

Raw Board Products Guide

 **TIMBMET**

Everything wood should be

About Timbmet

Founded in 1942, Timbmet is a major UK importer, distributor and supplier of Timber and Panel products. We are an environmentally conscientious organisation, recognised around the world.

Throughout our years of operation, we've established excellent networks within the Timber industry worldwide, allowing us to continually research and source new species, products and ranges ensuring you have the best quality lines to choose from. All of our products are sourced responsibly.

The Timbmet team has accumulated decades of experience and expertise, making us ideally placed to act as your trusted advisor. We can offer you versatile and cost effective solutions to help meet your needs. If you have any queries we can help you by advising on the species or products to use.

Still a family business, the founder's enduring passion for wood inspires the ethos of the company today.

Timbmet... Everything wood should be

Panel Products

As a leading importer and distributor of Panel Products, Timbmet offer an extensive range including veneered boards, melamine and laminate faced boards.

Timbmet also stock your basic building products including MDF, Plywood and Chipboard as well as a range of specials such as Flexible MDF, MEDITE® TRICOYA® EXTREME and Fire Retardant products.

With such a wide range, our Melamines and Laminates and our Veneered Boards are detailed in two other Guides; email marketing@timbmet.com for hard copies.

Our extensive network of suppliers means that we can find the product you are looking for.

The Timbmet team are on hand to offer advice and solutions to all your Panel Products needs. We are your ideal partner for the highest quality Panel Products at the right prices.

Plywood

Plywood is one of the most widely used Panel Products. It is resistant to cracking, shrinking and twisting/warping, and has a general high degree of strength. Timbmet supply a wide range of Plywood that is available from stock.

- Birch Plywood
- Flexible Plywood
- Gaboon Plywood
- Hardwood/Tropical Plywood
- Poplar Plywood
- Softwood Plywood

Birch Plywood

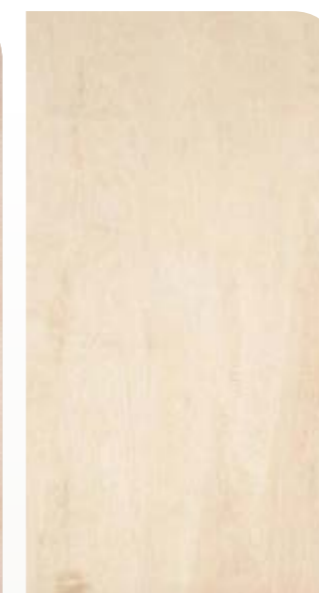

A versatile material with excellent strength to weight ratio making it one of the most dimensionally stable Plywoods available.

Birch Plywood is available in a range of grades defined by the face veneer, the highest of which is virtually blemish free and ideal for staining or lacquering. Its consistency, strength and delicate colour means it is also frequently used in the manufacture of furniture.

Birch Plywood Grading B Grade

The highest grade available for clear finishing. Clean appearance, no plugs with only minor natural features such as small pin knots.

Birch Plywood Grading S Grade

Virtually blemish-free face with the odd well made plug and other minor characteristics. Sanded on both faces.

Birch Plywood Grading BB Grade

Wood patches replace all major defects. Some brown stain is permitted to allow for colour variations.

Birch Plywood Grading WG Grade

All sound knots permitted with some open defects. Sanded on both sides.

Images are for Finnish Grade Rules.

Timbmet's range of Birch Plywoods include:

- Russian / Latvian Long Grain Birch Throughout
- WISA® Chudovo Cross Grain Birch Throughout
- WISA® Otepaa Large Press Birch Throughout
- Finnish Birch Throughout
- WISA® Hexa Grip

T + G Spruce Plywood

A Plywood floor panel for use in domestic, light industrial and commercial use. It is tongue and grooved for easy installation. Timbmet stocks T + G Spruce Plywood from both Metsä and Wisa® PEFC certified.

	Product Code	2400 x 600mm	
		18mm	22mm
Spruce 11+/111 TG4	PLYSP	✓	✓

Marine Plywood

Marine Plywood is designed for use in high moisture environments, or where it is exposed to moisture for long periods. Manufactured using better quality veneers with fewer core gaps helps to limit moisture collecting in the voids.

