

U.S. Department of Energy - Energy Efficiency and Renewable Energy Energy Savers

Swimming Pool Heating

Heating a swimming pool can consume a lot of energy and add up to high heating bills. You can improve your swimming pool's heating and energy efficiency by doing the following:

- [Installing a high efficiency or solar pool heater](#)
- [Using a pool cover](#)
- [Managing the water temperature](#)
- [Installing a smaller, energy-efficient pump and/or operating it less.](#)
