, each to either swing-in or swing-out as desired. (See illustration at bottom of page for difference of construction.) Shipped in natural wood, smoothly sanded to take any finish.

Shipped promptly from Philadelphia, Pa. State size when ordering, giving width first.

All Wards Sash
and Frames are
**ABSOLUTELY
WATER-TIGHT**

Frame for
Sash to
Swing-In

Frame for
Sash to
Swing-Out

The bottom rail of Sash to swing-in is rabbed to fit over edge of sill as shown. A half round groove is cut in the bottom of the sash and in the top of the sill. Any water blown in between sash and sill must fall into this groove and drain to the center of sill where a slot allows it to run out. This construction makes Wards in-swinging sash absolutely water tight. Note also the water tight construction of sash to swing-out.

Are you paying for STORM SASH

without HAVING them?

89¢
And Up

TWO LIGHT STORM SASH

As good as modern craftsmanship and high grade materials can make them. Yet notice our low prices.

Clear Pondosa Pine 1½ inches thick, with side and top rails 2 inches wide and bottom rails 4½ inches wide. Glazed with strong clear glass. Ventilators furnished in bottom rail for 15¢ extra. If your window opening is only ½-inch narrower or 1½ inches shorter than openings listed, order stock size and cut down to fit.

Always state width first. Shipped from mill in Philadelphia, Pa. See Page 2 for Low Freight Rates.

The EXTRA MONEY you spend for fuel will BUY a Complete SET

YOU'LL save enough in the first year alone to pay a big part of your Storm Sash bill . . . and after they have paid for themselves they will go on saving you money in fuel bills for years to come. So why not enjoy the comforts of warm, easily heated rooms NOW instead of putting up with a chilly, drafty, hard to heat home that may cause sickness?

Zero weather—icy blasts—angry storms of sleet and snow hold no terror for folks who equip their homes with Wards Storm Sash. Their homes are warm and cozy no matter how cold the wind blows.

How Wards Storm Sash Cut Coal Bills

The Department of Commerce, Bureau of Standards at Washington, D. C., after a thorough investigation of Storm Sash, reports as follows: "Storm Sash on a weather-stripped house will save 25 to 30 per cent on the cost of fuel." This saving makes the money you spend for Storm Sash a profitable investment. It's easy to see why a saving of 25% to 30% on fuel costs is possible when you look at the picture at right. Without storm sash, the cold air rushing against the outside of the glass chills it and lowers the temperature of the room near the window 10 to 15 degrees.

Storm Sash forms a dead air space between the two thicknesses of glass serving as a blanket of insulation between the cold outside and the warm room inside.

INSULATING AIRSPACE

STORM DOOR

If your home is chilly, drafty and hard to heat, a new storm door will shut out the cold air that slips in under regular doors. It will prevent drafts, fuel wastes, and much of the discomfort of a chilly house.

Wards Storm Doors will insulate your entrance doors in the same manner that storm sash insulate windows. As a result, your entry hall will be as warm and cozy as the rest of your home.

At Wards low price you can have this efficient, heavy duty door for so little that we feel it's an investment you will surely want to take advantage of. The savings in fuel alone will soon repay the cost.

Our doors are strongly built of clear Pondosa Pine. Full 1½ inches thick. Furnished a little larger than stock door sizes, so they can be trimmed down to make a perfect fit. Shipped to you in natural wood smoothly sanded, ready for varnish or paint.

See how little it costs to TURN YOUR COLD PORCH into a COZY EXTRA ROOM

Cozy
Porch
Enclosed
with Wards
Storm Sash

Ward Experts Will Figure Your PORCH ENCLOSURE for You Without Obligation

IN WINTER a cozy warm room, all enclosed in glass with bright sunlight streaming in every window. In summer a cool airy spot with screens to keep out flies and mosquitoes. What a healthy place for children and grown folks to live in... and that's just what you'll do... you'll live in it. The sun porch will be the most popular room in the house.

You'll be surprised how little it costs, when you buy your materials from Wards. Here are some figures to give you an idea of just how little you have to spend to completely enclose your porch.

For a porch 6 feet by 10 feet approximately.....	\$32.00
For a porch 8 feet by 16 feet approximately.....	49.00
For a porch 9 feet by 20 feet approximately.....	61.00

The above prices are only average, of course. Every porch is different and the price varies more or less depending upon the size, the type of materials selected and other specifications.

Free Estimate Without Obligation

If you wish, Wards Engineering Service Department will gladly furnish you with a *free* estimate on the cost of all materials for completely enclosing your porch. We will help you with the selection of proper materials. Ask for Information Blank No. 16251. Answer the simple questions it contains. When you return it to us, properly filled out, we will prepare Free estimate. Send a snap-shot picture of your porch if possible.

If you do not wish to pay all cash, Wards Budget Plan will enable you to enjoy the comforts of a porch enclosure while you are paying for it. A down payment of \$3.00 to \$5.00 will insure delivery of almost any enclosure. See Page 3 for Budget Plan Details.

BA MONTGOMERY WARD 67

3 Reasons Why WARDS SCREENS Give You MORE FOR YOUR MONEY!

We Build them with Strong *Mortise and Tenon* Joints—securely held with steel pins—though other screens may sag and loosen after one season . . . you can depend on Wards Screens to stay Tight and Rigid.

We Specify None but the Best Clear *Pondosa Pine Lumber*.

We insist on 16-mesh Rust Resistant Wire . . . no wonder you get *Extra Service*.

Then we make all our window screens full $1\frac{1}{8}$ inches thick to give them extra strength and $1\frac{1}{2}$ inches longer than our standard window frames to allow for fitting and for use with subsill frames.

Let our staff of expert estimators tell you how little it will cost to completely enclose your porch with high quality screens. Write for special information blank 16251, answer simple questions and prepare sketches as called for in this blank. When you return the blank to our Engineering Service Department you will then be sent a free estimate, including all transportation charges to your station. You'll be surprised at the money we can save you.

**Our Fine 16-Mesh Wire
Is the Despair of Insect Pests**

Wards Prices Are
About What Others
Ask for Screens With
Ordinary Wire

Flies, insects and mosquitoes that carry disease just can't get into your home through 16-mesh wire. It means complete protection and comfort.

You have a choice of either rust-resisting galvanized steel wire or the finest rust-proof copper bronze wire. Of course, the copper bronze costs a little more, but it lasts longer.

This is just another instance of the fine quality put into all Wards building materials.

Screens for
Two-Light
Window

79c

and up

Complete protection from flies, mosquitoes and insects costs so little at Wards that you really can't afford to be without screens. Notice the sturdy construction, the

mortise and tenon joint securely fastened with steel pins. That's why Wards screens can't sag or warp.

These screens come to you smoothly sanded and ready to paint. Average ship. wt. 30 pounds. *Shipped from Philadelphia, Pa.* See Wards General Catalog for Window Screen Hardware.

Wards BUDGET PLAN... See Page 3

Here's How Wards Combination STORM and SCREEN DOOR Works the Year Round to Your Advantage

1. You save the price of one door
2. Change from Screen to Storm Door in 5 minutes
3. You need never take the door itself off its hinges!

for Summer
Take Out Storm Panel
Put in Screen

for Winter
Remove Screen
Put in Storm Panel

A COMBINATION Door is in use all the year around—it provides the protections of a fine screen door in the summer and a dependable storm door in the winter. It's a *time-saving* and *space-saving* door—the kind everyone wants. That's why Wards have made an extra fine one at an extra low price.

The frame is full 1½ inches thick, carefully and expertly constructed of selected, kiln-dried, clear Pondosa Pine, smoothly sanded ready to paint. Stiles, 4¼ inches wide, firmly mortised, tenoned, pinned and glued, make this a much sturdier door than ordinary screen or storm doors.

In summer you use the screen panel in this sturdy frame. To give your home complete protection from flies and mosquitoes, we've made this screen of 16-mesh wire. Small insects that enter through ordinary screen, just can't get in.

It's just a five minute job to take out the screen and put in the storm panel which is glazed with strong, clear glass. Then you have a storm door that keeps chilly drafts out of your home.

Doors are furnished ½ in. wider and 1½ in. longer than specified below to allow for accurate fitting. Shipped from Stock. Freight is fast and economical. See Rates on Page 2.

Easy and Dependable Fastener Adjustments

Hold Panels—They Can't Loosen and Rattle

Only a screw driver and a few minutes of your time are required to substitute the glass panel for the screen or vice versa. The four Fastener Adjustments on the frame enable this quick and easy change. They are located on the inside of the door and cannot be tampered with from outside.

One-quarter turn of the screw releases the screen or glass panel—one-quarter turn back locks it to the frame securely and rigidly. It cannot rattle—it cannot come loose.

MATERIAL for MAKING SCREENS

Knockdown Screen Frames

Make your own Window Screens and save money! And because of Wards extra low prices, you can save still more—considerably more. Just compare these prices with others and see for yourself the money you save.

These Screen Frames are made of selected clear Pondosa Pine 1½ inches thick by 1¾ inches wide. Each frame includes two side runners which fasten to window frames; 2 side rails; a top and bottom rail; four brackets to brace corners securely; mitered moulding to hold screen in place and all the necessary nails and screws.

The Frames and accessories are safely enclosed in a handy carton (shown at right) for your convenience.

Available. Shipped from Stock.

WARDS BUDGET PLAN

Buy this convenient way—see our Budget Plan on Page 3.

You can buy **WINDOWS** anywhere . . . but not These Windows Come in Complete Sets

Above is an interior view, showing Wards Two-Light Window finished with attractively designed Craftsman backband trim.

In most cases small windows such as illustrated have only one sash lift—but we furnish two with each set regardless of the size.

The exterior view at the right shows the same window set in a plain cap frame.

Both the Craftsman Trim and the plain cap frame are part of our special Window Set offer.