Timbmet offer a range of Marine Plywoods manufactured to BS1088-1:2003 making us the marine supplier of choice for many. All our Marine Plywood has independent third party quality assurance. Certificates are available on request.

Timbmet's range of Marine Plywoods include:

- Bruynzeel Hechthout Marine Plywood
- Marine Gaboon Throughout
- Far Eastern Marine Plywood
- Regina Marine Plywood
- Suprahecht
- Bruynzeel Decora®

Bruynzeel Hechthout Marine Plywood

Lloyds Register Approved. This ultra-resilient range is perfect for construction, particularly for fascias, soffits, cladding, ceiling and door panels, and marine projects including ship hulls. Hechthout plywoods are quality A/B (A sides have no joints and are practically defect free).

The Bruynzeel Hechthout range comes with a 20 year manufacturers guarantee if used in accordance with manufacturer instructions.

Standard construction manufactured to BS1088-1:2003, BSEN636-3, EN314-2 Class 3. Standard sheets are available in the thicknesses below (other thicknesses are available to order).

		6mm	9mm	12mm	18mm	25mm
Far Eastern Marine Plywood	PLYMAR	✓	✓	✓	✓	✓

Regina Marine Plywood

Sapele faces with an Okoume core. Lloyds registered Regina Marine Plywood is available in a range of thicknesses from 4mm-25mm. Available to order – minimum order quantities apply.

Suprahecht

A 100% Sapele Throughout panel. Lloyds registered Suprahecht is available in a range of thicknesses from 4mm-25mm. Available to order – minimum order quantities apply.

Bruynzeel Decora®

A wood panel faced with a sliced decorative veneer. The ideal material for interior panelling, easy to handle with a rustic charm and impressive finish. For internal use only, this is suitable for walls, ceilings and door panels. Available to order – minimum order quantities apply.

Bespoke Marine Panels

In addition to our standard ranges of Marine Plywood, Timbmet can also supply a variety of bespoke Marine Panels to order.

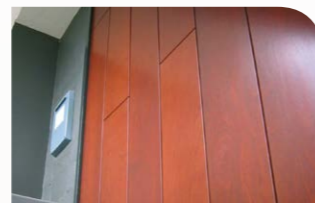

Bruynzeel
Multipaint

A durable, Gaboon plywood panel, an ideal painting medium for exterior applications. Water and weather-resistant, Multipaint panels carry a 15-year manufacturer guarantee.

Bruynzeel
Woodphonic

Panels offering sound insulation properties.

Bruynzeel
Sandwich Panels

An added value panel product used for sound insulation, thermal insulation and lightweight construction. Available in combinations of core and sheet materials.

Bruynzeel
Wooden Cladding

A range of decorative exterior weather boarding.

Bruynzeel
Multigroove

A grooved exterior plywood with a choice of grooves running horizontally, vertically or diagonally and can be finished with a transparent or opaque paint system. 10-year manufacturer guarantee.

Bruynzeel
Antisone

Bruynzeel Antisone is a sound absorbing panel which works especially well in areas where hard materials; glass, steel or stone are used. The boards are available with a huge choice of veneers which can be polished or painted.

Bruynzeel
Decora® Sole Flooring

The Bruynzeel Decora Sole Flooring is a plywood with Teak sliced veneers and light or dark inlay. It is suitable for internal use only, and is not suitable for use as a deck as the boards may not match for colour or grain.

MDF

MDF is a medium density fibreboard generally used in many internal applications. The boards are totally homogenous, sap and knot free, finely engineered and non-warping. External grade and moisture resistant MDF is also available.

The smooth surface of the boards are suitable for many finishing applications; foils, veneers, melamine, painting and staining, and for machining into profiles including: MR and Exterior Grade MDF, Medite Ecologique; Coloured, High Density and Engineered MDF. FSC® or PEFC certified products are available.

We stock a comprehensive range of MDF products from all the main manufacturers including Medite, Kronospan, Finsa, Spanolux and Norbord.

