Energy Savers

Appliances and Home Electronics
If you live in a typical U.S. home, your appliances and home electronics are responsible for about 20% of your energy bills. These appliances and electronics include the following:

- Clothes washers and dryers
- Computers
- Dishwashers
- Home audio equipment
- Refrigerator and freezers
- Room air conditioners
- Televisions, DVD players, and VCRs
- Water heaters

Here you can find information to help you reduce these energy costs:

- Shopping for Energy-Efficient Appliances and Home Electronics
- Estimating Appliance and Home Electronic Energy Use
- Energy Efficiency Standards for Residential Appliances
- Electronic Power-Controlling Devices for Appliances
- When to Turn Off Personal Computers

For additional ways to reduce your energy costs, see reducing your electricity use.