THIS UNUSUAL Combination Offer includes—attractive two-light window shown at left—plain cap Ponderosa frame (No. 274 HB 623) with 1½ in. Outside Casings and jam-proof pulleys—neatly designed interior Craftsman trim of clear Yellow Pine—four cast iron sash weights—two dull brass sash lifts and fastener and all the necessary sash cord. You save time in ordering. You get everything you need at one time—from one place—at one low, money-saving price. And you save money on freight charges—because we ship everything direct to you from the mill with all in-between profits eliminated.

The windows are made of clear Ponderosa Pine, thoroughly seasoned and scientifically kiln-dried. Full 1½ inches thick with check or meeting rail where the upper and lower sash come together (see inset below). Strong mortise and tenon joints. All surfaces are carefully machined and sanded, ready to be finished. Best quality clear glass held by zinc points and high grade putty. Side rails are plowed and bored for sash cord.

For complete description of Frames and Interior Trim see Pages 75 and 76. State width first. Shipped from Philadelphia, Pa.

at the Savings Wards mill-to-you prices offer All at One Low Price

WARDS Pilgrim and Plymouth windows are new and smart. That's why they have become increasingly popular with our customers for new and remodeling work.

And you can buy them in complete sets, too. Sets include windows with frames, trim and hardware exactly as described on Page 70—a complete window at one low price. There's no fuss—no muss, because each piece is cut on precision machinery to fit perfectly.

Made of clear Pondsosa Pine full 1 3/8 inches thick, strongly mortised and tenoned and glazed with clear glass. Check rail design (see Page 70).

The number of lights or divisions in upper sash depends upon width of glass in bottom sash. Top sash of Pilgrim and Plymouth windows divided as follows:
Bottom Glass 12 to 14 in. wide—Top sash 2 lts. wide
Bottom Glass 16 to 28 in. wide—Top sash 3 lts. wide
Bottom Glass 30 to 44 in. wide—Top sash 5 lts. wide

Average shipping weights on windows only, 13 to 45 lbs.; on complete sets, 82 to 148 lbs.

State width first. All windows shipped from Philadelphia, Pa. For Freight Rates on windows, see Page 2.

PLAIN RAIL WINDOWS

274 HB 546

\$1.07

1-8 1/2 x 3-10

Plain rail Windows have no projection where the upper and lower sash meet. The upper sash must be made stationary in the frame. The lower then slides against the upper when raised or lowered. No sash weights required. Use Spring Bolts listed in our General Catalog. Always state width first.

ATTRACTIVE COTTAGE WINDOWS

A cottage window decidedly attractive in appearance—one that will harmonize well with any style home. Large windows are not only attractive but provide the maximum amount of light, especially where only one window can be used.

These Windows are made of clear Western Pondsosa Pine 1 1/8 inches thick. Carefully glazed with clear glass.

Cottage Windows require the same type of frame as any other window. See Pages 76 and 77 for complete line of window frames. Order frame with same opening size as listed below for window. Shipping weights 47, 50, 60 and 65 lbs.

Shipped Promptly from Philadelphia, Pa. Wards Budget Plan on Page 3.

WINDOW GLASS

SINGLE AND DOUBLE STRENGTH Safe and Prompt Shipment Guaranteed

The Standards of Quality set by Wards are very exacting. Only a manufacturer with long experience and expert facilities can measure up to them. We have selected some of the largest glass makers in America to make our glass. Our quality must be the best. That's why you can depend on Wards glass to be always clear and flawless.

Compare our low prices. See how much you save.

Safe Delivery Guaranteed. Even though skilled glass packers pack each shipment, it is always advisable to shake the box slightly when you get it at your freight office. If there is any sound to indicate that it has been broken in transit, open it in the presence of the station agent and note on the freight bill the number of lights broken. Be sure to mark the breakage on the freight bill. We will then refund your money for any breakage or replace the glass.

When ordering size not listed use the price of the next largest size, and be sure to specify width wanted. On orders for glass amounting to less than \$2.00, add 50c extra for boxing. The terms S.S. and D.S. mean single strength and double strength glass. Single strength glass runs in thickness from 12 to 15 lights to an inch, and the average weight per box is 70 pounds; double strength from 8 to 10 lights to an inch, and the average weight per box is 75 pounds. Shipped promptly from Philadelphia, Pa. See Page 2 for Low Freight Rates.

Leaded Crystal Glass

First Quality Materials at New Low Prices

There is a very pleasing decorative feature in these attractive but simple patterns. The designs harmonize well with any style of interior decoration. The joints are neatly made and well soldered. Bars are of lead but you can have coppered bars, at an additional cost of 30 cents per square foot. The minimum charge for leaded crystal in sizes less than 3 square feet is equal to the cost of a piece containing 3 square feet.

When ordering give width of glass opening first and height last. Leaded glass made special. Allow 8 to 10 days for manufacturing. Ship. wt. per square foot, 3 lbs. Shipped from Philadelphia, Pa.

DOOR FRAMES and JAMBS . . . perfect fitting . . . long-lasting . . . smoothly sanded . . . ready for painting.

WHEN you build . . . build for permanence. You can do it economically if you select Wards long lasting Door Frames and Jambs—they resist the ravages of time and weather. Sanded to a smooth finish they provide a perfect base for painting or varnishing. Naturally you want Frames and Jambs that are *made right!* Those you select from Wards are carefully cut from perfect patterns. *They must fit!*

THERE is two-fold economy in buying at Wards. First, because the lasting qualities of the Pondosa Pine and the careful way in which our Door Frames are made insure long, dependable service. Second, because Wards sell to you by mail at money-saving prices and ship to you direct-from-the-mill with all in-between profits eliminated.

IMPORTANT—If you want a smaller size Door Frame than is listed, you can easily cut any size to desired width and height. If you prefer to have it done at the mill, Frames will be cut smaller at an extra charge of 50c each. Frames are rabbeted for 1 3/8 in. doors unless otherwise specified. If desired, we will rabbet them for 1 3/4 in. doors, at no extra charge.

PLAIN CAP DOOR FRAMES

Frames With 1 3/8-inch Outside Casing

These frames are for standard 2 by 4 stud wall construction. Head and side jambs are 1 3/8 by 5 1/4 inches and rabbeted 1/2 by 1 3/8 inches to fit 1 3/8 inch doors. Sill is 1 3/8 by 7 1/4 inches. Head and side casings are 1 3/8 by 4 1/2 inches. Drip cap is 1 3/8 by 1 3/8 inches. Sizes listed are carried in stock. Shipped knocked down. For intermediate sizes order next larger size, and cut to fit. For Inside Trim, see opposite page. All pieces, including sill, are clear Pondosa Pine. Oak sills, 90c extra. Average ship. wt. each, 45 lbs. *Shipped promptly from Philadelphia, Pa.*

274 HB 609—State Size Wanted

Size of door—2 ft. 6 in. by 6 ft. 6 in.	\$3.10
Size of door—2 ft. 8 in. by 6 ft. 8 in.	3.25
Size of door—3 ft. by 6 ft. 8 in.	3.30
Size of door—3 ft. by 7 ft.	3.40

If plain cap frames with 3/4 inch outside casings are wanted, deduct 25c from the price of desired size listed above and order under Article Number 274 HB 608.

CROWN MOULD CAP DOOR FRAMES

Frames With 1 3/8-inch Outside Casing

These frames are for standard 2 by 4 stud wall construction. Head and side jambs are 1 3/8 by 5 1/4 inches and rabbeted 1/2 by 1 3/8 inches to fit 1 3/8 inch doors. Drip cap is 1 3/8 by 2 3/8 inches. Crown moulding is 3/4 by 2 inches. Head and side casings are 1 3/8 by 5 3/4 inches. Shipped knocked down. Sizes listed carried in stock. For smaller or intermediate sizes order next larger size and cut down to fit. All pieces including sill are clear Pondosa Pine, Oak sill, 90c extra. See page 75 for Inside Trim. Average ship. wt. each, 50 lbs. *Shipped promptly from Philadelphia, Pa.*

274 HB 611—State Size Wanted

Size of door—2 ft. 8 in. by 6 ft. 8 in.	3.50
Size of door—3 ft. by 6 ft. 8 in.	3.55
Size of door—3 ft. by 7 ft.	3.65

Frames for Stucco Walls

For 5/8 inch stucco walls, order frame 274 HB 609 listed under Plain Cap Door Frames and specify with beveled casing. Add 30c to the price quoted for desired size.

FRAMES or JAMBS FOR INSIDE USE

Wards Door Jambs or Inside Door Frames are for use with interior doors only. Furnished in three kinds of wood. You may choose either plain Red Oak, Yellow Pine or Gum as listed in table below.

77c
2' 8" by 6' 8"

Jambs are 3/4 inches thick by 5 3/4 inches wide with side jambs dadoed for head. Prices quoted below do not include stops. If stops are wanted, add 25c to prices quoted below.

These jambs are shipped knocked down but are all ready to set up. They are accurately cut so they fit perfectly—you can set them up quickly and easily. We quote four standard sizes which we carry in stock and ship promptly the day your order is received. If the size you require is not listed, order next larger size and cut down to the required size. If you desire, we will cut jambs to desired size at the mill for 35c per set extra.

Average shipping weight each, 20 lbs. *Shipped promptly from Philadelphia, Pa.*
State size wanted when ordering.

274 HB 601—Yellow Pine	77c
Size of door 2 ft. 8 in. by 6 ft. 8 in.	80c

Highest Quality - Lowest Prices

Wards Door and Window Trim is made of the finest clear grade Oak, Yellow Pine or Gum Woods. Every piece of wood is carefully selected for beauty of grain... then it's thoroughly seasoned and kiln-dried... manufactured on high speed machinery... all flat surfaces smoothly sanded. All three woods are ideal for stain and varnish. For enamel, use either Gum or Yellow Pine.