All MDF is either FSC® or PEFC certified and meets the E1 standard for Formaldehyde emissions and confirms to BSEN622 parts 1 + 5.

Timbmet's range of MDF includes:

- Premier
- Standard
- Ultralight
- Lightweight
- Moisture Resistant
- Exterior Grade
- Flexible MDF
- Deep Rout/High Density MDF
- Zero Added Formaldehyde MDF
- Flooring Quality MDF
- Coloured MDF
- V Grooved & Beaded MDF (Engineered)
- Melamine Faced MDF (MF MDF)

MEDITE® TRICOYA® EXTREME

Timbmet are specialist distributors of MEDITE® TRICOYA® EXTREME – a unique Extreme Durable MDF panel demonstrating outstanding durability and stability which is ideal for use in the most extreme and challenging environments and comes with a 50-year manufacturer's warranty.

The wood based composite panel has virtually no reaction with water, significantly increasing resistance to biological decay, improving dimensional stability and making it extremely durable. The board can be cut, coated, painted, sanded, bonded and fastened.

MEDITE® TRICOYA® EXTREME achieves a Durability Class 1 or Very Durable under EN350 Part 2 test methods, making it as durable as Teak and more durable than Oak. It also satisfies EN335 Hazard Class 1, 2, 3 and 4 without protective coating.

- **Lower maintenance costs** – extended periods between exterior coatings maintenance
- **Perfect for coating** – improved stability and durability enhances service life
- **Fungal resistant** – effective barrier to fungal decay
- **Sustainably sourced** – and FSC® certified
- **Desired service life of 60 years** – independent testing by BRE shows an expected service life of 60 years
- **Dimensionally stable** – swelling and shrinking dramatically reduced
- **Design freedom** – all the design, fixing and machining flexibility of MDF
- **Durable** – longer lasting, perfect for outdoor or wet (interior) environments

Suitable for use in:

- Exterior cladding/facades
- Shopfront/signage/billboards
- Cubicles/wet rooms
- Shipbuilding/marine
- Garden/outdoors

MEDITE® TRICOYA® EXTREME

A revolution in wood based panel products for use in exterior and wet applications.

Project Brief

Land Rover exhibition stand at the Royal Windsor Horse Show to form the Queen's plinth.

Client

FWD (UK) Ltd Exhibitions in association with The Event Business for Land Rover UK.

Product Solution

New, durable MEDITE® TRICOYA® EXTREME MDF.

The Project

The Royal Windsor Horse Show is the first major outdoor show of the season. Land Rover UK required a stand that could be dismantled and reused for other events – notably the CLA Gamefair and Burghley Horse Trials.

The Challenge

To build a plinth strong enough to carry several tonnes of vehicle weight and at the same time durable enough to withstand adverse weather conditions and survive an entire season of being dismantled and reused for several shows.

OSB

BBA approved OSB (Oriented Strand Board) from Norbord, uses up to 50 layers of wood strands compressed under great heat to produce a board that is exceptionally strong and contains no voids, knots or soft spots.

By using exact tolerances to manufacture using the latest control systems, OSB can be more cost effective than using Plywoods.

- CE approved • BBA approved • EN300

OSB Sitecoat®

A primer coated hoarding, ready for paint or site graphics. Sitecoat uses OSB board, factory primed with eco-friendly non-solvent coating that fills and smoothes the surface.

- CE approved • BBA approved • EN300

	Product Code	18mm x 2440mm x 1220mm
Sitecoat®	OSBSC	✓

OSB2

A highly durable load-bearing board ideal for house building and construction and can be used for roofs, floors and more. Ideal for structural use in dry conditions.

Finsa GreenPanel®

GreenPanel® is an ultralight structural board consisting of two thin MDF faces, with a grid-like interior made from thin MDF Fibranor. The result is maximum resistance with minimum weight.

Specially developed for use where broad thicknesses, low weight, high stability and high resistance are needed.

Suggested uses include:

- Worktops
- Table tops
- Ceilings
- Wall panels and partitions
- Caravans
- Boats
- Thick flooring
- Shopfitting
- Exhibitions

Fire Retardant Products

Timbmet, working in partnership with Arch Timber Protection, offer a range of high performance fire retardant treated products.