Because all these styles are manufactured in huge quantities and carried in stock, we can sell you this high quality Trim for much less than others usually ask. The quality should not be judged by our low price... Wards Door and Window Trim is all carefully made in modern factories by skilled workmen.

Trim parts are furnished about $\frac{1}{2}$ inch longer than required to allow for perfect fitting.

Read Carefully Before Ordering

All Trim is shipped direct from mills... you save extra handling costs. For sizes not listed, simply order the next larger size and cut down.

Each outside door needs one side of trim—inside doors need two sides. You need only one side of inside trim for each window. For twin windows, figure double the price of a single set of trim; for triple windows, figure three times the price of a single set. Tell us if you are ordering for twin or triple windows, so we can include mullion casing. Trim includes all parts specified, carefully bundled.

When you order your Trim from Wards you save all the complicated measuring and figuring usually connected with installing door or window trim. All pieces are well machined to fit and match perfectly... simply trim to fit your special requirements.

For a complete line of Paints and Varnishes, see Wards General Catalog. Freight is fast and economical. See Rates on Page 2.

Mission Door Trim

← (Pictured at left)

A simple good-looking Trim that lends dignity. A set consists of Side Casing, $\frac{3}{4}$ by 4 $\frac{1}{4}$ inches; Head casing, 1 $\frac{1}{4}$ by 5 $\frac{1}{2}$ inches; Base blocks, 1 $\frac{1}{4}$ by 4 $\frac{1}{4}$ by 11 inches. Average shipping weight per set 20 pounds. Shipped from Factory in Philadelphia, Pa.

Name any size, any style WINDOW

Made With the Latest Type Jam-Proof Pulleys

Even at Wards unusually low price you get this modern rust-proof type of pulley in every window frame. It's jam-proof—the sash-cord always rides squarely on the pulley—your windows always raise easily with the full benefit of the counter-balancing sash weights. Its closed construction makes it free of drafts and dirt as well as unbreakable.

The Pulley Stiles have pockets cut in for sash weights and are grooved to receive the sill at an angle so that water will run off.

274 HB 623—Frame for 2-light windows.
274 HB 1116—Frame for 4-light windows.
274 HB 1119—Frame for 8-light windows.
274 HB 1192—Frame for 12-light windows.

\$195

PLAIN CAP FRAMES

Use this type frame if your home is of 2x4 studding construction with 5/4 inch walls. Outside head and side casings of frame are 1 1/4 inches thick and will take Wards standard 1 1/4 inch Screens and Storm Sash.

Pulley Stiles and Head Jambs are 3/4 by 5 1/4 inches and include the Blind Stop. Both pulley stiles and head jamb are plowed and fitted with parting stops. Sill is 1 3/4 by 7 1/4 inches with groove in bottom for siding. Drip Cap is 1 1/2 by 1 5/8 inches.

See sketch at the left for details of construction and various members of window frame. Shipped from mill in Philadelphia, Pa.

Note: If 3/4-inch outside casings are wanted, deduct 30¢ from the price of desired size listed under 1 1/4 inch casing and order frames under number 274 HB 623.

All frames pictured on Pages 76 and 77 are furnished for 2, 4, 8 and 12 light windows in sizes indicated.

... YOU GET QUICK SERVICE

Sixteen different types of Window Frames... as many as sixty sizes of each... frames all packed and ready for shipment the minute your order is received. Wards give you the fastest service from the largest and most complete stock carried anywhere. Just think what an advantage that is, when you get such big savings too! Careful workmanship and approved construction assure you the best of quality. Selected clear Pondosa Pine assures you long, satisfactory service.

274 HB 625—Frame for 2-light windows.
274 HB 1117—Frame for 4-light windows.
274 HB 1130—Frame for 8-light windows.
274 HB 1193—Frame for 12-light windows.

\$220

MOULDED CAP FRAMES

Use for frame buildings with 2x4 studding and walls 5/4 inches thick. All specifications are same as Plain Cap Frame at left, except for the Cap construction: the drip cap is larger and has a crown moulding under it. See sketch at left for details of construction. See prices below.

Frames for Cottage Windows

Order the same as if for 2-light frames of same opening size.

Frames for 5 1/4" Stucco Walls

Order Plain Cap Frame listed at left and specify, with beveled casings and add 40¢ extra per frame (or you can easily bevel this casing yourself when you get it on the job).

For Frame Sizes Not Listed

If the style and size you want is not listed here, write our Engineering and Information Department and we will promptly quote you a price.

FRAMES FOR 8-LIGHT WINDOWS

Frames for four and eight light windows are furnished in the four styles shown above. Plain Cap, Crown Mould Cap, Box and Brick Veneer. When ordering state size of opening and article number.

Size of Glass	Size of Opening Width Height Ft. In. Ft. In.	Plain Cap Frame 274 HB 1119	Crown Mould Cap Frame 274 HB 1130	Box Frame 274 HB 1132	Brick Veneer Frame 274 HB 1197
9x12	1-11 x 4-6	\$2.42	\$2.67	\$2.57	\$2.52
10x12	2-1 x 4-6	2.48	2.73	2.63	2.58
10x14	2-1 x 5-2	2.60	2.85	2.75	2.70
12x14	2-5 x 5-2	2.76	3.01	2.91	2.86
12x16	2-5 x 5-10	2.98	3.23	3.13	3.08

Prices of Mullion or Twin Window Frames are two times the price of single frames of the same size, plus 50¢.

Prices of Triple Window Frames are three times the price of single frames of the same size, plus \$1.00.

Prices of Quadruple Window Frames are four times the price of single frames of the same size, plus \$2.75.

All Frames Shipped from Mill in Philadelphia, Pa. Freight is fast and economical. See low Rates on Page 2.

FRAME for any type house • we have it

... AND YOU SAVE MONEY

QUANTITY production with the latest type of high speed machinery makes it possible for us to produce all our millwork at a very low price. The savings of this low cost production are passed on to you along with the benefits of the precision and accuracy made possible by this modern equipment. Added to Wards economical production are the further economies of selling by mail and shipping direct from the mill to you.

BOX WINDOW FRAMES

This is the frame to use for Brick, Stone and Concrete buildings. It is for standard 9-inch brick walls but can be used for 13-inch walls because the inside lining is plowed to receive extension jambs.

Brick Mould $1\frac{1}{2} \times 2$ inches with beaded edge. Blind Stop $\frac{3}{4} \times 1\frac{1}{2}$ inches. Pulley Stile $\frac{3}{4} \times 5\frac{1}{2}$ inches, including blind stop and inside lining. Parting Stop $\frac{1}{2} \times \frac{3}{4}$ inch. Inside Box Lining $\frac{3}{4} \times 4$ inches. Back Box Lining $\frac{3}{4} \times 3\frac{3}{4}$ inches. Head Jamb $1\frac{1}{2} \times 4\frac{1}{2}$ inches, with $\frac{3}{4} \times 1\frac{1}{2}$ inches Blind Stop. Sill $1\frac{1}{2} \times 5\frac{1}{4}$ inches.

Same fine quality and excellent construction as our Plain Cap and Moulded Cap Frames listed on opposite page.

No arch boards or spring pieces are included, but can be furnished for 15c extra per frame. The arch boards can readily be nailed right on top of the head brick moulding.

See instructions above on "How to Order." Buy on Wards BUDGET PLAN—see Page 3 for details.

274 HB 620—Frame for 2-light windows.
274 HB 1131—Frame for 4-light windows.
274 HB 1132—Frame for 8-light windows.
274 HB 1194—Frame for 12-light windows.

\$210
1-4x3-10

BRICK VENEER FRAMES

Use this Frame for Brick Veneer buildings with walls $\frac{5}{8}$ inches thick, measuring from outside of sheathing to and including plaster. This is the thickness of the average wall with 2x4 studding.

Brick Moulding $1\frac{1}{2} \times 2$ inches. Blind Stop $\frac{3}{4} \times 1\frac{1}{2}$ inches. Parting Stop $\frac{1}{2} \times \frac{3}{4}$ inch. Pulley Stile and Head Jamb $\frac{3}{4} \times 5\frac{1}{4}$ inches. Sill $1\frac{1}{2} \times 7\frac{1}{4}$ inches.

To secure lowest possible freight rates, all of Wards Window Frames shown on Pages 76 and 77 are shipped knocked-down, ready for assembly. All parts are carefully cut and machined so that assembly is easy. Freight Rates are low—see Freight Rates on Page 2.

WARDS INTERIOR TRIM and MOULDINGS

Give Your Home a "Better Finished" Look

All our mouldings are made from first quality, thoroughly kiln-dried, clear lumber carefully selected for beauty of grain and freedom from knots and defects. All flat surfaces are machine sanded to perfect smoothness.

Such first quality mouldings would usually cost you much more. You save at Wards because we handle large quantities and ship direct from the mill to you—eliminating in-between profits and extra handling charges.

Oak mouldings come in random lengths varying from 6 to 12 feet; other woods in random lengths from 10 to 16 feet.

If exact lengths are desired, add 10 per cent to prices quoted.

All materials on this page Shipped from Philadelphia, Pa.

See Page 2 for Low Freight Rates on Interior Trim.

Everything You Need to

That means no tiresome search for what you want . . .

If you were planning to sell your home you'd tear out that old enclosed stairway and put in a modern open one . . . for a new stairway would increase the selling value of your home out of all proportion to the little you spend. If a new stairway makes a home better to buy . . . surely it makes it better to live in for you yourself!

STAIR TREADS AND RISERS

79c
Each

Stair Steps or Treads are carried in stock in Yellow Pine and Plain Red Oak. Size of each tread $1\frac{1}{8}$ inches thick by $11\frac{1}{4}$ inches wide by 3 feet 5 inches long. They have one edge rounded and are machine dressed and smoothed on the top side. Average ship. wt. each 12 lbs.

Size of each riser, $\frac{3}{4}$ inch thick by $7\frac{1}{2}$ inches wide by 3 feet 5 inches long. Surfaced and machine smoothed on face side. Furnished in Yellow Pine, Gum or Oak. With Gum Risers we recommend Oak Treads. Ship. wt. each 5 lbs. Shipped from Philadelphia, Pa.

Kind of Wood	274 HB 762—Stair Steps	274 HB 763—Stair Riser
Yellow Pine	79c each	29c each
Gum		35c each
Plain Red Oak	\$1.35 each	45c each

CONVENIENT DISAPPEARING STAIRWAY

Make your attic a useful part of your home with an inexpensive, space-saving disappearing stairway. To open, just pull the cord—to close, simply raise it, and give a slight push upward. No weights or pulleys. Its overhanging weight balances and closes the door. It goes up so easily a child can operate it. When closed, the stairway lies flat along the attic floor entirely out of the way. All that shows from below is a neat wood panel in the ceiling. The panel is in natural Ponderosa Pine, smoothly sanded and ready to be finished to match other woodwork in your home.

Trim for ceiling opening not included. See Page 78 for prices of trim. Stairway is furnished set up with complete instructions for installing. Allow 4 to 6 feet beyond opening for stairway when closed. Furnished in sizes listed below.

Height from Floor to Floor	Finished Opening Size in Ceiling Ft. In. Ft. In.	Floor Space at Base Required for Stairs When Open
7 ft. 7 in.	2-0 x 5-6	4 feet 9 inches
8 ft. 1 in.	2-0 x 5-6	5 feet 0 inches
8 ft. 7 in.	2-0 x 5-6	5 feet 3 inches
9 ft. 1 in.	2-0 x 5-6	5 feet 7 inches
9 ft. 7 in.	2-0 x 6-0	5 feet 10 inches
10 ft. 1 in.	2-0 x 6-0	6 feet 1 inch

FACE AND WALL STAIR STRINGER

← 274 HB 767 Wall Stringer

15c
Per Foot

274 HB 766 → Face Stringer

These illustrations show the relative positions in which the stringers are used. The dotted lines indicate the way stringers are ordinarily cut. The horizontal line indicates the tread and the perpendicular line indicates the riser. We do not cut the stringers for treads and risers because the space allotted for stairs and the height of ceilings differ in almost every building.

Both Wall and Face stringers are $\frac{3}{4} \times 11\frac{1}{4}$ inches. Face Stringer is square edged while the Wall Stringer is furnished with one rounded edge. Average shipping weight per lineal foot, 3 pounds.

Kind of Wood	Lengths Furnished	Prices are	274 HB 766	274 HB 767
Yellow Pine	10, 12, 14, 16 ft.	Per lineal foot	15c	15c
Gum	10, 12, 14, 16 ft.	Per lineal foot	18c	18c
Plain Red Oak	10, 12, 14 ft.	Per lineal foot	25c	25c

HALF CIRCLE STARTING STEP AND RISER

Oak or Gum \$7.95 Yellow Pine **\$5.95**

Fillet and Subfillet for Stair Rails

Use with stair rails on opposite page where $1\frac{1}{4}$ -in. square balusters are desired. Sub-Fillet is $1\frac{1}{8}$ by $\frac{3}{8}$ -inch plowed $1\frac{1}{8}$ by $\frac{1}{8}$ in.

Per Lineal Foot	Sub-Fillet 274 HB 755	Fillet 274 HB 754	Average ship. wt. per 100 feet, 25 lbs. Shipped from Philadelphia, Pennsylvania.
Yellow Pine	$1\frac{1}{2}$ c	1c	
Gum	2c	$1\frac{1}{2}$ c	
Plain Red Oak	$2\frac{1}{2}$ c	2c	

LANDING TREADS

The top or landing tread used on platforms and second floor levels is generally not as wide as the regular stair tread. We made our landing treads $1\frac{1}{8}$ inches thick, $3\frac{3}{4}$ inches wide, and 3 feet 5 inches long. They are rabbeted on the inner edge to $\frac{7}{8}$ -inch thickness so as to finish level with flooring on platforms or second floor halls. Average shipping weight each, 2 pounds.

274 HB 764—State Wood.
Yellow Pine. Each. **16c**
Plain Red Oak. Each. 35c

Shipped from Philadelphia, Pennsylvania.

RETURN NOSING for Open Stairways

Every open stringer stairway requires Return Nosing for each step. This is a standard pattern $1\frac{1}{8}$ by $1\frac{1}{4}$ inches. When ordering allow about three inches per tread for mitering. Average ship. wt. per 100 feet, 50 pounds.

274 HB 756—State Wood.
Yellow Pine. Lineal foot. **2c**
Plain Red Oak. Lineal foot. $4\frac{1}{2}$ c
Shipped from Philadelphia, Pennsylvania.

BUILD YOUR STAIRS!

BUILT-IN that Fit Any

A well planned, well arranged Kitchen Cabinet provides a convenient place for every item . . . saves many steps that make household tasks so tiring.

NOW every woman can design a kitchen cabinet for her own special requirements with every door and shelf exactly where she wants it. Through Wards individual cases you can get sizes and shapes suitable to any room or to your personal preferences. With the upper and lower cases listed below and on the opposite page, any number of practical combinations are possible. Order the single units necessary for the combination you prefer. When you add up the prices, you'll find the total cost surprisingly low.

NU-KITCHEN ENSEMBLE—at left

The attractive combination of individual units shown at left is assembled of two Upper Units 274 HB 1302, one Triple Connecting Unit 274 HB 1309, one Lower Unit 274 HB 1308, one each of Lower Units 274 HB 1306 and 274 HB 1307, and Broom Case Unit 274 HB 1311. Ship. wt. complete, 250 lbs.

274 HB 1300—Complete \$76.50

Single Upper Case Unit
Pondosa Pine. Outside dimensions 17 in. wide, 14 in. deep by 53 1/4 in. high. Doors have glass knobs. Ship. wt. 25 lbs.
274 HB 1301—Complete \$6.75

Double Upper Case Unit
Generous sized cabinet with four doors and four shelves. Built of clear Pondosa Pine 3/4 in. thick with Fir panel doors. Outside dimensions 34 in. wide by 14 in. deep by 53 1/4 in. high. Doors have attractive glass knobs. Ship. wt. 50 lbs.
274 HB 1302—Complete \$12.25

Triple Upper Case Unit
There's plenty of room here for cooking utensils, dishes, canned goods—for all those things you want to have close at hand. This big, over-size cabinet has six doors and four strong shelves. Made of 3/4-in. Pondosa Pine with Fir panel doors. Outside dimensions: 51 in. wide by 14 in. deep by 53 1/4 in. high. Glass knobs on doors.
274 HB 1303—Complete. Ship. wt. 75 lbs. . . . \$17.50

Upper Case Unit

This handy cabinet was designed especially to fit above an ice box, but may be used wherever a cupboard of this size is desired.

Sturdily constructed of 3/4-inch Pondosa Pine with Fir panel doors. All four doors are equipped with glass knobs. Two shelves in cabinet.

Outside dimensions: 34 inches wide by 14 inches deep by 34 1/4 inches high. It has a lot of storage room for the small space it occupies. Ship. wt. 40 lbs.

274 HB 1304—Complete \$8.95

Outside dimensions: 34 in. wide by 20 in. deep by 34 3/4 in. high.
Ship. wt. 40 lbs.
274 HB 1308—Complete \$12.75

CABINETS Kitchen...

Wards kitchen case units are made by skilled cabinet makers, of fine high-grade materials—Selected Pongosa Pine, with all door panels of Fir. Lipped doors and drawers for tight fit. All lower cases have Hardwood table tops and recess at bottom for toe space. Fine quality hardware is included. All parts are smoothly sanded, ready for you to paint, stain or enamel. Units do not have backs but fit tight against wall which forms back.

Cabinets are shipped knocked down from Factory in Philadelphia, Pa. to save you greatly on shipping charges. Included with each cabinet are blueprints, giving complete, simple instructions for assembling.

Wards Engineers Will Help You Select Cabinets to Meet Your Requirements

When ordering units send rough floor plan sketch showing where you want units placed and how you want them arranged, so that we may provide proper toe strip, ceiling mould, etc. If you have any trouble in planning a suitable arrangement, send us sketch showing location, width and height of doors and windows, exact ceiling height and size of wall spaces. Wards Engineers will suggest a suitable combination and quote prices on the necessary units.

See Low Freight Rates on Page 2.

Triple Connecting Case Unit

Designed to fit space above sink or windows, so that all available space is utilized. ¾-inch Pongosa Pine construction, with Fir panel doors equipped with attractive glass knobs. Case has 8-inch fillets at each end for adjustment to width.

Outside dimensions: 51 in. wide by 14 in. deep by 18 ¾ in. high. Ship. wt. 30 lbs.

274 HB 1309—Complete.....\$9.25

Double Connecting Case Unit

For smaller sink or window space, yet having ample storage space. All parts of ¾-in. Pongosa Pine excepting door panels, which are Fir Veneer. Two doors equipped with glass knobs.

Outside dimensions 34 in. wide by 14 in. deep by 18 ¾ in. high. 8-inch fillets each end for adjustment to width. Ship. wt. 20 lbs.

CONVENIENT Built-In ADDITIONS TO ANY HOME

BUILT-IN CABINET IRONING BOARD

\$595

One minute an attractive panel in the wall—the next instant a durable, rigid ironing board all ready for use. There's no hauling a heavy or cumbersome board from closet or pantry when you have one of Wards Modern built-in Ironing Boards. And there's a sleeve board, too—one of those handy little accessories that makes life a lot easier on ironing day.

Notice how solidly the board is supported by the rigid steel braces which hinge it to the case. This feature assures you a rigid ironing surface.