- Tried and tested industrial fire retardant pressure treatments from Arch Timber Protection – DRICON, NON-COM Exterior and ATP Generic
- Euroclass B or C ratings in accordance with EN 13501-1, with full Classification Reports available
- DRICON Type HR (Humidity Resistant) treatment – the only BBA certified fire retardant
- FSC® or PEFC certified products available

DRICON is a proven quality fire retardant treatment for panels with performance you can trust. Specified and used with confidence around the world for over 25 years, DRICON treated products have never failed to give that all important extra time in a fire situation; time to limit fire damage to the building, time to save lives.

Most timber products can be treated by pressure impregnation or surface coating to comply with FR regulations. Please contact us for this service.

Where a Fire Certificate is required for fabricated material, care must be taken to ensure that the total composite will achieve the required result, which can only be determined by appropriate testing. Customers and specifiers must satisfy themselves that the products they chose are fit for required applications.

Euroclass B Fire Retardant Panels

The highest possible level for fire treated wood products. Measurements are based on the rate of fire growth, lateral fire spread, total heat release and smoke production. Thresholds to achieve Euroclass B are higher than those for Euroclass C and, therefore, if a material conforms to Euroclass B it also conforms to Euroclass C.

ATP Generic Type DI Far Eastern Hardwood Plywood

ATP Generic fire retardant treated Far Eastern Plywood is Type DI, suitable for dry internal use providing Euroclass B fire performance in accordance with BS EN 13501-1.

	Thickness	Product Code	2440 x 1220mm
ATP Generic Type DI Far Eastern Hardwood Plywood	12mm	PLYFE12FRB	✓
	18mm	PLYFE18FRB	✓

FSC® Certified FR Medite MDF

FSC® Certified fire retardant treated MDF Euroclass B (in accordance with BSEN 13501-1) identified by its pink colour. Suitable for internal dry conditions.

Melamines and Laminates

Timbmet's wide range of Melamine Faced Chipboard (MFC) and MDF based panels provide a hard, pre-finished surface, easy to maintain and extremely hard wearing. With a huge choice of finishes available, whatever the texture, effect or colour you require, we will have a product to suit.

We offer the full range of Egger, Greenlam and Kronospan boards, and also stock Aquamura wall panelling, Decogloss, Finsa and KoskiDecor melamine and laminate board making Timbmet your ideal Melamine Laminate board supplier.

ABS & Melamine Edging

Timbmet stock matching ABS and Melamine edging for all decorative boards, and offer a cut and edge service. Roll lengths, thicknesses and widths vary.

Compact Laminates

Timbmet offer a variety of anti-bacterial protected Greenlam® Compact Laminate decors.

Door Size Laminates

Door Size Laminates in a range of Woodgrain and Unicolour decors are available from Egger and Greenlam®. They are an extremely durable and cost-effective solution to veneers.

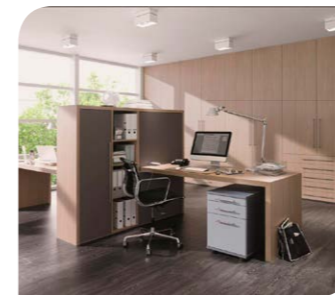

KoskiDecor

KoskiDecor is an ideal material for the furniture and joinery industries. Its features provide smooth and superior surfaces that are ready for decorative use.

Laminates

A wide selection of 0.8mm laminates from the Egger collection, and 0.7mm laminates from Greenlam®.

Melamine Faced Chipboard (MFC)

Timbmet are a Melamine Faced Chipboard (MFC) supplier of 18mm MFC boards available from Egger and Kronospan stock.

Melamine Faced MDF (MF MDF)

A range of 18mm Melamine Faced MDF boards available from stock from Egger, Finsa and Kronospan.

Further Details

Further details are available in the Melamines and Laminates Guide; email marketing@timbmet.com for a hard copy.

Veneered Boards

Timbmet are the biggest distributor of Veneered Boards in the UK, stocking an enormous variety of cuts and colours across a range of high quality boards.