This ironing board is made to be built into the wall between the studding. Fits rough opening 14 1/4 inches wide, 82 inches high and 4 inches deep.

Trim is of clear Fir smoothly sanded, ready to finish to match your other woodwork. Door panels are of 3 ply clear Douglas Fir. Glass door knob and friction catch included on cabinet door. Ironing board will not warp because it is clear Pondosa Pine full 1 1/2-inch thick, 11 1/2 inches wide and 62 inches long. Sleeve board is 3/4 inches thick and 5 inches wide, 24 inches long and sets 4 inches above Ironing Board when in use. Shipped in carton set up ready to install. Just cut the plaster and lath between two studding, insert the cabinet and nail on the trim. Shipping weight 50 pounds. Shipped from Factory in Philadelphia, Pa.

Swivel Type Built-In CABINET IRONING BOARD

\$675

- Convenient
- Strong
- Sturdy
- Economical

- Board Swings Either to Right or Left
- Folds up when not in use

A compact Cabinet Ironing Board that can be used in any position. Large board is securely fastened to cabinet extension by a swivel attachment which permits it to turn either to right or left. Sturdy two-leg center support with rubber padded feet insures a rigid ironing surface at all times.

Large board is 1 1/8 in. thick and provides a full size ironing surface 12 3/4 in. wide by 50 in. long. Handy sleeve board 3/4 in. thick, 5 in. wide and 26 in. long swings out of sight when not in use. Asbestos lined bin at bottom of cabinet for storage of irons. Folds into compact cabinet 4 1/2 in. deep, 14 in. wide and 61 in. high. To install cut plaster and lath between studding, nail cabinet in place with bottom 19 3/4 in. above floor.

Both ironing boards are of clear Pondosa Pine. Cabinet door is of beautiful 3-ply Douglas Fir. Glass knob, friction catch and hinges for cabinet included. All surfaces smoothly sanded ready to paint.

Ship. wt. 40 lbs. Shipped Separately from Factory in Philadelphia, Pa.

274 HB 822—Oak. Per Pair.....\$43.25

Jambs and trim not included. For prices see Pages 74 and 78.

Popular Type GARAGE DOORS—Saving Priced

SWINGING TYPE DOORS

\$12⁸⁰

Low Priced for Extra Savings

Strongly constructed doors of edge-grain best grade clear Douglas Fir. These doors are built with the same care as our best interior doors for your home. All four corners are mortised and tenoned joined and securely held with steel pins. With ordinary care, this construction prevents sagging and bulging, but in addition, these doors have the same rigid construction at the center cross-member, bracing it further against strain or weakening. This fine construction assures you of a door as good as can be bought, capable of giving you the long service you want. Wards low price is due to our economical method of selling direct to you *by mail*—and shipping to you direct from the mill.

Six light windows with good clear glass securely held in place by wood stops. Door comes to you smoothly sanded and ready for painting. Full 1 3/4 inches thick. Each door is 4 feet wide by either 7, 7 1/2 or 8 ft. high. Shipping weight per pair, 230 lbs. Shipped from Chicago or Eastern Iowa. Be sure to state height.

274 HB 496—8 feet wide by 7 feet high. Per pair **\$12.80**
8 feet wide by 7 ft. 6 in. high. Per pair 12.85
8 feet wide by 8 feet high. Per pair 12.95

For Hinges and Locks See Wards General Catalog.

SLIDING TYPE DOORS

\$13⁶⁰

No Worry About Snow or Wind ... When Doors Slide In!

These doors are for installation on overhead-track, sliding-door hardware. Built of clear Douglas Fir in exactly the same manner as doors at left. They give you every advantage of durability and long service. All door corners and center cross-member made with mortise and tenon joints, securely held with steel pins to prevent sagging or warping.

The elimination of worry about snow blocking the garage, or wind slamming doors into cars, has made this type of door very popular. They may be installed with one section as a service door—or all three as a sliding unit. Will fit any type of sliding door hardware you have.

Windows glazed with good clear glass held with wood stops. Full 1 3/4 inches thick. Door comes to you smoothly sanded and ready for painting. Each door is 2 feet 8 inches wide. The three doors fill opening 8 feet wide. Be sure to state height wanted. Shipping weight per set 250 lbs. Shipped from Philadelphia, Pa.

274 HB 499—8 feet wide by 7 feet high. Per set **\$13.60**
8 feet wide by 7 feet 6 inches high. Per set 13.65
8 feet wide by 8 feet high. Per set 13.75

For Sliding Door Hardware See Wards General Catalog.

For Wards BUDGET PLAN SEE PAGE 3

NEW OVERHEAD SLIDING DOORS

Just a Slight Pull . . . and Up They Go—Out of the Way!

Here's exactly the garage door you've been waiting for! Let the wind blow its worst—there's no danger of this door slamming into your car as you enter or leave the garage. Let the snow pile knee high—this door slides right up past it! It's the most practical, trouble-free Garage Door—and best of all, it's priced right down where its purchase is a practical investment.

Even a Child Can Operate It

The Bilt-Rite Overhead Garage Door can be operated by a child. To open it from the outside just give a slight tug on the handle—the counter-balancing weights do the rest. No need of a service door. To open from the inside, just press your foot against the bottom—and up it goes. All pulleys and rollers are roller-bearing. Operates without banging—moves slowly and positively, has no springs or lever to get out of order, safe for women or children.

Cross-braces at the top and bottom hold the door securely in a permanently rigid, sag-proof and warp-proof unit. All former garage door troubles are eliminated. Nothing to balk—nothing to repair—nothing to cause trouble. Every installation is permanent.

Set consists of pair of 274 HB 496 doors (described above) securely doweled and glued into a single rigid unit, and complete hardware, including stranded flexible steel cables, roller-bearing pulleys, adjusting blocks, center hanger and track, side guides, counter weights, two steel cross-braces, special weatherstripping, overhead locking bolt and cylinder night latch.

Requires 8-inch minimum head room over top of door and 8 inches at side to allow space for weights. Shipped from Philadelphia, Pa.

274 HB 495—Door 8 ft. wide by 7 ft. high including hardware. Shipping weight 445 lbs. **\$35.95**
Door 8 ft. wide, 7 ft. 6 in. high, including all hardware. Shipping weight 455 lbs. 36.45
Door 8 ft. wide, 8 ft. high, including all hardware. Shipping weight 475 lbs. 36.95

Don't tug or drag at your present garage doors. Convert them to this modern, trouble-free type, with the hardware described above. Cross-braces securely fasten any type of door, either double swinging or triple sliding into a single rigid unit. Shipped from Stock.

84 HB 3943—Hardware Only. Shipping weight 225 lbs. **\$20.95**

This shows the door open. Note that it gives you a clear opening, the full width and height of the door frame. Note simplicity of parts and installation—the secure manner in which the door is fastened in place. Door rests securely in this position—the counter-balancing weights hold it firmly.

This is how door slides from open to closed position. Perfect counter-balancing and *no springs* permit slow and smooth operation. It may be opened to any position—and will stay there because the counter-balancing weights offset the weight of the doors.

This picture illustrates what little space is required by this door. If your garage provides only 6 inches space between closed door and bumper of your car, it will operate with plenty of clearance. Doors will fit garages with any type of roof. Note also the illustration in the insert showing handy cable adjustment clip.

Here again you can see the simplicity of the installation. Large, detailed, pictured directions show you how to put it up.

KROMA-TYLE for Bath and Kitchen Walls

28^c
per Sq. foot

**LOOKS LIKE TILE
FEELS LIKE TILE
COLORED LIKE TILE
But—Costs Less than Half as Much!**

CERAMIC tile makes the most beautiful, and long-lasting walls for bathrooms and kitchens. But of course tile is quite expensive, and that's why *Kroma-Tyle* is so popular with modern home builders.

Kroma-Tyle is the modern substitute for tile. Its low price helps many thousands of home owners to realize a cherished ambition of bright, colorful, sanitary walls at about *Half* the cost.

Kroma-Tyle offers you many of the features of tile—the same lustrous beauty of tile—the same delightful pastel colors of tile—the same sanitary features of tile—everything the same, but the price. One of the most important advantages of *Kroma-Tyle* walls, and one that every woman will appreciate, is their cleanliness—all you have to do is wipe them with a damp cloth. No repainting—no redecorating—no bother; and most important of all—no extra expense.

Apply Kroma-Tyle Yourself—It's Easy to Do

You can easily put *Kroma-Tyle* on yourself, because it goes on one piece at a time very simply with a special waterproof cement as a binder. The chair rail which is an attractive border (shown in pictures at left) is put directly on the wall in the same way. It can be put on finished plaster or any other porous wall. A special baseboard is not necessary either—you can retain the old one or eliminate it altogether.

Kroma-Tyle is a special rust-resisting metal sheet, 6 inches square with baked-on enamel. Slightly beveled edges make it look like real tile. The colors are durable and can be washed and scrubbed for years.

State color. Always order about 5 feet extra for fitting.

274 HB 590—*Kroma-Tyle* per square foot. Ship. wt. 8 oz. **28^c**

274 HB 591—Chair rail 2 1/4 by 12 inches. Ship. wt. 4 oz. **8^c**

Special Waterproof Cement for Applying Kroma-Tyle

You need 25 lbs. for each 75 square feet of *Kroma-Tyle*

Big Savings on Colorful Floor Tile

Tile floors are often considered too expensive for the modest home. But at Wards low price you can have beautiful, durable, easy-to-keep-clean tile floors for little more than the price others ask for good linoleum. See for yourself how little the attractive patterns shown below cost when you buy at Wards.

Modern home construction demands the extensive use of floor tile—in bathroom, sun room and kitchen. It's easy to understand why this is true—tile lasts a lifetime, it's sanitary, easy to keep clean and adds to the appearance as well as the value of your home.

HOW TO ORDER FLOOR TILE

Tile comes securely glued to sheets of paper with the proper spacing allowed between each piece for cementing. When ordering always be sure to allow a little extra for waste in fitting when laying. If your floor is square with no irregularities, figure square feet of tile required by multiplying width of room by length. If room has any irregularities, a sketch giving measurements must always be included when ordering patterned tile so correct amount of border needed can be determined.

All Floor Tile shipped from Factory near Cincinnati, O. On orders for less than 30 sq. ft. allow 50c extra for boxing.

MOSAIC FLOOR TILE

Made of 1-inch Squares and Hexagons

A popular, yet simple floor tile that makes an unusually attractive bathroom floor design. Tile floors are so sanitary, neat and easily cleaned that practically every modern home has tile kitchen and bathroom floors.

SAVE at Wards on LUMBER-26 IN CAR LOAD LOTS—DIRECT FROM THE MILL

Wards can furnish any kind of lumber you need in carload lots. If you are going to build a house or barn you will need a full carload of lumber. Just send us a list of all the materials you need—joists, studding, lath, wood shingles, siding, etc.—and we will quote you the lowest possible delivered price. There is no obligation on your part to buy—this estimating service is absolutely FREE.

Wards can save you money on lumber in carload lots because we deal direct with the largest saw mills in all parts of the country. We ship direct from these mills to you, thus eliminating all re-handling charges, in-between profits and unnecessary expense. Large quantities of lumber are always carried in stock at the mills. You get exactly what you want and get it quick.

Every piece of lumber sold by Wards is carefully graded according to standards adopted by the Manufacturers' Associations and in accordance with the United States Bureau of Standards specifications.

Expert lumbermen carefully examine every piece of lumber. It must meet the highest standards of quality for the grade specified. That's why you can depend on getting lumber of the grade you want or better, from Wards.

IMPORTANT—The kind of lumber used in different parts of the country varies—for example, yellow pine framing lumber is used exclusively in some sections and fir in other. All woods are not carried at each mill—our quotation will be made on the kind of lumber carried at mill nearest you.

Write for Free Estimates on Lumber

When sending us a list of the lumber you need, be sure to tell us the items you want, the number of pieces, the sizes and grades. We can save you the most, if you tell us the purpose for which the material is to be used. We will quote you the lowest possible delivered cost.

Write for FREE ESTIMATES- ON OAK-MAPLE-FIR-PINE HARDWOOD FLOORING

HARDWOOD floors, especially Oak, are so expressive of good taste that many people have the idea that they are expensive but such is not the case at Wards. You can lay Oak flooring over old floors for just a little more than the cost of many perishable floor coverings—while for upkeep and permanent value there is no comparison. Time stands still for oak floors—like fine old furniture, they grow more beautiful with age.

Just tell us the kind, grade and amount of flooring you need. We will quote you a delivered price. This estimating service is absolutely free. You are under no obligation to buy. If you prefer, just tell us the size of your rooms and we will estimate for you the amount of flooring needed as well as quote you the lowest possible delivered price.

First or Clear Grade is the best. The face is clear, as the name implies. Comes in lengths 2 to 16 feet with lengths under 4 feet not to exceed 20%.

Second or Select Grade: contains some slight imperfections, but is excellent flooring, suitable for all, except the very highest class work. Comes in random lengths 1 1/2 to 16 feet.

Third Grade or Number One Common: can be used where a good serviceable floor is wanted without so much regard for the finished appearance. It will admit sound knots and defects which will not affect its wearing qualities.

Art. No.	Kind of Wood	Grade	Size Face

Wards VENEER PANELS

These 3-ply Fir Veneer Panels are the ideal material for making drawers, table tops, shelves, racks, cabinets and for many other practical purposes. They are excellent for jigsaw, coping saw or band-saw work. Light in weight yet strong enough to hold nails and screws permanently even when they are placed near the edges.

Wards Veneer Panels are made of 3 thin sheets of kiln-dried Douglas Fir securely cemented together with water-

proof glue. The wood grain of the center ply runs opposite to that of the other two plies to give them greater strength and rigidity. Each side is smoothly sanded ready to finish.

Furnished with both sides sound, so either side can be finished with stain, varnish or paint. Ship. wt. per sq. ft. 3/16-in. panels, 1 lb. and 7/16-in. panels 1 lb. 4 oz.

Wards *Superb* 4-PLY WALLBOARD

42^c SHEET

- Very Economical
- Saves You Work
- Saves You Time
- Saves You Money

32 Inches by 6 Feet

Wards *Superb* 4-ply WALLBOARD is so inexpensive you can make several improvements for what one would ordinarily cost in the usual materials... So light in weight, it's easily handled by one man... So easy to apply that you can do the work yourself with only a hammer, nails and saw.

A room is completed quickly, because each sheet will just cover the distance between studding set 16 inches apart. When you drive the last nail, the job is done. No painting or papering is necessary because Wards *Superb* Wallboard has tinted surfaces; cream on one side, salmon on the other. But you can easily paint it any color you wish and it will hold the finish splendidly. (Do not paper wallboard.)

Superb WALLBOARD is made of four plies of tough, close textured fiber board, firmly cemented and compressed to $\frac{3}{16}$ -inch thickness. Sheets are about $\frac{1}{16}$ to $\frac{1}{8}$ in. narrower than specified to allow for expansion at joints.

Orders for less than three sheets cannot be accepted *Shipped Separately from Stock*. Freight costs but little. See Page 2 for low Freight Rates.

Build or Repair Quickly with *Plycraft*

Natural Wood Wallboard

- LESS THAN **4^c** Sq. ft.
- 3 Plies of Beautiful Fir Veneer
 - 4 Times as Strong as Lumber
 - Clean—Light—Easy to Handle
 - A Very Economical Material

Plycraft Wallboard is made of three sheets or plies of selected old-growth Douglas Fir rotary-cut veneer firmly cemented together with waterproof glue under hydraulic pressure. The grain of the center ply runs in an opposite direction to that of the other two plies. This principle of construction gives *Plycraft* far greater shear and tensile strength than solid lumber. That's why it is almost impossible to split *Plycraft*... why nails and screws can be driven almost at the very edge of a sheet.

Each ply is scientifically dried before gluing and any possibility of shrinking or expanding is entirely eliminated by the alternate directions of the grain. Once in place, *Plycraft* is warp-proof.

Plycraft is light in weight and easy to handle. The natural wood surfaces are sanded smooth and will take a beautiful finish, either paint, stain or varnish. It combines all the desirable qualities of lumber with the convenience of wallboard. That's why it is the ideal material for economical building or repairing.

Furnished in sheets 48 in. wide. Face side, sound and sanded for finishing. Side to fit against wall has minor imperfections. 174 HB 901—Be sure to state size when ordering.

Use **WARD'S BUILDING PAPER** generously

The saving on fuel alone soon repays its low initial cost

YOU DON'T build or remodel every day. That is something most people do only once or twice in a lifetime. And it's economy in the end to do the job right while you're at it. For instance—the liberal use of good Building and Insulating Papers pays far more than its cost, in *added* comfort and fuel savings.

Whether you want to keep out the heat from a blistering summer sun—more effectively shut out the penetrating chill of winter's icy blasts—hush the noise of hurrying feet or shrill voices—or do any of many other things Wards building papers and felts are designed to accomplish—you'll find exactly the right material described below.

For years Wards has specialized in *first quality* building papers.

Each of the products we offer represents years of development and practical experience under almost every imaginable climatic condition. And each is priced at a *substantial saving* over the usual cost of similar products elsewhere.

Enjoy the added comfort—and extra savings they assure. Wards Budget Plan of Monthly Payments makes it convenient for you to take full advantage of this profitable investment in comfort and economy—see Page 3.

All Wards Building Papers Shipped promptly from Stock. Actual (also shipping) Weight shown with each listing below. Freight Rates are on Page 2.

RED ROSIN SIZED SHEATHING

49c
A Roll

A standard quality, hard, smooth-surfaced, rosin-sized building paper used extensively for general sheathing purposes. Keeps out wind, dampness and moisture, when used under siding and between floors. Made of tough paper pulp stock in three popular weights, each put up in rolls 36 inches wide containing 500 square feet. Its low price makes it economical for protecting newly finished floors when building and many similar uses.

174 HB 218—Light Weight. Actual and ship. wt. 20 lbs. Per roll.....**49c**
174 HB 220—Medium Weight. Actual and ship. wt. 30 lbs. Per roll.....**74c**
174 HB 223—Heavy Weight. Actual and ship. wt. 40 lbs. Per roll.....**98c**

STANDARD DEADENING FELT

\$1.85
A Roll

Plenty of this heavy felt between floors and walls deadens sounds and insulates from heat and cold.

Also used under floor coverings to cushion carpets, rugs and linoleum against the wear of pounding heels and to add warmth and comfort to the home.

Unusually low priced for this good quality. A good investment for any home.

Rolls 36 inches wide contain about 450 square feet.

174 HB 237—Heavy Weight. Actual and ship. wt. 50 lbs. Per Roll.....**\$1.85**
174 HB 238—Extra Heavy Weight. Actual and ship. wt. 75 lbs. Per Roll.....**2.70**

STRONG REINFORCED SHEATHING

\$2.48
A Roll

An exceptionally sturdy, water-proof building paper reinforced with plenty of strong jute strings cross laced one inch apart between two layers of tough, tan color Kraft paper and all bound together with water-proof asphalt. Used by builders everywhere for high class sheathing work. Especially good for use under brick veneer, stucco, etc., as it does not dry out and lasts indefinitely without appreciable deterioration or loss of effectiveness. Its tough texture also prevents tearing when putting it on.