Veneers are very thin slices of wood which are used to cover base materials. This gives the effect of solid wood but at a reduced cost and with enlarged scope for application: different slicing processes produce different decorative grain patterns whilst the base material maintains shape and strength.

Special veneered boards are available to order, including Burls.

Veneered MDF

Our standard stock Veneered MDF boards are a commercial grade A/B and suitable for a broad range of projects including furniture manufacture, interior fit out, shop fitting and wall panelling.

Veneered Blockboard

18mm Veneered Blockboard available in White Ash, Beech and Oak crown cut A/B. Other veneers are available to order.

Querkus Collection by Decospan

Querkus collection is a special order collection from Decospan. A contemporary range of carefully selected European Oak veneers designed to complement modern, streamlined interiors.

Look'Likes Collection by Decospan

A special order collection from Decospan, of reconstituted veneers produced from real wood, made to look like another specie, resulting in consistent colour.

Other Veneered Boards

Timbmet offer a range of Finsa Iberpan® 400, Flexi Veneer, Jumbo Sized and Lacquered Veneered Boards and Veneered Plywood.

Exotic Veneered Boards to order

A wide range of exotic veneered boards available to order on a variety of core boards, MR and FR MDF, Birch or Poplar Plywood.

Real Wood Edging

Real wood veneered edging is available in a variety of species to complement our range of veneered boards.

Further Details

Further details are available in the Veneered Boards Guide; email marketing@timbmet.com for a hard copy.

Manufacturing Services for Panels

We offer a number of manufacturing services to our Panel customers including CNC, Cut-to-Size and Edge banding.

CNC Machining

From simple CNC jobs to more intricate designs, Timbmet can help. Using our 3-axis CNC machine our skilled team can engrave patterns, images or text onto sheet materials.

Every job is hand-finished giving you a high quality result. A wide variety of specifications are achievable. Maximum board size is 3050 x 1525mm.

Cut-to-Size Service

Using the latest optimisation and production software, our team will identify the most efficient cutting patterns for your final requirements, whatever Panel product you choose. This will minimise waste and reduce your costs and lead times.

We can also label each component from your cutting list:

- Dimensions
- Job reference
- Material
- Description
- Bar code
- Special messages

Further details are available in the Manufacturing Guide; email marketing@timbmet.com for a hard copy.

Responsible Business

Timbmet are market leaders in our commitment to the sustainability and legality of our supply base and responsible business solutions.

We have been independently audited to ensure we are compliant with the European Timber Regulation (EUTR), both as an operator and a trader. Timbmet are members of the Timber Trade Federation (TTF) and have signed up to their Responsible Purchasing Process (RPP).

We fully support independent third party certification schemes of Timber products such as FSC® (Forest Stewardship Council®) and PEFC (Programme for Endorsement of Forest Certification) as the best way to demonstrate compliance with the EUTR and the RPP. We are committed to increasing the proportion of our purchasing that is certified. Where certification is not available we investigate the origin via a robust Due Diligence process.

Timbmet operate in full compliance with the EUTR

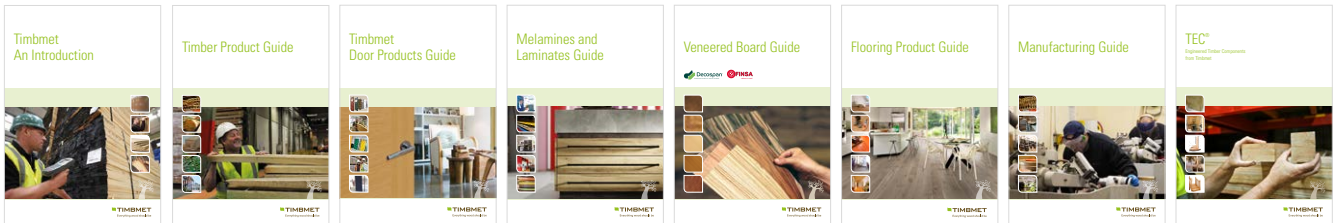

The mark of responsible forestry
Look for FSC® certified products.

Timbmet have a range of useful guides available for their other products.