174 HB 225—Roll of 500 square feet, 36 inches wide. Weight 30 lbs. Per Roll.....**\$2.48**

BLUE PLASTER CARDBOARD

79c
A Roll

A heavy, durable paper of tough texture that makes an excellent sheathing paper. Similar to red Rosin Sheathing described at left, except heavier and of dark blue color. Used for lining walls and ceilings of attics, basements, summer cottages, garages, etc., to make them warmer.

174 HB 234—Roll of 250 sq. ft., 36 in. wide. Weight 30 lbs. Per Roll.....**79c**
174 HB 235—Roll of 500 sq. ft., 36 in. wide. Weight 60 lbs. Per Roll.....**\$1.58**

74 HB 175—Large Headed Tacks for applying. Order one 8-oz. package for each 250 square feet. Per package.....**12c**

TARRED ROOFING FELT

\$1.98
A Roll

High quality, tough felt saturated with tar. Fine for general sheathing purposes and especially where water-proofing qualities are desired. Because of its low price many customers use it for lining poultry houses, milk houses, garages, etc.

Three or four thicknesses thoroughly cemented together with coal tar pitch and the top surface covered with gravel makes an excellent tar and gravel roof. Also used for roofing and siding on sheds, camps and other temporary buildings.

174 HB 249—Roll of 432 square feet, 32 inches wide weighs 62 pounds. Price per roll.....**\$1.98**

ASBESTOS INSULATING PAPER

69c
A Roll

Used for covering furnace pipes, steam pipes and anything where insulation against heat or loss of heat is desired. Fire-proof. Will not burn even when brought in direct contact with flames. Also used between floors and walls to keep the heat in during the winter and keep the heat out during the summer.

INSULATE YOUR HOME for MORE

Insulate with Rock Wool to Eliminate Fuel Waste

1—Heat Loss Through Roof — Thirty-five per cent of your heat loss in winter is through the roof. Apply Wards Rock Wool Batts between the rafters and it will completely seal up this greatest source of heat loss.

2—Heat Loss Through Floors — Insulate between the floor joists with Wards Granulated Rock Wool and eliminate all floor drafts. This will also deaden sound and prevent noises from penetrating from one floor to another.

3—Heat Loss Through Walls — Fifteen per cent of your heat loss in winter is through the outside walls. Wards Rock Wool applied between the studding will eliminate this extravagant loss and greatly reduce your fuel bills.

Rock Wool Is 3 to 8 Times as Effective

This Chart shows the insulating value of Wards Rock Wool (3 1/4 inches thick) as compared to other types of insulating materials which are 1/2 inch to 1 inch thick.

TYPE of INSULATION	COMPARATIVE VALUES
Wards Rock Wool 3 1/4 inches thick	████████████████████
Insulating Board 1/2-in.	████
1-in.	██████
Corkboard 1-in.	██████
Insulating Blankets 1/2-in.	████
1-in.	██████

This picture shows that Wards Rock Wool is absolutely fire-proof and heat scarcely penetrates it. That's why it's Listed by The Underwriters' Laboratories, Inc., as fire resistant and will reduce your insurance.

Wards Rock Wool Insulation is absolutely odorless and cannot deteriorate. It will not attract rats, mice or other vermin. Tests show that they cannot eat Rock Wool and will not stay close to it.

SAVE Fuel Bills . . . Increase Comfort . . . with Wards Rock Wool Insulation

Wards Rock Wool Insulation is the newest and most efficient type of insulating material known. It is made by blowing live steam through molten limestone. Looks like raw wool. Is absolutely water-proof, fire-proof, vermin-proof and sound-proof. Will not disintegrate, break down, dust out, sag or settle. Forms a permanent insulation as effective as a solid stone wall eleven feet thick, and even more lasting than your walls. Clean, odorless, light in weight and easy to install. The unusually high insulating value of Rock Wool is due to the countless number of tiny air cells it contains which prevent the passage of heat from one side of the material to the other. It has been thoroughly tested in thousands of homes in every climate and has never failed

to give complete satisfaction. In winter Wards Rock Wool will keep your home 15 to 20 degrees warmer and save you 30 to 40 per cent on your fuel bill. In summer it will make your home 15 to 20 degrees cooler.

Reduce your fuel bill—protect the health of your family—increase the market value of your house—have much greater comfort both in summer and in winter—deaden sound—and eliminate work and fire hazard by not having to force your heating plant . . . all by the simple installation of Wards Rock Wool Insulation.

It comes in two convenient forms—Granulated and in Batts. Use it between wall studs, floor joists and roof rafters. Shipped promptly from Albany, N. Y.

Granulated Rock Wool for Floors and Walls

Convenient granulated form especially adapted for walls and floors in finished homes. Since making the above illustration of Granulated Rock Wool (in bags) we have found that shipping in cartons assures better delivery and makes it much easier to apply. Now it comes in cartons 12 by 12 by 30 in. containing 4 cu. ft. and insulates 13 1/2 sq. ft. 3 1/4 in. thick. Actual and ship. wt. 35 lbs.

274 HB 270—Per Carton 98c

Rock Wool Batts for Exposed Studding

For use between rafters, exposed wall studding and floor joists. Easy to apply . . . just shove batts between rafters, studding or joists and their natural "springiness" will hold them without fastening. Easily cut with a knife for irregular shapes. No waste—use trim for caulking. Carton contains 9 batts and insulates 18 sq. ft. 3 1/4 in. thick. Ship. wt. 30 lbs.

274 HB 271—Per Carton \$1.35

COMFORT with LESS FUEL.....

Healthy animals are more profitable. Protect them from cold, heat and dampness by insulating with Wards Cel-Board. The low cost will surprise you.

35% of house heat goes through the roof. Line your attic with Wards Cel-Board... save this heat, reduce your fuel bill and protect your health.

Wards Cel-Board not only effectively insulates your home but transforms unused space into clean, dry, warm guest-rooms, work-shops or play-rooms.

Wards Cel-Board binds perfectly with plaster providing almost 3 times the tenacity of wood lath. For plastering use shiplapped Cel-Board 174 HB 261.

YOU Can't Change the Weather... but... You Can Insulate with Wards Cel-Board

The saving in fuel alone will soon pay for Cel-Board. Stop having cold floors and drafts which cause discomfort, colds and endanger the health of your wife and children. Makes your home about 10 to 20 degrees warmer in winter and saves 20 to 30 per cent of your fuel bill. Stops the work and fire danger of forced furnaces. And in summer no sleepless nights in oven-like bedrooms. Cel-Board makes your house 10 to 15 degrees cooler by keeping out the heat of the sun.

Cel-Board Is a Fine, First Quality Insulating Board

Cel-Board is the product of one of America's large, well-known insulating board makers. It has all the advantages so widely advertised for this type of material. Insulation—sound-deadening—ease of handling—ease of sawing without splitting or cracking. Unequaled for finishing attics and basements or building new rooms in your home.

The special construction of Cel-Board gives it a firm, uniformly textured body—is not built of "layers"—that is knit into a solid unit and highly compressed when manufactured. This gives it great density and structural strength. Nail heads cannot pull through it in any practical use. Each fiber is waterproofed at the mill. Heat cold and moisture will not affect it—it will not rot.

Use it for lining walls, floors and ceilings in homes, garages, barns and all types of farm buildings. May be applied over old, cracked plaster.

You don't have to build a new house to gain these benefits. Attic insulation seals up the biggest source of heat loss. It is so easily installed that it is generally advised for homes already built. The cost is moderate and fuel savings will soon pay for it.

Easy to apply... just nail it directly to the rafters, joists and studding. Easily handled—quickly applied. Its neutral tan color blends with almost any decorative scheme, or it may be painted any desired tone.

It's wasted heat that melts the snow on your Roof

Keep That Lost Heat Indoors

It's the heat you lose that melts the snow on your roof. Either Wards Rock Wool or Cel-Board Insulation will keep that heat indoors for your comfort, protection and economy. Insulated homes never have drafty stairs, hard-to-heat rooms or cold floors. They're 10 to 20 degrees warmer on the same amount of fuel.

Insulated homes are 10 to 20 degrees cooler in summer. The blazing sun showers heat into uninsulated homes making bake-ovens of your rooms. Put a layer of insulation in your home and have a perfect barrier against heat.

Stop Wasting Money on Fuel

You are losing cash as well as comfort every day you postpone insulating your home. Insulating a weather-stripped, storm-sashed house saves from 20 to 30 per cent of the fuel bill.

This saving will soon pay for the insulation. The comfort and many years of fuel savings are free. You will make money on your purchase.

And—insulating your home with Wards Rock Wool or Cel-Board increases its market value.

Wards Atlas Smooth Surface Roofing

MULTI DIPPED and DOUBLE COATED for LONG SERVICE—SURE PROTECTION

Thousands of roofs where Wards Atlas Smooth Surface Roofing was applied 15 to 20 years ago are still giving good service. And it's no wonder... we've spared no expense in making Atlas as fine as any FIRST QUALITY Asphalt roofing made. That's why you can depend on Atlas to withstand years of driving rain and melting snow... years of scorching summer sun and bitter winter cold.

The felt base is made of long, resilient wool and cotton fibers all interwound and bound together to insure tremendous strength and durability. This tough fiber base is dipped many times into a saturating bath of highest quality hot asphalt which coats the fibers and cements them together. The multi-dipping process drives out every bit of moisture and makes a waterproof, elastic foundation that will endure every stress and strain of long service.

Both sides of the felt receive an equally heavy coating of water-proof asphalt, especially selected for its ability to resist cracking, peeling, hardening, blistering and drying out. Finally a thick coat of flake mica is sprinkled on the top to prevent any possibility of sticking in the rolls.

No wonder Wards Atlas Roofing defies weather and wear for years!

This picture shows how the felt base used in Wards Atlas Roofing is completely saturated with hot asphalt. Any moisture present is completely driven out of the felt before the heavy coatings of asphalt are applied.

Cross Section of Atlas Roofing

B—Saturated felt base.
A and C—The heavy double coating of high grade asphalt of equal thickness.

Use on New Roofs or Over Old Wood Shingles

For new buildings—for re-roofing—for short time protection—no matter what type of service you want, Wards Atlas Roofing will fill the need and save you money. It is furnished in three weights all of which are listed at the right. Extra Heavy Weight will give the longest service because the felt base is slightly heavier and contains more saturant and coating. Heavy Weight and Medium Weight will give just as good protection but won't last quite as long.

Wards Atlas Roofing is suitable for any roof having a pitch of 1 1/2 in. or more per running foot. It's easy to put on... just nail it to the roof boards or over old roofing or wood shingles. For over old roofing order rolls with 1 3/4-in. nails, for new roofs order rolls with 1-in. nails.

For patented Lap-kap Fasteners see Page 91.

Rolls are 36 in. wide and contain 108 sq. ft., covering 100 sq. ft. of roof surface, allowing 2 in. for laps. Large head galvanized roofing nails, cement for laps, and complete instructions for laying included with each roll.

Rolls Shipped Separately from Albany, N. Y., Baltimore, Md., York, Pa. or Northern New Jersey. For Freight Rates see Page 2.

Wards BUDGET PLAN—See Page 3

Wards LOW PRICE Smooth Surface Roll Roofing

Light Weight—35 Lbs per Roll

Standard quality Asphalt Roofing that will give good protection, but not for so long a time as the medium weight listed at the right. Ideal for temporary buildings. Made of good roofing felt, saturated and coated with asphalt. Rolls contain 108 sq. ft. and cover 100 sq. ft., allowing for 2 in. laps. Packed complete with 1 in. large head roofing nails and cement for laps. Suitable for roofs with 1 1/2 in. pitch or more per running foot. Shipped from same points as Atlas Roofing above. Actual and ship. wt. per roll 35 lbs.

274 HB 87—Per Roll..... **92c**

Medium Weight—45 Lbs. per Roll

A Medium Weight Smooth Surface Roofing similar to Wards Medium Weight Atlas listed above—but not built to last quite as long. Designed for temporary buildings or wall surfaces where only a few years' service are required. Rolls contain 108 sq. ft. and cover 100 sq. ft. of surface. Packed complete with 1 in. nails and cement for laps. Suitable for roofs having a pitch of 1 1/2 in. per running foot. Shipped from same points as Wards Atlas Roofing. Actual and ship. wt. per roll 45 lbs. Low Freight Rates on Page 2.

274 HB 31—Per Roll..... **\$1.15**

Heavy Weight—55 Lbs. per Roll

Similar to Wards Heavy Weight Atlas Roofing listed above, but not intended to withstand the long, hard wear that Atlas does. However, it is a good, heavy roofing built to give you reliable service and priced to save you money. Rolls contain 108 sq. ft. and cover 100 sq. ft. of surface. Comes packed complete with 1 in. nails and cement for laps. Suitable for roofs having a pitch of 1 1/2 in. per running foot. Shipped from same points as Wards Atlas Roofing. Actual and ship. wt. per roll 55 lbs. Low Freight Rates on Page 2.

Wards Superslate Asphalt Roofing

- Choice of 3 Permanent Colors
- Full Weight 90 lbs. per Roll
- Made to Last 16 to 18 Years

For years Wards Superslate Asphalt Roll Roofing has been an unquestioned leader among fine roll roofings. For years it has given thousands of our customers long, dependable service. We've spared no expense in producing a roofing that will give you years of trouble free service. Superslate is made to last 16 to 18 years. You get this sure protection at the lowest possible cost . . . about 10c to 12c per 100 sq. ft. a year.

NOW we've improved it . . . made it even more attractive by adding bright new, non-fading shades of green and red. Don't confuse these colors with the old, dull, drab colors. They're much brighter and more beautiful.

All colors of Wards Superslate Asphalt Roll Roofing are labeled by the Underwriters' Laboratories, Inc. as fire resistant. This means that Superslate provides sufficient protection from flying sparks and burning embers to save you up to 12 per cent on insurance as compared with wood shingles.

Specifications

Rolls contain 108 sq. ft. to cover 100 sq. ft. of surface, allowing 2-in. laps. Cement for laps, large head galvanized nails, and instructions for laying included with each roll.

Use 1-in. nails for new roofs; 1 1/4-in. nails for over old roofing or shingles.

Shipped Separately from Factory in Baltimore, York, Pa. or Northern New Jersey.

Per Roll . . . **\$1.70** Per Roll . . . **\$1.80**

Shipped from Same Points as Listed for Superslate Asphalt Roofing. You can buy your roofing on Wards Budget Plan, see Page 3.

LONG LIFE is Built into Superslate

Mineral Surface

Note how the top surface of bright, non-fading minerals is securely embedded in the heavy coating of tough asphalt.

Asphalt Top Coating

An extra heavy layer of high grade asphalt especially selected for its ability to resist peeling, cracking or blistering.

Heavy Felt Base

Finest long-fiber roofing felt, thoroughly saturated with hot asphalt to drive out every bit of moisture that is present.

Asphalt Back Coating

A thinner coating of asphalt on the back to prevent moisture penetrating, the felt base from the underneath side.

HOW TO ORDER ROOFING

Multiply length in feet of roof by length in feet of rafter on one side. Double this amount to allow for other side. Allow extra for gables or porches. Divide by 100 to find number of rolls or by the roof coverage per bundle to find number of bundles of shingles.

If you prefer, send dimensions of your roof to our Engineering Service Department and we will estimate for you.

If roofing is to be laid over old roof order rolls packed with 1 1/4-in. nails. 1-inch nails are for new roofs. All roll roofing suitable for any roof having pitch of 1 1/2 in. or more per foot.

You Can Buy Wards Superslate

It is a FINE Quality That Will Last 16 to 18 Years

HEXAGON STRIP SHINGLES SEE OPPOSITE PAGE FOR CHOICE OF COLOR

\$1.98
A
Bundle

HERE'S a favorite you'll find on many of the better homes in almost every progressive community. NOW we've improved it—made it even more attractive by adding bright, new, permanent shades of red and green. Don't confuse these brighter and more beautiful colors with the old, dull red and green found in ordinary roofing. Also furnished in Black, Color-Blend, Red Mix and Green Mix—all attractive, permanent, non-fading colors.

Standard Hexagon

Each strip 11½ inches wide by 36 inches long—providing a roof with 2-in. head laps. Each bundle of 43 strips covers 50 square feet of roof surface. Actual and shipping weight per bundle, 80 lbs.

FOUR-IN-ONE STRIP SHINGLES SEE OPPOSITE PAGE FOR CHOICE OF COLOR

\$1.98
A
Bundle

IF YOU prefer the more conventional design shingles—here they are. They make a wonderfully attractive roof which does full justice to the finest home. The colors are not only permanent, but Wards new red and green colors are much brighter and more beautiful than ordinary roofing. Choice of 4 colors—a new, rich Tile Red, a new, cool Forest Green, a standard Blue-Black, or a beautiful Color-Blend which has rich red, green and deep tan colors artistically blended on each shingle.

Double Thickness

Gives 2 complete thicknesses on the roof, with 2-in. head-laps. Ship. wt. per bundle, 100 lbs. Each bundle of 50 strips 10 by 36 inches covers 50 square feet of roof surface.

274 HB 115—Tile Red. Per bundle.	}\$2.40
274 HB 116—Forest Green. Per bundle.

LOCK SHINGLES see opposite page for choice of color

Designed Especially for Roofs Exposed to High Winds

WANT the beauty and distinction of a colorful, slate surfaced, shingle roof at the lowest possible cost? Then this Lock Shingle design will appeal to you. We've made it more attractive than ever by adding new, permanent shades of red and green—much brighter and more beautiful than in ordinary roofing. You may choose a pleasing Forest Green, rich Tile Red, or a harmonious Color-Blend with red, green and tan blended across each shingle.

Superslate Lock Shingles are especially good for use on roofs exposed to high winds—the locking feature prevents blowing or curling up. Nail heads are covered and don't

show. These Shingles are the same long lasting roofing, with the same hard, flint-like surface, as our S-superslate described on Page 95. Compare prices with equal quality anywhere and see how much you save at Wards. Labeled and listed by the Underwriter's Laboratories as fire resistant.

Lock Shingles are easy to lay—no special tools or experience are needed, and our simple instructions show exactly how to do the work. Suitable for any roof with at least one-third pitch. Each bundle contains 40 shingles and covers 50 sq. ft. of roof surface. Each shingle is 16 by 18 in.

Order nails specified on Page 91. Average actual and ship. wt. per bundle, 66 lbs. Shipped from Factory in York, Pa. See Freight Rates on Page 2.

ASPHALT SIDING see opposite page for choice of color

\$1.98
A
Bundle

DO you want to modernize the outside of your home—make it warmer in winter and cooler in summer—and end painting worries and expense for years to come? Wards Superslate Asphalt Brick Siding will do it—economically—effectively—attractively. Same hard, flint-like slate surface material as our Superslate Roofing—same long lasting protection—same dependable service. Read about it on Page 95. Applied in strips over the old siding or directly on the wood sheathing. Complete directions in every bundle. You can easily do the job yourself and increase your savings even

more. And what a difference it makes in the appearance. The natural red or tan color of the crushed slate surface has the appearance of brick and retains its fresh, attractive color without fading. It makes your home look like a brick house. You will take pride in its appearance—and its resale will be greatly increased. During the life of the Siding, you will save many painting bills as this siding requires no painting. Labeled and listed by the Underwriter's Laboratories as fire resistant.

Each strip is 36 inches by 6 inches. Each brick design is 8½ inches by 2½ inches. Bundle of 53 strips covers 33½ square feet of surface. Actual and ship. wt. per bundle, 70 lbs. Shipped from York, Pa. or Northern New Jersey. Freight Rates, see Page 2.
